

CARBON-FUNCTIONAL SILICONES

P. D. GEORGE,¹ M. PROBER, AND J. R. ELLIOTT

General Electric Research Laboratory, Schenectady, New York

Received November 14, 1955

CONTENTS

I. Introduction.....	1067
A. Scope of the review.....	1067
B. Nomenclature.....	1068
C. Format of tables of compounds.....	1068
II. Typical synthetic methods.....	1069
A. Direct syntheses.....	1069
B. Substitution reactions.....	1069
C. Replacement reactions.....	1070
III. Typical reactions.....	1071
A. Carbon-functional substituents.....	1071
B. Silicon-carbon cleavages.....	1071
C. Silicon-functional reactions.....	1072
IV. Olefins and acetylenes.....	1073
A. Syntheses of olefins.....	1073
1. Direct syntheses.....	1073
2. Dehydrohalogenation.....	1073
3. Silicon hydride additions.....	1083
4. Unsaturated organometallic reagents.....	1084
5. Other syntheses.....	1084
B. Properties of olefins.....	1085
1. Addition reactions.....	1085
2. Cleavage reactions.....	1087
3. Polymerization.....	1089
4. Silicon-functional reactions.....	1090
5. Other properties.....	1090
C. Syntheses of acetylenes.....	1091
D. Properties of acetylenes.....	1091
V. Fluoro compounds.....	1091
A. Perfluoroalkyl derivatives.....	1091
B. Partially fluorinated alkyl derivatives.....	1095
C. Side-chain fluorinated aromatic derivatives.....	1095
D. Nuclearily fluorinated aromatic derivatives.....	1096
VI. Chloro compounds.....	1096
A. Syntheses of chloromethyl derivatives.....	1096
1. Photochemical chlorination.....	1096
2. Other syntheses.....	1107
B. Properties of chloromethyl derivatives.....	1108
1. Halogen replacement reactions.....	1108
2. Chloromethyl group cleavage reactions.....	1111
3. Silicon-functional reactions.....	1112
4. Other properties.....	1114

¹ Present address: General Engineering Laboratory, General Electric Company, Schenectady, New York.
