

Subject Index to Volume 25

**Adenylyl cyclase**

olfaction, vomeronasal organ, cAMP 313

Aedes aegypti

fatty acid, host odour, attractant 323

Aging

olfaction, gustation, human 331

Alarm reactionolfactory tract, specific behaviour pattern, *Carassius carassius* 103**Amino acids**odorants, stream water, masu salmon, Lake Toya 533
olfaction, discrimination, detection, catfish 21
taste, glossopharyngeal (IX) taste system, binary mixtures, channel catfish 501**5 α -Androst-16-en-3 α -ol**

pulsatile luteinizing hormone (LH), menstrual synchrony, human females 465

Antennal lobesglomeruli, olfactory center, sexual dimorphism, *Manduca sexta* 119**Autonomic nervous system**

taste, hedonic tone, primary tastes, taste preferences 709

Bitter compoundstaste, receptor cells, *in vitro* assay 361**Calcitonin gene-related peptide (CGRP)**

substance P, taste neurons, insular cortex, rats 351

cAMP

olfaction, vomeronasal organ, adenylyl cyclase 313

Capsaicincitric acid, vanilloid, acid-sensitive ion channel (ASIC), irritation, trigeminal, psychophysics, two-alternative forced choice (2-AFC) 769
ethanol, cinnamaldehyde, irritation, 6-*n*-propylthiouracil, sensitization, desensitization 239**Carbon anhydrase**CO₂, acetazolamide, capsaicin, 2-AFC, trigeminal caudalis, c-fos 277**Cerebellum**

taste, gustatory, insula, positron emission tomography (PET), somatosensory 267

Cerebrospinal fluid (CSF)

diazepam binding inhibitor (DBI), quinine, palatability, hydra 739

Chemesthesisnicotine, ethmoid, mecamylamine, dihydro- β -erythroidine hydrobromide (DHBE) 61**Chemical senses**

signal transduction, second messenger, chemoattractant 67

Chemosensory proteins

immunocytochemistry, binding assay RP-HPLC, SEM, TEM, proboscis, moths 541

Chemosensory stimuli

contextual effects, magnitude estimates 747

Chemosensory transduction

sodium chloride transport, anion paradox, paracellular pathway, toads 167

Chorda tympani nerve

taste, gustatory electrophysiology, amiloride, nucleus of the solitary tract, geniculate ganglion 719

Cinnamaldehydecapsaicin, ethanol, irritation, 6-*n*-propylthiouracil, sensitization, desensitization 239**Citral**

eugenol, odor quality discrimination (OQD) threshold, psychometric properties, substitution-reciprocity (SURE) method 493

Citric acid

capsaicin, vanilloid, acid-sensitive ion channel (ASIC), irritation, trigeminal, psychophysics, two-alternative forced choice (2-AFC) 769

CO₂

carbon anhydrase, acetazolamide, capsaicin, 2-AFC, trigeminal caudalis, c-fos 277

Cyclic nucleotide

pheromone response transduction, receptor current, nerve impulse activity, sensillum 381

Diazepam binding inhibitor (DBI)

quinine, cerebrospinal fluid (CSF), palatability, hydra 739

Electroolfactogram (EOG)

airflow parameters, rat 761

EOG recordings

odor responses, olfactory epithelium, anesthetized freely breathing rat 695

Epidermal growth factor (EGF)

taste bud, taste papilla, sialoadenectomy 9

Epithelial cell cultures

olfactory receptor neurons, insulin 93

Ethanolcapsaicin, cinnamaldehyde, irritation, 6-*n*-propylthiouracil, sensitization, desensitization 239**Eugenol**

citral, odor quality discrimination (OQD) threshold, psychometric properties, substitution-reciprocity (SURE) method 493

G-ProteinG-protein α -subunit, taste buds, comprehensive analyses, circumvallate papillae, rat 525
pheromone, vomeronasal system, immunocytochemistry, goat 387**Gasoline**

methyl tertiary-butyl ether (MTBE), odor, sniff testing, reodorant, oxygenate 395

Genetic variation

sensory studies, taste perception, supertasters 447

Germacrene D

sesquiterpenes, plant odour receptor neurones, gas chromatography, electrophysiology, mass spectrometry 141

Glomeruli

antennal lobes, olfactory center, sexual dimorphism, *Manduca sexta* 119

Glossopharyngeal (IX) taste system

taste, amino acids, binary mixtures, channel catfish 501

Glossopharyngeal nerve

taste reactivity, sucrose, conditioned taste aversion, aversion 423
tongue surface, taste cell, slow potential, frog 583

Gustation

olfaction, aging, human 331

Gustatory

taste, cerebellum, insula, positron emission tomography (PET), somatosensory 267

Heart rate

taste, preference, fundamental taste substances 149

Immunocytochemistry

chemo-sensory proteins, binding assay, RP-HPLC, SEM, TEM, proboscis, moths 541

Insular cortex

taste neurons, calcitonin gene-related peptide (CGRP), substance P, rats 351

Insulin

olfactory receptor neurons, epithelial cell cultures 93

Jacobson's organ

pheromones, olfaction 369

Labeled magnitude scale (LMS)

intensity estimates, sweetness intensity 85

Ligand–receptor interaction

olfaction, transduction, olfactory receptor neuron, perireceptor space, intensity coding 293

Menstrual synchrony

5 α -androst-16-en-3 α -ol, pulsatile luteinizing hormone (LH), human females 465

odor sensitivity, pheromone, axillary secretion, 5 α -androst-16-en-3-one, 5 α -androst-16-en-3 α -ol 407

Methyl tertiary-butyl ether (MTBE)

gasoline, odor, sniff testing, reodorant, oxygenate 395

S-Methylglutathione

tentacle ball formation, peptides, *Hydra* 173

Mosquito

Aedes aegypti, fatty acid, host odour, attractant 323

Naris closure

tyrosine hydroxylase, protein kinase A, protein kinase C, CaM kinase II, CaM kinase IV 401

Nasal pungency thresholds

two stimulus-delivery systems, ketones, acetates, alcohols 285

Neurons

taste, calcitonin gene-related peptide (CGRP), substance P, insular cortex, rats 351

Nicotine

chemesthesis, ethmoid, mecamlamine, dihydro- β -erythroidine hydrobromide (DHBE) 61

Odor

gasoline, methyl tertiary-butyl ether (MTBE), sniff testing, reodorant, oxygenate 395

odor adaptation, olfactory receptor cilia, olfactory transduction 473

odor quality discrimination (OQD) threshold, psychometric properties, eugenol, citral, substitution–reciprocity (SURE) method 493

odor quality, olfaction, molecular properties 429

odor response, EOG recordings, olfactory epithelium, anesthetized freely breathing rat 695

odor response, olfactory sensory neuron, water nose, action potential, amino acid, volatile odorant, IP₃, voltage-clamp 55

odor sensitivity, menstrual synchrony, pheromone, axillary secretion, 5 α -androst-16-en-3-one, 5 α -androst-16-en-3 α -ol 407

odorant, olfaction, terminological clarification 693

olfactory responsiveness, human fetuses, pregnant mother's diet 729

priming experiment, intramodal condition, intermodal condition 703

quality discriminations, binary mixtures, latency 247

Odorant

amino acids, stream water, masu salmon, Lake Toya 533

odor, olfaction, terminological clarification 693

Odorant detection

sniffing, threshold maintenance 1

Olfaction

amino acids, discrimination, detection, catfish 21

autobiographical memory, context-dependent memory, Proust-phenomenon 111

discrimination, aging, sex, human 461

discrimination, hemispheric lateralization 517

discrimination ability, odor structure–activity relationships, functional groups, humans 189

gustation, aging, human 331

odor, odorant, terminological clarification 693

odor quality, molecular properties 429

pheromones, Jacobson's organ 369

transduction, ligand–receptor interaction, olfactory receptor neuron, perireceptor space, intensity coding 293

vomerolnasal organ, adenylyl cyclase, cAMP 313

Olfactory adaptation

psychophysical studies, adult humans 487

Olfactory bulb

olfactory receptor mapping, rewiring connections 199

pheromone discrimination, mitral cells, ruffed cells, *Carassius auratus* 339

Olfactory center

antennal lobes, glomeruli, sexual dimorphism, *Manduca sexta* 119

Olfactory neurons

female *Bombyx mori*, laboratory air 31

Olfactory receptor cells

odour-induced action potential, receptor current responses,
suction pipette technique, frog 483

Olfactory receptor cilia

odor adaptation, olfactory transduction 473

Olfactory receptor neurones

epithelial cell cultures, insulin 93

Olfactory receptors

rat 17 olfactory receptor, octanal interactions 155

Olfactory responsiveness

odours, human foetuses, pregnant mother's diet 729

Olfactory sensitivity

detection thresholds, nonhuman primates 47

Olfactory sensory neuron

odor response, water nose, action potential, amino acid,
volatile odorant, IP₃, voltage-clamp 55

Olfactory tract

alarm reaction, specific behaviour pattern, *Carassius carassius*
103

Olfactory transduction

odor adaptation, olfactory receptor cilia 473

Optically active linalools

sensory test, physiological measurements 77

Oscillations

acetylcholine, beta band, local field potentials, habituation 561

Peptides

tentacle ball formation, *S*-methylglutathione, *Hydra* 173

Pheromone

G-protein, vomeronasal system, immunocytochemistry, goat
387

menstrual synchrony, odor sensitivity, axillary secretion,
5 α -androst-16-en-3-one, 5 α -androst-16-en-3 α -ol 407

pheromone discrimination, olfactory bulb, mitral cells, ruffed
cells, *Carassius auratus* 339

pheromone response transduction, cyclic nucleotide, receptor
current, nerve impulse activity, sensillum 381

pheromone, olfaction, Jacobson's organ 369

Pulsatile luteinizing hormone (LH)

5 α -androst-16-en-3 α -ol, menstrual synchrony, human females
465

Quinine

diazepam binding inhibitor (DBI), cerebrospinal fluid (CSF),
palatability, hydra 739

Receptor cells

taste, bitter compounds, *in vitro* assay 361

Receptor neurones

plant odour receptor neurones, sesquiterpenes, germacrene D,
gas chromatography, electrophysiology, mass spectrometry
141

Sensory studies

taste perception, genetic variation, supertasters 447

Sensory test

optically active linalools, physiological measurements 77

Sesquiterpenes

receptor neurones, germacrene D, gas chromatography,
electrophysiology, mass spectrometry 141

Signal transduction

chemical senses, second messenger, chemoattractant 67

Substance P

calcitonin gene-related peptide (CGRP), taste neurons, insular
cortex, rats 351

Sucrose

sucrose octaacetate (SOA), taste, proline rich proteins (PRP),
bitter, transgenic mice 39

taste reactivity, glossopharyngeal nerve, conditioned taste
aversion, aversion 423

Sweeteners

ternary mixtures, synergism 131

Synergism

sweeteners, ternary mixtures 131

Taste

amino acids, glossopharyngeal (IX) taste system, binary
mixtures, channel catfish 501

autonomic nervous system, hedonic tone, primary tastes, taste
preferences 709

bitter taste transduction, IP₃ signaling, phospholipase C, G
protein, G $\beta\gamma$ complex 413

burning mouth syndrome, post-menopausal women 575

calcitonin gene-related peptide (CGRP), substance P, neurons,
insular cortex, rats 351

chorda tympani nerve, gustatory electrophysiology, amiloride,
nucleus of the solitary tract, geniculate ganglion 719

gustatory, cerebellum, insula, positron emission tomography
(PET), somatosensory 267

heart rate, preference, fundamental taste substances 149

localization, functionality, selective removal, parallel
processing 181

neohesperidin dihydrochalone, enhancer, aqueous sucrose
solutions 555

receptor cells, bitter compounds, *in vitro* assay 361

sucrose octaacetate (SOA), proline rich proteins (PRP), bitter,
transgenic mice 39

taste bud, G-protein α -subunit, comprehensive analyses,
circumvallate papillae, rat 525

taste bud, taste papilla, epidermal growth factor (EGF),
sialoadenectomy 9

taste cell, glossopharyngeal nerve, tongue surface, slow
potential, frog 583

taste papilla, taste bud, epidermal growth factor (EGF),
sialoadenectomy 9

taste perception, sensory studies, genetic variation, supertasters
447

taste reactivity, glossopharyngeal nerve, sucrose, conditioned
taste aversion, aversion 423

umami, monosodium glutamate, nucleotide monophosphates,
taste synergy 507

Tentacle ball formation

S-methylglutathione, peptides, *Hydra* 173

Ternary mixtures

sweeteners, synergism 131

Threshold maintenance

odorant detection, sniffing 1

Tongue surface

glossopharyngeal nerve, taste cell, slow potential, frog 583

Transduction

olfaction, ligand–receptor interaction, olfactory receptor neuron, perireceptor space, intensity coding 293

Two stimulus-delivery systems

nasal pungency thresholds, ketones, acetates, alcohols 285

Tyrosine hydroxylase

nasal closure, protein kinase A, protein kinase C, CaM kinase II, CaM kinase IV 401

Umami

monosodium glutamate, nucleotide monophosphates, taste synergy 507

Vanilloid

capsaicin, citric acid, acid-sensitive ion channel (ASIC), irritation, trigeminal, psychophysics, two-alternative forced choice (2-AFC) 769

Vomeronasal organ

olfaction, adenylyl cyclase, cAMP 313

Vomeronasal system

G-protein, pheromone, immunocytochemistry, goat 387
