

List of Abstracts from the Fifteenth Annual Meeting of the European Chemoreception Research Organization

The full content of these abstracts is available online at www.chemse.oupjournals.org

Magnetic resonance imaging of the olfactory system

N. Abolmaali

Differential function of RNCAM isoforms in precise target selection of olfactory sensory neurons

M. Alenius and S. Bohm

In vivo characterization of nasal trigeminal chemoreceptors

H. Alimohammadi and W.L. Silver

Molecular modelling of 17–40 olfactory receptor

C. Anselmi, M. Centini, A. Buonocore, D. Di Maro, D. Calamandrei, N. Niccolai and H. Hatt

Does early experience determine mate choice in dwarf hamsters (*Phodopus campbelli* and *P. sungorus*)?

R. Apfelbach, E.V. Petrova, V.M. Parfenova and N.Y. Vasilieva

Characteristics of a decline in olfactory function with age measured by the 'Odor Stick Identification Test'

S. Ayabe-Kanamura, S. Saito, T. Kobayakawa, N. Gotow, Y. Masuda, N. Naito, M. Mise, Y. Yoshida and Y. Takashima

Cross-cultural comparisons of distributions of tasters, non-tasters and supertasters of PTC and PROP

G.A. Bell and H.J. Song

Adult neurogenesis in the rat olfactory bulb

O. Belluzzi, M. Benedusi and J.J. LoTurco

The eye as a model for trigeminal irritation

C. Belmonte

Response of trigeminal ganglion neurons to mechanical and cold stimuli

C. Belmonte, C. Robert, E. de la Peña, C. Cabanes and F. Viana

Sensitivity to odours

M. Bende

The effects of androstadienone and estratetraenol on physiology and mood in men and women

M. Bensafi, W. Brown and N. Sobel

Characterization of antennal lobe glomeruli and interneurons of the ipsi- and bilateral olfactory pathways of the heliothine moth

B.G. Berg, C.G. Galizia, R. Brandt, D. Müller and H. Mustaparta

Functional subsets of taste receptor cells in the mouse vallate papilla during postnatal development

A. Bigiani, V. Ghiaroni and F. Fieni

Molecular mechanism of chemosensory transduction in the vomeronasal organ

I. Boekhoff, P. Widmayer, K. Rünneburger, J. Fleischer, S. Conzelmann and H. Breer

Convergence between somatic lingual sense and taste, electrophysiology and psychophysics

Y. Boucher

Lateralization processes related to olfactory/trigeminal stimuli

G. Brand and L. Jacquot

Trigeminal sensitization and desensitization in the nasal cavity revealed by electrodermal measurements

G. Brand and L. Jacquot

Ligand binding properties of hamster aphrodisin

L. Briand, J.-C. Huet, V. Bézirard, C. Nespoulous, Y. Boucher, D. Trotier and J.-C. Pernollet

Evidence of a human odorant-binding protein in the olfactory mucus: location, characterization and potential role as an odorant carrier

L. Briand, C. Eloit, C. Nespoulous, V. Bézirard, J.-C. Huet, C. Henry, F. Blon, D. Trotier and J.-C. Pernollet

Neural correlates of pheromonal learning in mice

P.A. Brennan

Odor sensitivity and perception in pregnant women

D.A. Broman, J. Olofsson and S. Nordin

Influence of concentration on emotional responses to odorants

L. Brun, O. Robin, A. Dittmar and E. Vernet-Maury

Trigeminal mechanisms of novel spice-induced sensations

B. Bryant

Identification and characterization of a taste-specific regulator of G protein signaling

L. von Buchholtz, A. Elischer, E. Tareilus, R. Gouka, C. Kaiser, H. Breer and S. Conzelmann

The bitter sides of glucose: identification of a human bitter receptor and its cognate ligands

B. Bufo, T. Hofmann, D. Krautwurst, J.D. Raguse and W. Meyerhof

The influence of salivary constituents and oropharyngeal performances on retronasal aroma perception

A. Büttner

Congruent odors and the Stroop effect

R. Buschmann-Maiworm, S. Winkel and W. Schurian

Toward objective indices of chemesthetic stimulation from airborne agents

W.S. Cain

Toward an index of ability to transmit semantic information regarding odors

W.S. Cain and P.M. Wise

Processing of oral chemical irritation in trigeminal subnucleus caudalis

E. Carstens

Desensitization of oral irritation by sequentially applied mustard oil and reciprocal cross-desensitization with capsaicin

E. Carstens, M.I. Carstens and C.T. Simons

From taste to flavor: insights from neuroimaging data

B. Cerf-Ducastel, C. Murphy and A. Faurion

Influence of verbal-cognitive strategy on odour identification depends on odour familiarity and not on perceived intensity

M. Chandra, J.E. Paton and G.A. Bell

The smell of emotion: human olfactory communication of emotions

D. Chen and M.K. McClintock

Development of a food volatiles extraction method

M. Chida, Y. Sone, H. Nagata and H. Shikata

Taste and speak: when do experts generalize?

S. Chollet, D. Valentin and H. Abdi

Are supertasters also superfeelers?

A. Chopra, G. Essick and F. McGlone

Influence of language and culture on odour mental representation

C. Chrea, D. Valentin, C. Sulmont-Rossé, D. Nguyen and H. Abdi

Identification of novel taste-specific genes using differential screening approaches

S. Conzelmann, L. von Buchholtz, A. Elischer, P. Widmayer, E. Tareilus, C. Kaiser and H. Breer

Perinatal plasticity of olfaction and adaptive responses in two mammalian newborns

G. Coureaud, B. Schaal, L. Marlier and R. Soussignan

Perceptual, cognitive and psychosocial factors in trigeminal experience

P. Dalton

Fos expression in rat piriform cortex after retrieval of an olfactory discrimination task

F. Datiche, F. Liénard, F. Rouillet and M. Cattarelli

Neonatal learning of natural and artificial odours associated with the maternal breast

M. Delaunay-El Allam, L. Marlier and B. Schaal

Antennal feedback loop regulates pheromone release in beetles

J.C. Dickens

Orientation to the nest by smell in rabbit pups

H. Distel, E. Garay, M. Maldonado and R. Hudson

Successful odor identification in the honeybee *Apis mellifera* occurs within an odor-independent time window

M. Ditzen and G. Galizia

Olfactory dysfunction in patients with mild cognitive impairment

J. Djordjevic, K. De Sousa, H. Chertkow and M. Jones-Gotman

Neural basis of olfaction in the *Drosophila melanogaster* larva

A.I.D.N. Domingos

Bitter taste and food choices

A. Drewnowski

Investigating associations between genetic variation in taste, diet and cardiovascular disease risk

V.B. Duffy, H.L. Hutchins, A.K. Chapo and L.M. Bartoshuk

The influence of oral and product temperature on the sensory perception of texture and flavor attributes in custard desserts and mayonnaise

L. Engelen, R.A. de Wijk, J.F. Prinz and F. Bosman

The vomeronasal epithelium in the mid-term human foetus: lectin binding

C.S. Evans and E.V. Grigorieva

Multimodal monosodium L-glutamate sensitivity in humans

A. Faurion, O. Lugaz and A.M. Pillias

Modulation of taste sensitivity with familiarization to novel stimuli

A. Faurion, B. Cerf-Ducastel, N. Boireau, D. Le Bihan, P.F. van de Moortele and A.-M. Pillias

Spontaneous preference for the odours of eugenol and cineol in male C57BL/6J mice

C.U. Fentrop, H. Distel and C.T. Wotjak

Synapse number and olfaction sensory coding in *Drosophila*

A. Ferrús, J.M. Devaud and A. Acebes

Effects of cyclic nucleotides in pheromone transduction of the hawkmoth *Manduca sexta*

C. Flecke, J. Dolzer, S. Krannich and M. Stengl

Molecular assembly of cAMP-mediated olfactory signaling pathways via scaffolding proteins

J. Fleischer, I. Boekhoff, E. Klussmann, V. Henn and H. Breer

Trigeminal ERP: relation to stimulus duration and concentration

J. Frasnelli, J. Loetsch and T. Hummel

Dynamics of odor representations in the olfactory bulb

R. Friedrich

Olfactory information restructuring by projection neurons visualized with genetically expressed cameleon in *Drosophila melanogaster*

C.G. Galizia, F. Fiala, T. Spall, S. Diegelmann, S. Sachse, J.M. Devaud, B. Eisermann and E. Buchner

How specific and unspecific inhibitory connections shape the olfactory response profile of identified glomeruli

C.G. Galizia, A.F. Silbering, Ph. Peele, M. Weidert and S. Sachse

Voltage-dependent Na⁺ and K⁺ currents in supporting cells of the mouse vomeronasal organ

V. Ghiaroni, F. Fieni, R. Tirindelli, P. Pietra and A. Bigiani

Characterization of elements of the cyclic nucleotide signaling pathway in olfactory organs: I_h-channels from the spiny lobster, *Panulirus argus*

G. Gisselmann, T. Marx, U. Brünner, Y. Bobkov, C.H. Wetzler, E. Neuhaus, B.W. Ache and H. Hatt

Odorant detection and screening by engineered yeasts operating as reporter systems

E. Godel, M. Crowe, R. Salesse, I. Connerton and E. Pajot-Augy

Odour specificities of olfactory receptors in *Drosophila*

W. van der Goes van Naters, T. Shiraiwa, A. Dobritsa, D. Lessing, C. Warr, M. de Bruyne and J. Carlson

Expression and function of odor receptors

W. van der Goes van Naters, T. Shiraiwa, A. Dobritsa, D. Lessing, A. Ray, C. Warr, M. de Bruyne and J.R. Carlson

Noxious chemical stimulation of rat mucosa activates a parasympathetic reflex to increase meningeal and cortical blood flow

R. Gottselig, M. Mihaylov and K. Messlinger

Chemosensory changes with age and their effects on food intake and nutrition

C. de Graaf

Bimodal effects of oral chemesthetic and bitter stimuli across the tongue

B.G. Green

Investigations of nasal respiratory system blocking through continuous nasal airflow

G.J. Greene, H.M. Kipen and N. Fiedler

Sensory axon targeting and synapse specificity in olfactory glomeruli

C.A. Greer, Cl. Iwema, M.R. Akins, H. Tookes and H.B. Treloar

SURE, why not? The SUBstitution-REciprocity method (Olsson and Cain, 2000) for measurement of odor quality discrimination thresholds: replication and extension to nonhuman primates

N. Grimm and M. Laska

Chemo-perception and behaviour in *Drosophila* larva and adult is controlled by the pan-neural gene *prospero*

Y. Grosjean, F. Lacaille and J.F. Ferveur

Influence of foreign residence on perception of everyday odors: a German-Japanese cross-cultural study

S.M. Gruesser, S. Rau, A. Pfoth, H. Distel and R. Hudson

Decreased trigeminal sensitivity in anosmia

H. Gudziol, G. Förster and T. Hummel

Functional characterization of binding proteins for pig appeasing compounds and molecular cloning in the vomeronasal organ

G. Guiraudie, A.-H. Cain, C. Malosse, P. Pageat and P. Nagnan-Le Meillour

Olfaction in neurodegenerative disease

C. Hawkes

Oral mucosal blood flow in patients with burning mouth syndrome

J. Heckmann, S.M. Heckmann, M.J. Hilz, M. Popp, H. Marthol, B. Neundörfer and T. Hummel

Zinc gluconate in the treatment of dysgeusia: a double blinded controlled study

S.M. Heckmann, S. Habiger, M.G. Wichmann and T. Hummel

Odor intensity ratings in response to ortho- and retronasal stimulation

S. Heilmann and T. Hummel

Dynamic regulation of olfactory bulb mitral cell activity by metabotropic glutamate receptor mGluR1

T. Heinbockel and M. Ennis

Specificity of sweet-best or bitter-best fibers in rhesus monkey chorda tympani does not change with stimulus concentration

G. Hellekant, Y. Danilov and V. Danilova

Behavioral and receptor cell responses to high intensity sweeteners and enantiomeric sweetener pairs in flies

T. Higgins and L.M. Kennedy

Chemical markers that determine the olfactory response from manure sources

P.J. Hobbs, T.H. Misselbrook, R. Noble and K.C. Persaud

Change and recovery of taste in result of middle ear surgery

J. Homoth, T. Just, E.-G. Kleinschmidt, S. Graumüller, U. Vick and H.W. Pau

The relationship between nasal anatomy and olfactory ability

D.E. Hornung

Sensory determinants of one-trial odor learning in newborn rabbits

R. Hudson, A. Mendoza, V. Guzmán, C. Rojas and G. Coureud

Experience-dependent modulation of olfactory function in the newborn rabbit

R. Hudson

Development of a questionnaire for the assessment self reported olfactory functioning

B. Hufnagel, J. Lehrner and L. Deecke

Impaired trigeminal function in olfactory loss: a study based on lateralization of chemosensory stimuli

T. Hummel, K.B. Hüttenbrink, J. Frasnelli and T. Futschik

Studies of umami synergism using ionotropic and metabotropic glutamate receptor agonists

K. Iseki, Y. Hayashi and T. Mori

Does androstenone care whether it attracts gay or straight people?

B. Jahnke, B.M. Pause and R. Ferstl

Pheromone receptor cells: density of receptor molecules and dissociation constant of the pheromone-receptor complex

K.E. Kaissling and A.V. Minor

Olfactory receptor subtypes expressed in individual OR37 neurons

J. Kaluza, H. Breer, W. Hanke and J. Strotmann

Measuring odour emissions from landfill sites

M. Karnik

Encoding of perceptual differences visualized by brain imaging techniques

B. Kettenmann

Expression patterns of T1R3 and various taste perception related genes

M.R. Kim, Y. Kusakabe, H. Miura, Y. Shindo and A. Hino

Insights into fat perception using PROP taster status

S.V. Kirkmeyer and B.J. Tepper

Experiments on atopy, non-IG hyperresponsiveness and other susceptibility factors in relation to irritation

S.K. Kjærgaard

A new rapid procedure for the assessment of olfactory threshold with 'Sniffin' Sticks'

G. Kobal, C. Mueller, B. Renner and B. Kettenmann

Collection of chemosensory event-related potentials with real-time stimulus monitoring

T. Kobayakawa, H. Toda, H. Yamada and S. Saito

Olfactory event-related potentials in children

M. Knecht and T. Hummel

The role of enhanced aroma in the acceptance of a snack product among elderly and young

S. Koskinen, N. Kälviäinen, L. Van Mierlo, P. Weijzen and H. Tuorila

Identification of candidate olfactory receptors of the moth *Heliothis virescens*

J. Krieger, K. Raming, Y.M.E. Dewer, S. Bette, S. Conzelmann and H. Breer

Induction of emotions and motivations by odours

M. Krippel

The nature of synergism in monosodium glutamate-inosine 5'-monophosphate mixtures

J.H.A. Kroeze, M.J.M. Theunissen and M.G. Veldhuizen

Chemosensitivity of non-innervated taste bud cells in mouse fungiform papillae

T. Kumazawa, T. Matsumoto, K. Eguchi, Y. Ikeda and K. Yoshii

Human genomic variability of normal traits: olfaction as an example

D. Lancet, E. Feldmesser, T. Fuchs, Y. Gilad, R. Gross-Isseroff, M. Khen, O. Man, I. Menashe, Z. Olender and A. Sadovsky-Sadot

Olfaction: an epidemiological study on 1046 subjects

B.N. Landis, R. Giger, A. Morabia, R. Ringgenberg, B. Schilling,
A. Ricchetti, H. Aparicio and J.S. Lacroix

The significance of behavioral analysis of olfactory function, or: there is more to olfaction than genes, second messengers and ion channels!

M. Laska

Metallic taste of ferrous sulfate: a case of retronasal smell and gustatory referral?

H.T. Lawless, S. Schlake and J. Smythe

Odor identification in patients with mild cognitive impairment and Alzheimer's disease

J. Lehrner, J. Maly, P. Dal-Bianco and L. Deecke

T1R taste receptors

X. Li, L. Staszewski, H. Xu and E. Adler

Characterization of voltage-dependent and odor-activated currents in isolated olfactory receptor neurons of sea lampreys (*Petromyzon marinus*)

F.W. Lischka, W. Li and J.H. Teeter

The influence of training on chemosensory event-related potentials and interactions between the olfactory and trigeminal systems

A. Livermore and T. Hummel

Conditioning of emotional responses to odours

A. Livermore, V. Nightingale, A. Hill and D. Thomson

CO₂ stimuli delivered to the nasal mucosa: thresholds and just noticeable differences at different stimulus durations

J. Loetsch, R. Marchl, T. Hummel and G. Kobal

The relationship between food preferences, stress, introversion and taster status

M. Longo and T. White

Electronic sensing in the pharmaceutical, food, beverage and cosmetic industries

Q. Lucas, T.T. Tan, J.C. Mifsud and C. Maassen

Lingual somatosensory and taste interactions: simultaneous recordings of the chorda tympani (VIIth) and trigeminal (Vth) nerves of the hamster

O. Lugaz, A.-M. Pillias, M. Rogeaux, N. Boireau and A. Faurion

Psychological effects of subthreshold exposure of 4,16-androstadien-3-one on women

J.N. Lundstrom and M.J. Olsson

Early discrimination of odour hedonics in preterm newborns

L. Marlier, C. Gaugler, R. Soussignan, J. Messer and B. Schaal

Fat taste and metabolism in humans

R.D. Mattes

PROP taster status: dietary modifier, marker or misleader?

R.D. Mattes

Stimulus response functions of avian olfactory bulb neurons

D.E.F. McKeegan

Response characteristics of avian nasal trigeminal nociceptors

D.E.F. McKeegan

Segregating pseudogenes: the genetic basis of human olfactory variability

I. Menashe, Y. Gilad, O. Man and D. Lancet

Sensitivity for capsaicin inhalation

E. Millqvist

Applications and limitations of electronic noses

J. Mitrovics and H. Ulmer

Gustatory evoked cortical activity in humans studied by simultaneous recording of EEGs and MEGs

C. Mizoguchi, T. Kobayakawa, S. Saito and H. Ogawa

Detection mechanism of MSG and 5'-GMP in mouse non-dissociated taste receptor cells

T. Miyamoto, T. Miyazaki, Y. Okada, M. Kimoto and K. Toda

Synapses among mouse taste bud cells

M. Miyajima, R. Hayato, T. Kitabori, Y. Higure, Y. Ohtubo, T. Kumazawa and K. Yoshii

Incidental and intentional memory for uncommon odors in young and elderly subjects

P. Møller, C. Wulff and E.P. Köster

Targeting olfaction

P. Mombaerts

Sensory memory and food perception

J. Mojet and E.P. Köster

In search of the exocrine origin(s) of the rabbit mammary pheromone

A.S. Moncomble, B. Schaal, B. Quenede, A. Quenede, G. Coureaud, R. Brossut, D. Langlois and G. Perrier

Candidate bitter and sweet receptors in human and mouse

J.-P. Montmayeur, H. Matsunami, S.D. Liberles and L.B. Buck

Amygdala activation in rats exposed to urinary pheromones

C. Mucignat and L. Della Corte

Urinary pheromones modulate mice aggressive behaviour

C. Mucignat-Caretta and A. Caretta

Olfactory function in idiopathic Parkinson's syndrome: long-term follow-up of de-novo IPS patients

A. Müller, H. Reichmann, A. Livermore and T. Hummel

A new clinical procedure for the quantitative assessment of gustatory function

C. Müller, S. Kallert, B. Renner, K. Stiasny, A.F.P. Temmel and G. Kobal

Affinity for odorants and acidic conformational changes of a rat odorant-binding protein

C. Nespoulous, L. Briand and J.C. Pernollet

Organization of glomeruli in the main olfactory bulb of *Xenopus laevis* tadpoles

L.P. Nezlín, S. Heermann, D. Schild and W. Rössler

Relationship of PROP status to bitterness sensitivity

A.C. Noble and E. Cubero-Castillo

Epidemiological aspects of olfactory disorders

S. Nordin, A. Brämerson and M. Bende

Leptin suppresses mouse behavioral responses to sweet stimuli through its peripheral functional receptors in taste cells

R. Ohta, N. Shigemura, K. Koyano, K. Nakshima and Y. Ninomiya

A procedure to measure olfactory repetition priming

M.J. Olsson and J. Willander

Do men and women respond differently to repeated olfactory or trigeminal stimuli?

O. Opatz and T. Hummel

Orthonasal versus retronasal olfaction—a comparison of two olfactory tests

S. Pabinger, A.F.P. Temmel, B. Renner and G. Kobal

Electrophysiological characterization of P2X-receptors in cultured rat trigeminal neurons

J. Paul, H. Hatt and C.H. Wetzel

Effects of stimulus significance and stimulus probability on the olfactory event-related potential: visualization by cortical maps

B.M. Pause and J. Laudien

The role of major urinary proteins and low molecular weight components of male mouse urine in eliciting the pregnancy block effect in female mice

P. Peele and P.A. Brennan

Functional anatomy of the task of odor familiarity judgement: influence of handedness

J. Plailly, M. Bensafi, M. Pachot, C. Delon-Martin, C. Rouby, C. Segebarth and J.P. Royet

Psychophysical properties of mechanical oral irritation

J. Prescott and S. Walker

PROP sensitivity and oral trigeminal responses

J. Prescott, L.M. Bartoshuk and J. Prutkin

Pheromone binding proteins contribute to the excitation of olfactory receptor cells in moths

B. Pophof

Spontaneous and odor evoked neural population activity in the antennal lobe of the honeybee

C. Pouzat

Expression of $\text{Na}^+/\text{Ca}^{2+}/(\text{K}^+)$ exchangers in olfactory receptor neurons (ORNs)

M. Pyrski, J. Margolis, S. Polumuri, G. Bell, A. Ruknudin, D. Schulze and F. Margolis

Intensity based cognitive clue enables lateralization of a pure odor

T. Radil and C.J. Wysocki

Assessment of different methods for PROP status classification

K. Rankin, N. Godinot, B.J. Tepper, S.V. Kirkmeyer and C.M. Christensen

Human PROP insensitivity is not accounted for by single nucleotide polymorphisms in the putative bitter receptors TAS2R3, TAS2R4 and TAS2R5.

D.R. Reed, K.J. Mascoli, S. Obenrader, L.M. Bartoshuk and V. Duffy

Heritability estimates for intensity ratings of sucrose and saccharin in human families

D.R. Reed, K.J. Mascioli, C. Sharp and P.A.S. Breslin

Transduction of acid stimuli in primary chemosensory neurons

P.W. Reeh

Simultaneous measurement of nasal airway resistance by posterior rhinomanometry and forced oscillation

J. Rigau, R. Farre, D. Navajas and D. Shusterman

Diversity of the mammalian vomeronasal receptor gene repertoire

I. Rodriguez

Olfactory priming through nasal inhalation in humans?

K.P. Rogalski, B.M. Pause, B. Sojka and R. Ferstl

Psychophysiological correlates of affects in olfaction

C. Rouby, M. Bensafi and A. Holley

Influence of the cue significance acquired following an olfactory discrimination learning task on Fos expression in the rat piriform cortex

F. Rouillet, F. Liénard, F. Datiche and M. Cattarelli

Functional anatomy of the emotional response to odors: influence of hedonic valence, hedonic judgement, handedness and gender

J.P. Royet, J. Plailly, C. Delon-Martin, D. Kareken and C. Segebarth

Cross-cultural study on umami taste; perception, behavioral response and brain activity

S. Saito, F. Hübener, T. Kobayakawa, M. Laska and N. Gotow

Behavioral and neural mechanisms involved in odor-taste association in rats and humans

N. Sakai, T. Kobayakawa, S. Imada and S Saito

Exploring the brain areas activated during evaluating pleasant-unpleasant of odors with fMRI

N. Sakai, A. Takahashi, T. Kobayakawa, Y. Yamauchi, S. Imada and S. Saito

Smelling of odorous sex hormone-like compounds causes sex-differentiated hypothalamic activations

I. Savic

Developmental pattern of peptide-immunoreactivity in the metamorphosing antennal lobe of the sphinx moth *Manduca sexta*

J. Schachtner, W. D'Hanis and B. Trosowski

Associative olfactory learning in individually assayed *Drosophila* larvae

S. Scherer, R.F. Stocker and B. Gerber

Processing of food cues in patients with eating disorder

C. Schrader, B.M. Pause, B. Sojka and R. Ferstl

Repair and regeneration in the peripheral olfactory system

J.E. Schwob

Effect of olfactory mucosal application of lectins on the odorant response activity of the frog olfactory bulb as measured using the voltage sensitive dye RH414

M. Shah, K.C. Persaud and E.H. Polak

Behavioral and molecular analyses in the dpa (D-phenylalanine sensitivity) congenic strain

N. Shigemura, Y. Kawato, H. Huruta, R. Yoshida and Y. Ninomiya

Blockade of chemical communication by an aromatic environmental pollutant

T. Shiraiwa, and M. Kashiwayanagi

Mechanistic studies of nasal trigeminal reflexes using chlorine gas as a model irritant

D. Shusterman

Olfactory space, receptors and nervous representation of the chemical stimuli

G. Sicard

Suppression of taste by oral irritants

C.T. Simons

Dynamic processing of tastants in gustatory cortex of awake rats

S.A. Simon, M.A.L. Nicolelis and D.B. Katz

Plasticity in odor-elicited behavior in the moth *Spodoptera littoralis*

M. Sjöholm, P. Anderson, M. Sadek and B.S. Hansson

Connections between the olfactory epithelium and the brain can support olfaction in the absence of the olfactory bulbs

B. Slotnick, E. Pickett and R. Cockerham

Assessment of acute sensory irritation from isopropyl alcohol exposure in humans: a psychotoxicological approach

M.A.M. Smeets and P. Dalton

European odour concentration measurement by dilution olfactometry

R. Sneath

Age-related trends in food preference and intake

D.J. Snyder, V.B. Duffy, H.J. Hoffman, C.W. Ko and L.M. Bartoshuk

Taste and trigeminal inputs interact to produce phantom sensations: clinical implications for supertasters of PROP

D.J. Snyder, V.B. Duffy, M. Grushka, J.F. Kveton and L.M. Bartoshuk

Parkinson's disease as possible cause of 'idiopathic' olfactory dysfunction

U. Sommer, K. Fries, A. Müller, H. Reichmann, J. Frasnelli and T. Hummel

3-Phosphoinositides modulate cyclic nucleotide signaling in olfactory receptor neurons

M. Spehr, C.H. Wetzel, H. Hatt and B.W. Ache

Spatio-temporal dynamics of odor representations in the mammalian olfactory bulb

H. Spors and A. Grinvald

Multisensory mimicry in the dead horse arum

M.C. Stensmyr, I. Urru, I. Collu, A.M. Angioy and B.S. Hansson

Identification of novel natural odor ligands in *Drosophila*

M.C. Stensmyr, E. Giordano, A.M. Angioy and B.S. Hansson

Hyperpolarization-activated channels mediate responses to sour stimuli in a subset of taste cells in the rat vallate papilla

D.R. Stevens

Characteristics of parosmic patients

K. Stiasny, S. Pabinger, B. Schickinger-Fischer, J. Toth and A.F.P. Temmel

The larval olfactory system of *Drosophila*: a simple model system?

R. Stocker, F. Python and J. Colomb

Olfaction in *Drosophila*: peripheral perception and central processing

K. Störtkuhl and B. Hovemann

Correlation between subjective disturbance and olfactory disorders in olfactory impaired patients

T. Stojan, T. Hummel, M. Wolfensberger and A. Welge-Lüssen

Intrinsic organization of the mushroom bodies of *Drosophila melanogaster*

N.J. Strausfeld, I. Vilinsky and I. Sinkevitch

Brain targeting and glomerulus formation of olfactory sensory neurons

J. Strotmann, S. Conzelmann, D. Malun and H. Breer

Impact of intensity and hedonic tone of environmental odours on degree of annoyance: results from field studies

K. Sucker and G. Winneke

Is olfactory mental image sensory-like?

H. Sugiyama, S. Ayabe-Kanamura and T. Kikuchi

Taste responsiveness to 6-*n*-propylthiouracil as a marker for fat intake and obesity: implications for chronic disease risk

B.J. Tepper

ETOC: a short olfactory test culturally validated across Europe

T. Thomas-Danguin, C. Rouby, G. Sicard, M. Vigouroux, S. Barkat, V. Brun, V. Farget, A. Johansson, A. Bengtson, G. Hall, F. Rousseau, J.P. Dumont, W. Ormel, N. Essed, C. De Graaf, S. Gourillon, S. Issanchou, S. Hoyer, F. Zunft, R. Nielsen, S. Koskinen and H. Tuorila

Nasal function and chemoreceptive symptoms during controlled exposure to 2-ethylhexanol

C. van Thriel, E. Kiesswetter, M. Schäper, M. Blaszkewicz, K. Golka and A. Seeber

Sensitivity of the trigeminal sensory system to chemical stimulation with CO₂

N. Thürauf, B. Renner and G. Kobal

Responses of oral mucosal nociceptors to bitter solutions in rats

K. Toda, T. Miyamoto, M. Kimoto, Y. Kumei and Y. Okada

Hypothyreosis: influence on sense of smell before and after therapy

J. Toth, S.S. Kou, C. Quint and A.F.P. Temmel

Discrete depolarizations in hamster vomeronasal neurons in response to aphrodisin

D. Trotier, L. Briand, J.C. Pernollet, J. Azérad, Y. Boucher and K. Døving

Olfactory identification and detection tests in the prediction of odor and flavor intensity ratings in the elderly and young

H. Tuorila and S. Koskinen

Interpapillar functional interactions: a single unit study in the hamster

A. Vandenbeuch, A.-M. Pillias and A. Faurion

The sensitivity to puberty modulating chemosignals changes during postnatal ontogeny in Campbell's hamsters, *Phodopus campbelli*

N.Y. Vasilieva, A.M. Khrouchtchova, M.V. Kuznetsova and R. Apfelbach

Encoding by neurons in the primate orbitofrontal cortex of taste, texture and temperature

J.V. Verhagen, E.T. Rolls and M. Kadohisa

Robot olfaction

P. Verschure

Testing olfactory performances in four European countries: influence of culture

M. Vigouroux, T. Thomas-Danguin, C. Rouby, G. Sicard, V. Farget, W. Ormel, C. De Graaf, A. Johansson, A. Bengtson, G. Hall and T. Hummel

Induced olfactory sensitivity: central mechanisms are involved

V.V. Voznessenskaya and C.J. Wysocki

Representation and processing of odorant information at the level of receptor neuron input to the olfactory bulb

M. Wachowiak, P. Heyward, M.T. Shipley and L.B. Cohen

Relation of PROP tasting to depression and anxiety

C. Walker and A.S. Powers

Different effects of phenyl ethyl alcohol (PEA), H₂S and CO₂ on face encoding and recognition

P. Walla, D. Mayer, B. Hufnagel, G. Lindinger, W. Lang and L. Deecke

Sensory specific satiety caused by high and low fat, sweet and savoury snacks in obese and normal weight women

H. Weenen, H.M. Snoek, L. Huntjens, L.J. van Gemert and C. de Graaf

Centrifugal projections to the olfactory bulb in adult ferrets

E. Weiler, A. Aschoff and R. Apfelbach

Effect of local anesthesia on chemosensory event-related potentials

A. Welge-Lüssen, C. Wille, B. Renner and G. Kobal

Arachidonic acid plays a role in rat vomeronasal signal transduction

C.H. Wetzel, M. Spehr and H. Hatt

Learned associations with smells influence taste naming speed

T. White and J. Prescott

Expression of neurotrophins and their receptors in lingual taste bud fields of hamster after sensory denervation

M.C. Whitehead, M. Verdin-Alcazar, J.R. Ganchrow and D. Ganchrow

Identification and characterization of arrestins in taste cells: possible role in taste signal transduction

P. Widmayer, M. Diefenbacher, I. Boekhoff, S. Conzelmann and H. Breer

The effect of time after kidney transplantation on olfactory and gustatory function

B. Wieser, A.F.P. Temmel and C. Quint

Effects of flavorants on oral texture sensations

R.A. de Wijk, J.F. Prinz, I.A. Polet, J.M. van Doorn and H. Weenen

Influence of flavors on the perception of video clips

C. Wille, M. Ostermann, B. Kettenmann and G. Kobal

Temporal integration in nasal localization of carbon dioxide

P. Wise, T. Radil and C. Wysocki

Time-intensity ratings of nasal irritation from carbon dioxide

P. Wise, T. Radil and C. Wysocki

Immunohistochemistry of the human vomeronasal epithelium

M. Witt and T. Hummel

Recovery of salt-responsive neural systems after crush of the chorda tympani nerve in mice

K. Yasumatsu, H. Kojima, Y. Yokota, H. Katsukawa, T. Sugimura and Y. Ninomiya

NOS-I is expressed in the vomeronasal organ during prenatal development

C. Zancanaro, F. Merigo, C. Mucignat-Caretta and A. Cavaggioni

Trigeminal nociception in the dura—role of ATP and CGRP release

K. Zimmermann, B. Averbeck and P.W. Reeh

VNO pheromone transduction analyzed in genetically altered mice

F. Zufall
