
Quarterly Reviews

No 3 Vol 21 1967

	Page
The Chemistry of Arthropod Defensive Substances By John Weatherston	287
Conformational Abnormalities in Cyclohexane Chemistry By D. L. Robinson and D. W. Theobald	314
Sesquiterpene Biogenesis By W. Parker, J. S. Roberts and R. Ramage	331
Heterocyclic Conformational Analysis By F. G. Riddell	364
Mechanism of Enzyme Action By S. G. Waley	379
Light-induced Reactions of Quinones By J. Malcolm Bruce	405

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W.1. Such preliminary communications should be accompanied by an outline of the ground to be covered rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum
