DOSE

DICTIONARY OF SUBSTANCES AND THEIR EFFECTS

Dictionary of Substances and their Effects (DOSE) is a new, unique, user-friendly guide to 5,000 chemicals and the impact they have on life forms and the environment across the globe.

Compiled with the aid of official lists from the EC, UK, USA and Canada, **DOSE** comes in seven alphabetical volumes, each containing an index of chemical names, CAS registry numbers and molecular formulae, as well as a glossary of biological organisms. A separate volume containing cumulative indices of all volumes is also available.

DOSE LISTS EACH CHEMICAL'S:

- **IDENTIFIERS**
- **OCCUPATIONAL EXPOSURE**
- **STATUS IN LEGISLATION WORLDWIDE**
- **EFFECTS ON SEWERAGE WORKS PROCESSES**
- **USES**
- **ECOTOXICITY**
- **MAMMALIAN TOXICITY**
- **PHYSICAL PROPERTIES**

DOSE enables the user to make rapid hazard assessments of chemicals, facilitating risk assessment and further action. Such a store of information is of critical importance to scientists, environmentalists, industry professionals, regulators and researchers - indeed anyone affected by or concerned about chemicals and their potential effects on the environment the world over.

Container Molecules and their Guests

By Donald J. Cram and Jane M. Cram, *University of California*

Monographs in Supramolecular Chemistry - Series Editor: J. Fraser Stoddart, FRS, *University of Birmingham, UK*

This volume covers the evolution of host-guest complexation chemistry in the minds and hands of Nobel Prize winner Donald Cram and his co-workers at UCLA, over the 25-year period from 1970-1994. It deals with the fundamental principles and objectives that govern this rapidly developing subject and illustrates the emergence of a new field of biomimetic chemistry. The book demonstrates how a number of techniques, such as molecular modeling, synthesis, crystal structure, NMR solution structure and mass spectral structure determinations can be combined to develop a new branch of organic chemistry. It discusses the chemistry of completely new families of complexes - the carceplexes, hemicarceplexes and velcralexes - and reviews for the first time the uses of the interiors of hemicarceplexes as a new phase for carrying out chemical reactions and for protecting unstable species. Many will be inspired by the wonderful achievements that Cram and his team have made in this exciting branch of supramolecular chemistry.

Hardcover **xiv + 224 pages** **ISBN 0 85186 972 6** **1994** **Price £49.50**

Medicinal Chemistry: Principles and Practice

Edited by Frank D. King, *SmithKline Beecham Pharmaceuticals, Harlow, UK*

This book introduces the principles and practices of modern medicinal chemistry and covers all aspects of drug discovery from the initial lead to final development. It teaches how to convert a lead compound into a potential drug and provides recent case histories as examples of successes.

Medicinal Chemistry: Principles and Practice is unique in dealing with the subject in such a practical way and is the only book currently available to bring together all areas of the subject in one volume. This breadth of coverage is supplemented by references to specialist monographs and reviews, where the reader can find more detail on specific topics of interest if required.

Softcover **Approx 340 pages** **ISBN 0 85186 494 5** **1994** **Price £39.50**

Ref No 238

Amino Acids, Peptides and Proteins - Volume 25

Senior Reporter J.S. Davies, *University College of Swansea*

Formerly entitled Amino Acids and Peptides, this new volume provides a review of the literature published during 1992.

Contents: Amino Acids; Peptide Synthesis; Analogue and Conformational Studies on Peptide Hormones and Other Biologically Active Peptides; Cyclic, Modified, and Conjugated Peptides; Current Trends in Protein Research; Metal Complexes of Amino Acids and Peptides.

Specialist Periodical Report **Hardcover** **xiv + 410 pages** **ISBN 0 85186 234 9** **1994** **Price £110.00**

Ref No 185

Biotransformations: A Survey of the Biotransformations of Drugs and Chemicals in Animals - Volume 6

Edited by David R. Hawkins, *Huntingdon Research Centre Ltd*

Now in its sixth outstanding volume, **Biotransformations** has become established as a unique and important source for those involved in the discovery and development of new compounds. It now broadly covers the scientific literature for the period 1987 to 1992. The series provides a ready way of accessing information on the known pathways for the biotransformation of structurally-related compounds. Key functional groups provide an index-related procedure for retrieving information on compounds of interest. A further index allows the retrieval of examples of specific biochemical reactions which may have wider application.

Hardcover **xxxii + 412 pages** **ISBN 0 85186 127 X** **1994** **Price £130.00**

To order please contact:

The Royal Society of Chemistry, Turpin Distribution Services Limited, Blackhorse Road, Letchworth, Herts SG6 1HN, United Kingdom.
Telephone: +44 (0) 1462 672555. Fax: +44 (0) 1462 480947. Telex: 825372.
Please quote your credit card details. We can now accept Access/Visa/Mastercard/EuroCard.

Turpin Distribution Services Limited is wholly owned by The Royal Society of Chemistry.
