

## Subject Index of Volume 112

- Adsorption kinetics  
Kinetics and thermodynamics of the organic dye adsorption on the mesoporous hybrid xerogel, 227
- Adsorption thermodynamic parameters  
Thermodynamics of adsorption of hydrocarbons on molecular sieves NaY and CaY by inverse gas chromatography, 159
- Adsorption thermodynamics  
Kinetics and thermodynamics of the organic dye adsorption on the mesoporous hybrid xerogel, 227
- Airlift bioreactors  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Alkylation  
Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109
- 4-Aminopyridine  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167
- Analytical redundancy  
Observer-based fault diagnosis in chemical plants, 93
- Aromatic ring degradation  
Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing TiO<sub>2</sub> as a photocatalyst, 191
- Artificial intelligent  
A knowledge-based pattern recognition approach for the prediction of bubble size distribution in Newtonian fluids at high pressure, 131
- Azo dye  
Optimal decolorization efficiency of Reactive Red 239 by UV/TiO<sub>2</sub> photocatalytic process coupled with response surface methodology, 173
- Bio-desulfurization  
Bio-desulfurization of model organo-sulfur compounds and hydrotreated diesel—Experiments and modeling, 145
- Biosorption  
The biosorption of Acid Red 337 and Acid Blue 324 on *Enteromorpha prolifera*: The application of nonlinear regression analysis to dye biosorption, 181
- Brilliant blue FCF  
Kinetics and thermodynamics of the organic dye adsorption on the mesoporous hybrid xerogel, 227
- Bubble size distribution  
A knowledge-based pattern recognition approach for the prediction of bubble size distribution in Newtonian fluids at high pressure, 131
- Carbon formation  
Synthesis gas production from dry reforming of methane over CeO<sub>2</sub> doped Ni/Al<sub>2</sub>O<sub>3</sub>: Influence of the doping ceria on the resistance toward carbon formation, 13
- Central composite design  
Optimal decolorization efficiency of Reactive Red 239 by UV/TiO<sub>2</sub> photocatalytic process coupled with response surface methodology, 173
- CeO<sub>2</sub>  
Synthesis gas production from dry reforming of methane over CeO<sub>2</sub> doped Ni/Al<sub>2</sub>O<sub>3</sub>: Influence of the doping ceria on the resistance toward carbon formation, 13
- Chelating resins  
Ion-exchange equilibria of Cu(II) and Zn(II) from aqueous solutions with Chelex 100 and Amberlite IRC 748 resins, 211
- Cluster  
Flow structures in the downer circulating fluidized bed, 23
- Compartment model  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Composite membrane  
Preparation and evaluation of a novel self-humidifying Pt/PFSA composite membrane for PEM fuel cell, 87
- Computational fluid dynamics  
An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197
- Copper complex  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167
- Copper  
Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153
- Cu(II)  
Ion-exchange equilibria of Cu(II) and Zn(II) from aqueous solutions with Chelex 100 and Amberlite IRC 748 resins, 211
- Decolorization  
Optimal decolorization efficiency of Reactive Red 239 by UV/TiO<sub>2</sub> photocatalytic process coupled with response surface methodology, 173  
Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing TiO<sub>2</sub> as a photocatalyst, 191
- Diffusion  
Membranes for solubility-based gas separation applications, 219
- Digital particle image velocimetry  
An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197
- 2,2'-Dipyridylamine  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167

- Direct Red 80  
Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing  $\text{TiO}_2$  as a photocatalyst, 191
- Dispersion coefficient  
Mixing mechanism in a modified co-current downflow bubble column, 45
- Downer  
Flow structures in the downer circulating fluidized bed, 23
- Downflow bubble column  
Mixing mechanism in a modified co-current downflow bubble column, 45
- Dry reforming  
Synthesis gas production from dry reforming of methane over  $\text{CeO}_2$  doped  $\text{Ni}/\text{Al}_2\text{O}_3$ : Influence of the doping ceria on the resistance toward carbon formation, 13
- Equilibrium studies  
Ion-exchange equilibria of  $\text{Cu}(\text{II})$  and  $\text{Zn}(\text{II})$  from aqueous solutions with Chelex 100 and Amberlite IRC 748 resins, 211
- ESR  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167
- Ethanol reforming  
Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153
- Extended Kalman filter  
A new approach to real time optimization of the Tennessee Eastman challenge problem, 33
- Fault diagnosis  
Observer-based fault diagnosis in chemical plants, 93
- Fixed bed photocatalytic reactor  
Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing  $\text{TiO}_2$  as a photocatalyst, 191
- Flow structure  
Flow structures in the downer circulating fluidized bed, 23
- Fluid catalytic cracking unit  
Observer-based fault diagnosis in chemical plants, 93
- Fly ash  
Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109
- Forced circulation loop reactor  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Fuel cell  
Preparation and evaluation of a novel self-humidifying  $\text{Pt}/\text{PFSA}$  composite membrane for PEM fuel cell, 87
- Fuzzy logic  
A knowledge-based pattern recognition approach for the prediction of bubble size distribution in Newtonian fluids at high pressure, 131
- Gas and vapor permeation  
Membranes for solubility-based gas separation applications, 219
- Gas–liquid mass transfer  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Genetic algorithm  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Growth kinetics  
Bio-desulfurization of model organo-sulfur compounds and hydrotreated diesel—Experiments and modeling, 145
- Hip joint material  
Wear of artificial hip joint material, 137
- Hydrogen production  
Kinetic and modelling study of methane steam reforming over sulfide nickel catalyst on a gamma alumina support, 1
- Hydrogen  
Synthesis gas production from dry reforming of methane over  $\text{CeO}_2$  doped  $\text{Ni}/\text{Al}_2\text{O}_3$ : Influence of the doping ceria on the resistance toward carbon formation, 13  
The effect of diffusion direction on the permeation rate of hydrogen in palladium composite membranes, 81  
Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153
- Hydrolysis  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Hydrotreated diesel  
Bio-desulfurization of model organo-sulfur compounds and hydrotreated diesel—Experiments and modeling, 145
- Inorganic exchanger  
Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153
- Intercell exchange velocity  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Inverse gas chromatography  
Thermodynamics of adsorption of hydrocarbons on molecular sieves  $\text{NaY}$  and  $\text{CaY}$  by inverse gas chromatography, 159
- Ion exchange  
Ion-exchange equilibria of  $\text{Cu}(\text{II})$  and  $\text{Zn}(\text{II})$  from aqueous solutions with Chelex 100 and Amberlite IRC 748 resins, 211
- Isotherm  
The biosorption of Acid Red 337 and Acid Blue 324 on *Enteromorpha prolifera*: The application of nonlinear regression analysis to dye biosorption, 181
- Jet loop reactors  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Kinetics  
Kinetic and modelling study of methane steam reforming over sulfide nickel catalyst on a gamma alumina support, 1  
Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109
- Lignin  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167
- Liquid jet  
Mixing mechanism in a modified co-current downflow bubble column, 45
- Longitudinal dispersion coefficient  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Membrane  
Membranes for solubility-based gas separation applications, 219
- Mesoporous hybrid xerogel  
Kinetics and thermodynamics of the organic dye adsorption on the mesoporous hybrid xerogel, 227
- Methane  
Kinetic and modelling study of methane steam reforming over sulfide nickel catalyst on a gamma alumina support, 1
- Methyl acetate  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57

- Mixing time  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Model predictive control  
Observer-based fault diagnosis in chemical plants, 93
- Modelling  
Kinetic and modelling study of methane steam reforming over sulfide nickel catalyst on a gamma alumina support, 1
- Molecular sieve CaY  
Thermodynamics of adsorption of hydrocarbons on molecular sieves NaY and CaY by inverse gas chromatography, 159
- Molecular sieve NaY  
Thermodynamics of adsorption of hydrocarbons on molecular sieves NaY and CaY by inverse gas chromatography, 159
- Moving bed reactor  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Multifunctional reactor  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Multi-objective optimization  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Newtonian fluids and non-Newtonian fluids  
An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197
- Nickel  
Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153
- Nonlinear regression  
The biosorption of Acid Red 337 and Acid Blue 324 on *Enteromorpha prolifera*: The application of nonlinear regression analysis to dye biosorption, 181
- Organo-sulfur compounds  
Bio-desulfurization of model organo-sulfur compounds and hydrotreated diesel—Experiments and modeling, 145
- Oscillatory baffled column  
An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197
- Oxygen transfer  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Palladium membranes  
The effect of diffusion direction on the permeation rate of hydrogen in palladium composite membranes, 81
- Pareto  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Pattern recognition  
A knowledge-based pattern recognition approach for the prediction of bubble size distribution in Newtonian fluids at high pressure, 131
- PEEK  
Wear of artificial hip joint material, 137
- PEM  
Preparation and evaluation of a novel self-humidifying Pt/PFSA composite membrane for PEM fuel cell, 87
- Permeation direction  
The effect of diffusion direction on the permeation rate of hydrogen in palladium composite membranes, 81
- Phenol  
Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109
- Photocatalytic  
Optimal decolorization efficiency of Reactive Red 239 by UV/TiO<sub>2</sub> photocatalytic process coupled with response surface methodology, 173
- Polymerization process  
Observer-based fault diagnosis in chemical plants, 93
- Power consumption  
Gas–liquid mass transfer in a novel forced circulation loop reactor, 73
- Pseudo-second order kinetics  
The biosorption of Acid Red 337 and Acid Blue 324 on *Enteromorpha prolifera*: The application of nonlinear regression analysis to dye biosorption, 181
- Pt  
Preparation and evaluation of a novel self-humidifying Pt/PFSA composite membrane for PEM fuel cell, 87
- Pulp bleaching  
Pulp bleaching by hydrogen peroxide activated with copper 2,2'-dipyridylamine and 4-aminopyridine complexes, 167
- Real time optimization  
A new approach to real time optimization of the Tennessee Eastman challenge problem, 33
- Response surface methodology  
Optimal decolorization efficiency of Reactive Red 239 by UV/TiO<sub>2</sub> photocatalytic process coupled with response surface methodology, 173
- RTD  
Mixing mechanism in a modified co-current downflow bubble column, 45
- Sectionalized bubble column  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Self-humidifying  
Preparation and evaluation of a novel self-humidifying Pt/PFSA composite membrane for PEM fuel cell, 87
- SMBR  
Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57
- Solubility-based gas separation  
Membranes for solubility-based gas separation applications, 219
- Sparger plate  
Effect of internals and sparger design on mixing behavior in sectionalized bubble column, 117
- Steam reforming  
Kinetic and modelling study of methane steam reforming over sulfide nickel catalyst on a gamma alumina support, 1
- Supervisory control  
A new approach to real time optimization of the Tennessee Eastman challenge problem, 33
- Surface energy  
Thermodynamics of adsorption of hydrocarbons on molecular sieves NaY and CaY by inverse gas chromatography, 159
- Synthesis gas  
Synthesis gas production from dry reforming of methane over CeO<sub>2</sub> doped Ni/Al<sub>2</sub>O<sub>3</sub>: Influence of the doping ceria on the resistance toward carbon formation, 13
- Tennessee Eastman  
A new approach to real time optimization of the Tennessee Eastman challenge problem, 33
- tert*-Butyl alcohol  
Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109

## Textile wastewater

Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing  $\text{TiO}_2$  as a photocatalyst, 191

## UHMWPE

Wear of artificial hip joint material, 137

## Unknown input observers

Observer-based fault diagnosis in chemical plants, 93

UV/ $\text{TiO}_2$ / $\text{H}_2\text{O}_2$  process

Decolorization and aromatic ring degradation kinetics of Direct Red 80 by UV oxidation in the presence of hydrogen peroxide utilizing  $\text{TiO}_2$  as a photocatalyst, 191

## Varicol

Optimization of reactive simulated moving bed and Varicol systems for hydrolysis of methyl acetate, 57

## Velocity vector maps

An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197

## Viscosity

An investigation of the effect of viscosity on mixing in an oscillatory baffled column using digital particle image velocimetry and computational fluid dynamics simulation, 197

## Weber–Morris model

The biosorption of Acid Red 337 and Acid Blue 324 on *Enteromorpha prolifera*: The application of nonlinear regression analysis to dye biosorption, 181

## Zeolite X

Kinetics of batch alkylation of phenol with *tert*-butyl alcohol over a catalyst synthesized from coal fly ash, 109

## Zirconia microspheres

Preparation and evaluation of zirconia microspheres as inorganic exchanger in adsorption of copper and nickel ions and as catalyst in hydrogen production from bioethanol, 153

## Zn(II)

Ion-exchange equilibria of Cu(II) and Zn(II) from aqueous solutions with Chelex 100 and Amberlite IRC 748 resins, 211
