Metal Complexes with Tetrapyrrole Ligands, LVIII

Zirconium(IV) and Hafnium(IV) Bisporphyrinate Double Deckers: Synthesis, Spectra, Redox Potentials, and Structure

J. W. Buchler*, A. De Cian, J. Fischer, P. Hammerschmitt, R. Weiss

Chem. Ber. **1991**, *124*, 1051–1058

In Table 7 of the original article showing the crystallographic data of $\text{Zr}(\text{TPP})_2$, the lattice constant c of the unit cell of this compound was erroneously given as 1244.9(2) pm. The correct value is $c = 1868.8(4)$ pm.
