In the paper by P. Espinet et al., the intermolecular  $F_{ortho} \cdots F_{meta}$  distance given was incorrect. The correct distance is 2.869 Å, which still corresponds to a short F...F contact, as supported by theoretical calculations in progress by C. F. Matta, N. Castillo, and R. J. Boyd. This mistake does not affect the discussion and conclusions of the paper, except for the casual statement made that it was the shortest  $F_{ortho} \cdots F_{meta}$  intermolecular distance reported so far, which is not the case. The authors apologize for this error.
