**S. Skoulika,\* P. Dallas, M. Siskos, Y. Deligiannakis, and A. Michaelides:** Crystal Structure and Solid-State Reactivity of a Cd(II) Polymeric Complex with Acetylenedicarboxylic Acid

Please note the following correction to this article (*Chem. Mater.* **2003**, *15*, 4576–4582). The crystal structure of the titled compound has been reported previously by Ruschewitz et al. (*Acta Crystallogr.* **2002**, *C58*, m483–m484), but, due to an oversight on our part, it was not cited in our paper. However, in this work salient aspects of the structure (microporosity, water structure, short contacts between carbon–carbon triple bonds) were not reported. The consequence of the packing on the properties and solid-state reactivity of the material is the main object of our work.
