

**Surfaces and Interfaces in Polymers
and Composites**

European Physical Society Conference
on Macromolecular Physics

June 1st–6th, 1997
Lausanne, Switzerland

This conference will bring together academic and industrial scientists, practising engineers and students, for an interdisciplinary discussion on surfaces and interfaces in polymers and composites. It features 26 invited lectures by world-renowned figures

in the field of polymer science, and over 50 selected papers, together with an extensive poster session. The conference has been organised in honour of Prof. H.-H. Kausch, who will retire from his longstanding and successful position at the EPFL in 1998.

Topics:

- Principles of Polymer Modification
- Interfaces in Polymer Composites
- Wetting and Surface Treatment
- Micro- and Nanomechanics
- Physical Interactions at Surfaces

- Welding and Fracture
- Structures in Polymer Interfaces
- Molecular Dynamics
