Research in Asia is gaining rapidly in strength. To reflect this important development, the Editors of *Colloid and Polymer Science* and Springer have decided to establish a Regional Editor for China. It was our good fortune to be able to find a well-known scientist for this task, Prof. Jinfeng Dong.

Prof. Dong studied Chemical Engineering at Taiyuan University of Technology and she worked as a chemical engineer in the China Research Institute of Daily Chemical Industry (RIDCI). From 1995–1999 she earned her Ph.D. at the School of Chemistry at Hull University, UK; afterwards she worked as a Research Fellow at the School of Environmental Science and Technology at the University of Greenwich. Since 2003, Mrs. Dong has been Professor of Chemistry at Wuhan University with special emphasis on Colloid and Interface Science.

The Editors and Regional Editors of *Colloid and Polymer Science* and Springer Verlag look forward to collaborating with her.
