

Contemporary Organic Synthesis

A journal of current developments in Organic Synthesis

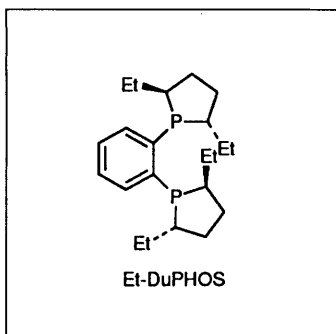

VOLUME 2 NUMBER 6

CONTENTS

Dispiroketal: A new functional group 365
for organic synthesis

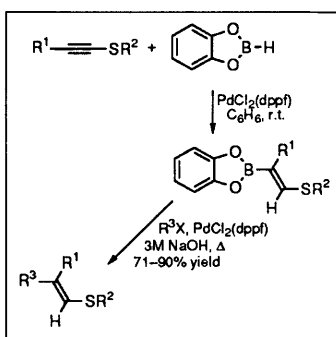

By Steven V. Ley, Robert Downham,
Paul J. Edwards, Jean E. Innes and
Martin Woods

Methods for the asymmetric preparation 393
of amines

By Anders Johansson

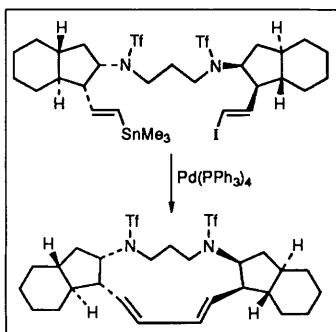

*Reviewing the literature published up to
January 1995*

Synthesis of thiols, sulfides, sulfoxides 409
and sulfones

By Christopher M. Rayner

*Reviewing the literature published between
October 1993 and February 1995*

Saturated and unsaturated hydrocarbons 441

By Richard P. C. Cousins

*Reviewing the literature published between
September 1993 and December 1994*

Cumulative Contents of Volume 2

Number 1

- 1 Aromatic heterocycles as intermediates in natural product synthesis (*up to the end of 1993*) **Michael Shipman**
- 19 The hydrometallation, carbometallation, and metallometallation of heteroalkynes (*up to August 1994*)
Sharon Casson and Philip Kocienski
- 35 Serotonin, sumatriptan, and the management of migraine **Alexander Oxford**
- 43 Stoichiometric organotransition metal complexes in organic synthesis (*1 September 1993 to 31 August 1994*) **Julian Blagg**

Number 2

- 65 Catalytic applications of transition metals in organic synthesis (*1 September 1993 to 31 August 1994*) **Christopher G. Frost and Jonathan M. J. Williams**
- 85 Organic halides (*1 July 1993 to 30 June 1994*) **Peter L. Spargo**
- 107 Carboxylic acids and esters (*1 January 1993 to 31 July 1994*) **T. Harrison and T. Laduwahetty**
- 121 Hypervalent iodine in organic synthesis: α -functionalization of carbonyl compounds (*up to February 1995*) **Om Prakash, Neena Saini, Madan P. Tanwar, and M. Moriarty**

Number 3

- 133 Saturated and unsaturated lactones (*1 January 1993 to 31 July 1994*) **T. Laduwahetty**
- 151 Aldehydes and ketones (*July 1993 to September 1994*) **Patrick G. Steel**
- 173 α -Cation equivalents of amino acids (*up to the end of 1994*) **Patrick D. Bailey, Andrew N. Boa, and Joanne Clayson**
- 189 Saturated oxygen heterocycles (*1 April 1993 to 30 September 1994*) **Christopher J. Burns**

Number 4

- 209 Saturated nitrogen heterocycles (*June 1993 to December 1994*) **Timothy Harrison**
- 225 Synthesis and use of cyclic peroxides (*January 1992 to January 1993*) **K. J. McCullough**
- 251 Recent advances in organofluorine chemistry (*January 1992 to April 1995*) **Jonathan M. Percy**
- 269 Amines and amides (*1994*) **Michael North**

Number 5

- 289 Synthetic developments in host-guest chemistry (*1994*) **James Dowden, Jeremy D. Kilburn, and Paul Wright**
- 315 Protecting groups (*1994*) **Krzysztof Jarowicki and Philip Kocienski**
- 337 Synthesis of aromatic heterocycles (*July 1993 to February 1995*) **Thomas L. Gilchrist**
- 357 Nitro and related compounds (*December 1993 to May 1995*) **Graeme Robertson**

Number 6

- 365 Dispiroketal: A new functional group for organic synthesis **Steven V. Ley, Robert Downham, Paul J. Edwards, Jean E. Innes and Martin Woods**
- 393 Methods for the asymmetric preparation of amines (*up to January 1995*) **Anders Johansson**
- 409 Synthesis of thiols, sulfides, sulfoxides and sulfones (*October 1993 to February 1995*) **Christopher M. Rayner**
- 441 Saturated and unsaturated hydrocarbons (*September 1993 to December 1994*) **Richard P. C. Cousins**

Articles that will appear in forthcoming issues include

Stoichiometric applications of organotransition metal complexes in organic synthesis **Timothy J. Donohoe**
Saturated and partially unsaturated carbocycles **Christopher D. J. Boden and Gerald Pattenden**
The enediyne and dienediyne based antitumour antibiotics, Part I: Methodology and strategies for total synthesis and construction of bioactive analogues **Hervé Lhermitte and David S. Grierson**
Alcohols, ethers and phenols **C. S. Hau, Ashley N. Jarvis and J. B. Sweeney**
The discovery of fluconazole **K. Richardson**
Organic halides **Stephen P. Marsden**
