

Contemporary Organic Synthesis

A journal of current developments in Organic Synthesis

VOLUME 3 NUMBER 2

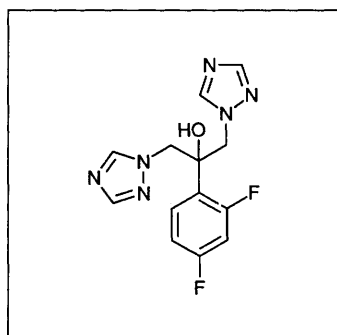

CONTENTS

The enediyne and dienediyne based antitumour antibiotics. Methodology and strategies for total synthesis and construction of bioactive analogues. Part 2

93

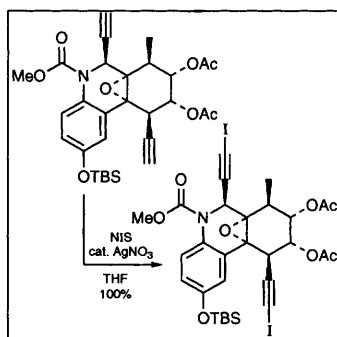

By Hervé Lhermitte and David S. Grierson
Reviewing the literature published up to 15 November 1995

The discovery of fluconazole

125

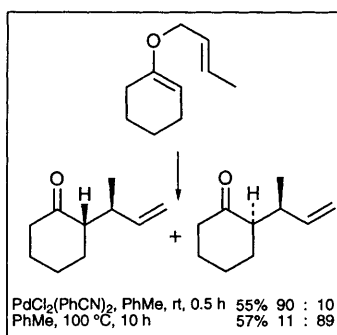

By Ken Richardson
Reviewing the literature published up to December 1994

Organic halides

133

By Stephen P. Marsden
Reviewing the literature published between 1 July 1994 and 30 June 1995

Aldehydes and ketones

151

By Patrick G. Steel
Reviewing the literature published between October 1994 and September 1995

Cumulative Contents of Volume 3

Number 1

- 1 Stoichiometric applications of organotransition metal complexes in organic synthesis (*1 September 1994 to 30 April 1995*) **Timothy J. Donohoe**
- 19 Saturated and partially unsaturated carbocycles (*January 1994 to April 1995*) **Christopher D. J. Boden and Gerald Pattenden**
- 41 The enediyne and dienediyne based antitumour antibiotics. Methodology and strategies for total synthesis and construction of bioactive analogues. Part 1 (*up to 15 October 1995*) **Hervé Lhermitte and David S. Grierson**
- 65 Alcohols, ethers and phenols (*August 1993 to February 1995*) **C. S. Hau, Ashley N. Jarvis and Joseph B. Sweeney**

Number 2

- 93 The enediyne and dienediyne based antitumour antibiotics. Methodology and strategies for total synthesis and construction of bioactive analogues. Part 2 (*up to 15 November 1995*) **Hervé Lhermitte and David S. Grierson**
- 125 The discovery of fluconazole (*up to December 1994*) **Ken Richardson**
- 133 Organic halides (*1 July 1994 to 30 June 1995*) **Stephen P. Marsden**
- 151 Aldehydes and ketones (*October 1994 to September 1995*) **Patrick G. Steel**

Articles that will appear in forthcoming issues include

Recent developments in chemical oligosaccharide synthesis (*up to October 1995*) **Geert-Jan Boons**
Main group organometallics in synthesis (*January 1994 to June 1995*) **Martin Wills**
Saturated oxygen heterocycles (*October 1994 to September 1995*) **Christopher J. Burns and Donald S. Middleton**
Carboxylic acids and esters (*1 August 1994 to 31 July 1995*) **Tammy Ladduwahetty**
Synthetic applications of flash vacuum pyrolysis (*1990 to 1995*) **Hamish McNab**
Catalytic applications of transition metals in organic synthesis (*1 September 1994 to 31 October 1995*) **Graham J. Dawson, Justin F. Bower and Jonathan M. J. Williams**
