

Contemporary Organic Synthesis

A journal of current developments in Organic Synthesis

VOLUME 3 NUMBER 6

CONTENTS

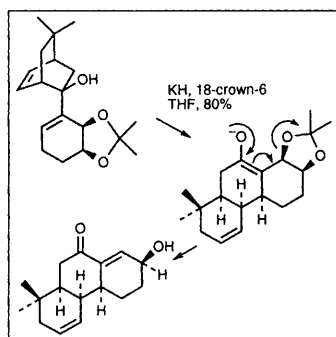

The intramolecular Heck reaction

447

By Susan E. Gibson (née Thomas) and Richard J. Middleton

Reviewing the literature published up to the end of 1995

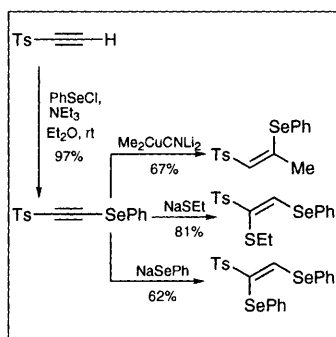

Saturated and partially unsaturated carbocycles

473

By Kevin I. Booker-Milburn and Andrew Sharpe

Reviewing the literature published between May 1995 and April 1996

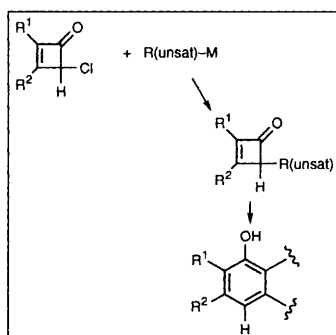

Synthesis of thiols, selenols, sulfides, selenides, sulfoxides, selenoxides, sulfones and selenones

499

By Christopher M. Rayner

Reviewing the literature published between March 1995 and May 1996

The synthesis of carbocyclic aromatic systems

535

By Andrew C. Williams

Reviewing the literature published between 1 January 1992 and 31 December 1995

Cumulative Contents of Volume 3

Number 1

- 1 Stoichiometric applications of organotransition metal complexes in organic synthesis (*1 September 1994 to 30 April 1995*) **Timothy J. Donohoe**
- 19 Saturated and partially unsaturated carbocycles (*January 1994 to April 1995*) **Christopher D. J. Boden and Gerald Pattenden**
- 41 The enediyne and dienediyne based antitumour antibiotics. Methodology and strategies for total synthesis and construction of bioactive analogues. Part 1 (*up to 15 October 1995*) **Hervé Lhermitte and David S. Grierson**
- 65 Alcohols, ethers and phenols (*August 1993 to February 1995*) **C. S. Hau, Ashley N. Jarvis and Joseph B. Sweeney**

Number 2

- 93 The enediyne and dienediyne based antitumour antibiotics. Methodology and strategies for total synthesis and construction of bioactive analogues. Part 2 (*up to 15 November 1995*) **Hervé Lhermitte and David S. Grierson**
- 125 The discovery of fluconazole (*up to December 1994*) **Ken Richardson**
- 133 Organic halides (*1 July 1994 to 30 June 1995*) **Stephen P. Marsden**
- 151 Aldehydes and ketones (*October 1994 to September 1995*) **Patrick G. Steel**

Number 3

- 173 Recent developments in chemical oligosaccharide synthesis (*up to October 1995*) **Geert-Jan Boons**
- 201 Main group organometallics in synthesis (*January 1994 to June 1995*) **Martin Wills**
- 229 Saturated oxygen heterocycles (*October 1994 to September 1995*) **Christopher J. Burns and Donald S. Middleton**
- 243 Carboxylic acids and esters (*1 August 1994 to 31 July 1995*) **Tammy Ladduwahetty**

Number 4

- 259 Saturated nitrogen heterocycles (*1995*) **Timothy Harrison**
- 277 Catalytic applications of transition metals in organic synthesis (*1 September 1994 to 31 October 1995*) **Graham J. Dawson, Justin F. Bower and Jonathan M. J. Williams**
- 295 Saturated and unsaturated lactones (*1 August 1994 to 31 October 1995*) **Ian Collins**
- 323 Amines and amides (*1995*) **Michael North**

Number 5

- 345 Synthetic approaches to rapamycin (*up to August 1995*) **Mark C. Norley**
- 373 Synthetic applications of flash vacuum pyrolysis (*1990 to 1995*) **Hamish McNab**
- 397 Protecting groups (*1995*) **Krzysztof Jarowicki and Philip Kocienski**
- 433 The synthesis of quinones (*1 January 1991 to 31 December 1995*) **Peter T. Gallagher**

Number 6

- 447 The intramolecular Heck reaction (*up to the end of 1995*) **Susan E. Gibson (née Thomas) and Richard J. Middleton**
- 473 Saturated and partially unsaturated carbocycles (*May 1995 to April 1996*) **Kevin I. Booker-Milburn and Andrew Sharpe**
- 499 Synthesis of thiols, selenols, sulfides, selenides, sulfoxides, selenoxides, sulfones and selenones (*March 1995 to May 1996*) **Christopher M. Rayner**
- 535 The synthesis of carbocyclic aromatic systems (*January 1992 to December 1995*) **Andrew C. Williams**

Articles that will appear in forthcoming issues include

Synthetic developments in host–guest chemistry (*January to December 1995*) **Justin J. B. Perry and Jeremy D. Kilburn**

Asymmetric processes (*January 1994 to March 1995*) **Andrew C. Regan**

Saturated and unsaturated hydrocarbons (*January 1995 to May 1996*) **David A. Entwistle**

Applications of stoichiometric organotransition metal complexes in organic synthesis (*May 1995 to April 1996*) **Timothy J. Donohoe, Paul M. Guyo, Peter R. Moore and Clare A. Stevenson**
