|--|--|

Ligands

- The coordination chemistry of carbon dioxide and its relevance for catalysis: a critical survey 257

Metal complexes

- Complexes of heterocyclic thionates. Part 1. Complexes of monodentate and chelating ligands 199

Metal–metal bond lengths

- Reparameterized Herschbach–Laurie empirical relationships between metal–metal distances and force constants applied to homonuclear bi- and polynuclear complexes (M = Cr, Mo, Rh, Pd, Ag, W, Re, Ir, Pt, Au, Hg) 175

Metal–metal stretching frequencies

- Reparameterized Herschbach–Laurie empirical relationships between metal–metal distances and force constants applied to homonuclear bi- and polynuclear complexes (M = Cr, Mo, Rh, Pd, Ag, W, Re, Ir, Pt, Au, Hg) 175

Metal sulfoxide complexes

- Structure and bonding in metal sulfoxide complexes 83

Molecular geometry

- Complexes of heterocyclic thionates. Part 1. Complexes of monodentate and chelating ligands 199

Monodentate ligands

- Complexes of heterocyclic thionates. Part 1. Complexes of monodentate and chelating ligands 199

Mo(W,V)–Cu(Ag)–S(Se) cluster compounds

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Non-linear optical properties

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Photochemical properties

- Transition metal complex exciplexes 57

Photophysical properties

- Transition metal complex exciplexes 57

Preparation

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Reactions

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Reactive sites

- Transition metal complex exciplexes 57

Skeletal structure

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Spectroscopic properties

- Mo(W,V)–Cu(Ag)–S(Se) cluster compounds 25

Transition metal complexes

- Transition metal complex exciplexes 57
- The coordination chemistry of carbon dioxide and its relevance for catalysis: a critical survey 257
