SUBJECT INDEX

Ab initio calculations	Phosphinidene complexes
Heteroatom stabilized carbenium ions 287	Metal element triple bonds of the heavier group 15 elements 271
Anions $t\text{Bu}_3\text{Si}^-$	Pnicogenido complexes
Sterically overloaded supersilylated main group elements and main group element clusters 217	Metal element triple bonds of the heavier group 15 elements 271
Carbenium ions	Preparations
Heteroatom stabilized carbenium ions 287	Heteroatom stabilized carbenium ions 287
Carbocations	PS/PO ligand complexes
Heteroatom stabilized carbenium ions 287	Metal element triple bonds of the heavier group 15 elements 271
Cations $t\text{Bu}_3\text{Si}^+$	Radicals $t\text{Bu}_3\text{Si}^\bullet$
Sterically overloaded supersilylated main group elements and main group element clusters 217	Sterically overloaded supersilylated main group elements and main group element clusters 217
Heteroatoms	
Heteroatom stabilized carbenium ions 287	Sb-group 14 element bond
Isodesmic reactions	Organoantimony compounds with element–element bonds 33
Heteroatom stabilized carbenium ions 287	Sb-group 16 element bond
Laplacians	Organoantimony compounds with element–element bonds 33
Heteroatom stabilized carbenium ions 287	Sb–Sb bond
Metal-group 15 element triple bonds	Organoantimony compounds with element–element bonds 33
Metal element triple bonds of the heavier group 15 elements 271	Stabilization energies
Organo antimony compounds	Heteroatom stabilized carbenium ions 287
Organoantimony compounds with element element bonds 33	

Supersilyl $t\text{Bu}_3\text{Si}$

Sterically overloaded supersilylated main group elements and main group element clusters 217

Supersilylated main group element clusters

Sterically overloaded supersilylated main group elements and main group element clusters 217

Supersilylated main group elements

Sterically overloaded supersilylated main group elements and main group element clusters 217

X-ray structures

Sterically overloaded supersilylated main group elements and main group element clusters 217
