Inorganic Chemistry of the Transition Elements, Volume 5, Specialist Periodical Reports, Senior Reporter, Dr. B.F.G. Johnson, The Chemical Society, London, 1977, Price £29.00 (U.S. \$58.00).

The fifth volume of this outstanding series covers the literature from October 1974 to September 1975. The style and format is similar to previous volumes in the series. It should be noted that the series also includes a chapter on the Lanthanides and Actinides. Worthy of special note in this volume is a section on biological and environmental aspects of zinc, cadmium and mercury by P. Wyeth including over 100 references.
