SUBJECT INDEX

Chiral lanthanide compounds, 243

Group V and VI ligands, thermochemistry of
gaseous transition metal complexes of, 101

Lanthanide compounds, chiral, 243

Lanthanide shift reagents, nuclear magnetic resonance studies of coordination metal complexes using, 83

Ligand-field models and the photochemistry of coordination compounds, 157

Metal atom chemistry, taking out of the cold, 203

Molybdenum hydroxylases, modeling the molybdenum centers of the, 59

Nuclear magnetic resonance studies of the coordination metal complexes using lanthanide shift reagents, 83

Photochemistry of coordination compounds, ligand-field models and the, 157

Thermochemistry of gaseous transition metal complexes of Group V and VI ligands, 101

Ylides, the coordination chemistry of, 1
