

**SCIENTIFIC PUBLICATIONS of
Professor Wayne K. Wilmarth**

- 1 The oxygen-carrying synthetic chelate compounds.
J. Am. Chem. Soc., 68 (1946) 2254–2256.
M. Calvin, R.H. Bailes and W.K. Wilmarth.
- 2 Cycling properties and oxygen production.
J. Am. Chem. Soc., 68 (1946) 2263–2266.
W.K. Wilmarth, S. Aranoff and M. Calvin.
- 3 Equilibrium with the solid compounds.
J. Am. Chem. Soc., 68 (1946) 2273–2278.
E.W. Hughes, W.K. Wilmarth and M. Calvin.
- 4 The para-ortho hydrogen conversion by paramagnetic substances in solution.
J. Chem. Phys., 16 (1948) 425–426.
Yvonne Claeys, C.F. Baes, Jr. and W.K. Wilmarth.
- 5 The hydrogen exchange of alkali amides and hydroxides with deuterium gas.
J. Chem. Phys., 18 (1950) 759.
Yvonne Claeys, J. Dayton and W.K. Wilmarth.
- 6 The magnetic susceptibility of iodine dioxide.
J. Am. Chem. Soc., 72 (1950) 5789–5790.
W.K. Wilmarth and S.S. Dharmatti.
- 7 The catalytic conversion of parahydrogen by paramagnetic complex ions in aqueous solution.
J. Chem. Phys., 20 (1952) 116–121.
W.K. Wilmarth and C.F. Baes, Jr.
- 8 The binuclear peroxo compounds of tri- and tetrapositive cobalt.
J. Phys. Chem., 56 (1952) 5–9.
Lawrence R. Thompson and W.K. Wilmarth.
- 9 Application of the Hammett equation to the dissociation of aromatic free radicals.
J. Chem. Phys., 20 (1952) 748–749.
Newton Schwartz and Wayne K. Wilmarth.
- 10 Magnetic susceptibilities of hydrogenated pyridine and quinoline solutions of cupric and nickelous acetate and salicylaldehyde.
J. Am. Chem. Soc., 74 (1952) 5035–5037.
W.K. Wilmarth, M.K. Barsh and S.S. Dharmatti.

- 11 Conversion of ortho-para hydrogen by cuprous acetate in quinoline. J. Am. Chem. Soc., 75 (1953) 2237-2242.
Wayne K. Wilmarth and Max E. Barsh.
- 12 Mechanism of exchange of hydrogen gas and aqueous alkali. J. Am. Chem. Soc., 75 (1953) 4549-4553.
W.K. Wilmarth, June C. Dayton and J.M. Flournoy.
- 13 Mechanism of the exchange of hydrogen gas with solutions of potassium amide in liquid ammonia. J. Am. Chem. Soc., 75 (1953) 4553-4556.
W.K. Wilmarth and June C. Dayton.
- 14 Application of the Hammett equation to the substituted tetrazane-hydrazyl free-radical system. I. Equilibrium constants. J. Am. Chem. Soc., 77 (1955) 4543-4551.
W.K. Wilmarth and Newton Schwartz.
- 15 Application of the Hammett equation to the substituted tetrazane-hydrazyl radical system. II. Dissociation and recombination rate constants. J. Am. Chem. Soc., 77 (1955) 4551-4557.
W.K. Wilmarth and N. Schwartz.
- 16 Preparation of Cerium by Electrolysis of Molten Salts. U.S.A.E.C., TID-5212 (1955) 14-24; Chem. Abstr., 50 (1956) 8346i.
E.D. Eastman, B.J. Fontana, C.D. Thurmond and W.K. Wilmarth.
- 17 Homogeneous catalytic hydrogenation. V. The kinetics and mechanism of hydrogenation of various cupric salts in quinoline solution. J. Am. Chem. Soc., 78 (1956) 1301-1305.
M. Calvin and W.K. Wilmarth.
- 18 Homogeneous catalytic hydrogenation. VI. The rate law and temperature coefficient for the hydrogenation of cupric acetate. J. Am. Chem. Soc., 78 (1956) 1305-1307.
W.K. Wilmarth and Max K. Barsh.
- 19 Homogeneous catalytic hydrogenation. VII. The rate of hydrogenation of various silver salts in pyridine solution. J. Am. Chem. Soc., 78 (1956) 1308-1311.
W.K. Wilmarth and A.F. Kapauan.
- 20 The structures and properties of the rhodo and erythro complex compounds of chromium. J. Am. Chem. Soc., 78 (1956) 2683-2687.
W.K. Wilmarth, H. Graff and S.T. Gustin.
- 21 The aqueous chemistry of inorganic free radicals. I. The mechanism of the photolytic decomposition of aqueous peroxydisulfate ion and evidence regarding the sulfate-hydroxyl radical interconversion equilibrium. J. Phys. Chem., 63 (1959) 346-353.
Maak-Sang Tsao and W.K. Wilmarth.

- 22 The aqueous chemistry of inorganic free radicals. II. The peroxydisulfate-induced exchange of oxygen atoms between water and molecular oxygen and evidence regarding the acidity constant of the hydroxyl radical.
J. Phys. Chem., 63 (1959) 353–358.
Concetto R. Giuliano, Newton Schwartz and W.K. Wilmarth.
- 23 The sodium salts of tri-1-naphthylboron.
J. Am. Chem. Soc., 81 (1959) 2638–2641.
Carl W. Moeller and W.K. Wilmarth.
- 24 Aqueous chemistry of inorganic free radicals. III. The kinetics and mechanism of the reaction of peroxydisulfate ion and hydrogen peroxide.
Discuss. Faraday Soc., 29 (1960) 137–145.
Maak-Sang Tsao and W.K. Wilmarth.
- 25 Mechanisms of Oxidation by Peroxydisulfate Ion.
Peroxide Reaction Mechanism Conference, Providence, RI.
Interscience, 1960, pp. 175–225.
Wayne K. Wilmarth and Albert Haim.
- 26 Binuclear complex ions. III. Formation of peroxo and cyano bridged complexes by oxidation of the pentacyano complex of cobalt(II).
J. Am. Chem. Soc., 83 (1961) 509–516.
Albert Haim and W.K. Wilmarth.
- 27 Binuclear complex ions. IV. An investigation of the mechanism of oxygenation of the chromium(II) ion in ammoniacal solution using O^{18} labeled oxygen.
J. Am. Chem. Soc., 78 (1961) 516–520.
T.B. Joyner and W.K. Wilmarth.
- 28 The base catalyzed exchange of hydrogen gas and protonic solvents. III. The catalytic efficiency of concentrated aqueous alkali.
J. Am. Chem. Soc., 83 (1961) 2257–2262.
J.J. Flournoy and W.K. Wilmarth.
- 29 Infrared spectroscopic detection of bridging cyanide groups.
J. Inorg. Nucl. Chem., 21 (1961) 33–37.
David A. Dows, Albert Haim and W.K. Wilmarth.
- 30 Pentacyano complexes of cobalt(III). I. Kinetics and mechanism of the substitution of water in $Co(CN)_5OH_2$ by azide and thiocyanate ions and by O^{18} -enriched water.
Inorg. Chem., 1 (1962) 573–582.
Albert Haim and W.K. Wilmarth.
- 31 Pentacyano complexes of cobalt(III). II. Competition of thiocyanate ion and water for the transient intermediate generated in the acid-catalyzed aquation of $Co(CN)_5N_3$.
Inorg. Chem., 1 (1962) 583–586.
Albert Haim and W.K. Wilmarth.

- 32 Aqueous chemistry of inorganic free radicals. IV. Stoichiometry of the reaction of peroxydisulfate ion with hydrogen peroxide and evidence of acidity constant of the HO_2 radical.
Adv. Chem. Ser., 36 (1962) 113–122.
Maak-Sang Tsao and W.K. Wilmarth.
- 33 Aqueous chemistry of inorganic free radicals. V. Carbon monoxide as a scavenger for hydroxyl radicals generated by the photolysis of hydrogen peroxide.
J. Phys. Chem., 67 (1963) 2835–2841.
George Buxton and W.K. Wilmarth.
- 34 Mechanisms of substitution reactions of cobalt(III) cyanide complexes.
Adv. Chem. Ser., 49 (1965) 31–54.
Albert Haim, Robert J. Grassi and Wayne K. Wilmarth.
- 35 The Polarographic and Base-Catalyzed Reduction of Binuclear Co(III,IV) μ -peroxo Complexes.
Proc. Symp. Coord. Chem., Tihany, Hungary, 1964 (1965) 255–264.
H. Graff and W.K. Wilmarth.
- 36 The rate of aquation of the sulfito ligands in $\text{Co(CN)}_4(\text{SO}_3)_2^{5-}$ and $\text{Co(CN)}_5(\text{SO}_3)^{4-}$.
Inorg. Chem., 5 (1966) 1913–1920.
Holly Ho Chen, Maak-Sang Tsao, Richard W. Gaver, P.H. Tewari and W.K. Wilmarth.
- 37 The rate of displacement of H_2O in $\text{Co(CN)}_4(\text{SO}_3)\text{OH}_2^{3-}$ by CN^- and the formation quotient of $\text{Co(CN)}_4(\text{SO}_3)\text{NH}_3^{3-}$ from $\text{Co(CN)}_4(\text{SO}_3)\text{OH}^{4-}$ and NH_3 .
Inorg. Chem., 6 (1967) 611–616.
P.H. Tewari, Richard W. Gaver, H.K. Wilcox and W.K. Wilmarth.
- 38 The pentacyano complexes of cobalt(III). III. Kinetics and mechanism of the substitution of water in $\text{Co(CN)}_5\text{OH}_2^{2-}$ by iodide, triiodide, bromide and chloride ions and aquation of $\text{Co(CN)}_5\text{I}^{3-}$ and $\text{Co(CN)}_5\text{Cl}^{3-}$.
Inorg. Chem., 6 (1967) 237–242.
Robert Grassi, Albert Haim and W.K. Wilmarth.
- 39 The pentacyano complexes of cobalt(III). IV. Kinetics and mechanism of the substitution of water in $\text{Co(CN)}_5\text{OH}_2^{2-}$ by pyridine, ammonia, hydrazine, and hydrazinium ion.
Inorg. Chem., 6 (1967) 243–248.
Robert Barca, John Ellis, Maak-Sang Tsao and W.K. Wilmarth.
- 40 *Trans* Effect and Evidence for Limiting $\text{S}_{\text{N}}1$ Mechanisms in Substitution Reactions of Cobalt(III) Complexes.
U.S.A.E.C., USC-113P4-7, (1967) 10 pp; Chem. Abstr., 69 (1968) 39086g.
P.H. Tewari, Richard W. Gaver, H.K. Wilcox, Hon Gee Tsiang and W.K. Wilmarth.

- 41 Synthesis of potassium isothiocyanatopentacyanocobaltate(III).
Inorg. Chem., 7 (1968) 1250–1253.
Ingo Stotz, W.K. Wilmarth and Albert Haim.
- 42 Rate and equilibrium studies of the displacement of water in *trans*-sulfitoaquo-bis(dimethylglyoximate)cobalt(III) by various nucleophiles.
Inorg. Chem., 7 (1968) 2535–2542.
Hung-Ch'i Chiang and W.K. Wilmarth.
- 43 Aqueous chemistry of inorganic free radicals. VI. Effect of oxygen on the rate of photolysis of hydrogen peroxide in aqueous solution containing carbon monoxide.
J. Phys. Chem., 73 (1969) 867–873.
F.P. Laming, George Buxton and W.K. Wilmarth.
- 44 ESR spectra of the dihalide radical ions in lithium halide gasses.
J. Chem. Phys., 51 (1969) 4166–4167.
Ephraim B. Zvi, Robert A. Beudet and W.K. Wilmarth.
- 45 Substitution kinetics of alkylbis(dimethylglyoximate)aquocobalt(III) in aqueous solution.
J. Am. Chem. Soc., 92 (1970) 2593–2594.
Alvin L. Crumbliss and Wayne K. Wilmarth.
- 46 *Trans* activation and limiting S_N1 mechanisms for substitution reactions of cobalt(III) complexes in aqueous solution.
Inorg. Chim. Acta Rev., 5 (1971) 7–18.
J.E. Byrd and W.K. Wilmarth.
- 47 Kinetics and Mechanism of the Bromotetracyanohydroxophatinate(2 –), Aquabromotetracyanoplatinate(1 –), Dibromotetracyanoplatinate(2 –), and Dichlorotetracyanoplatinate(2 –) Oxidation of Thiosulfate, Thiocyanate, Tetrathionate and Cyanide.
Proc. Int. Conf. Coord. Chem. (16th), Dublin (1974) 3 pp.
Richard Dooly, Y.-T. Fanchiang, J. Byrd and W.K. Wilmarth.
- 48 Oxidation of thiocyanate and iodide by iridium(IV).
Inorg. Chem., 19 (1980) 2715–2722.
David M. Stanbury, Wayne K. Wilmarth, Shada Khalaf, Henry N. Po and James E. Byrd.
- 49 The Pt(CN)₄(OH)Br^{2–} oxidation of S₂O₃^{2–} and S₄O₆^{2–}.
Coord. Chem. Rev., 51 (1983) 125–139.
W.K. Wilmarth, Richard Dooly and J.E. Byrd.
- 50 Kinetics and mechanisms of the reduction of *trans*-tetracyanohydroxobromoplatinate(IV) and its protonated form by some inorganic anions.
Coord. Chem. Rev., 51 (1983) 141–153.
Wayne K. Wilmarth, Y.-T. Fanchiang and James E. Byrd.
- 51 Electron transfer reactions involving simple free radicals.
Coord. Chem. Rev., 51 (1983) 155–179.

Wayne K. Wilmarth, David M. Stanbury, James E. Byrd, Henry N. Po and Chee-Peng Chua.

- 52 Substitution reactions of *trans*-Co(CN)₄(SO₃)(OH₂)³⁻. II. The rate of substitution of coordinated water by ammonia, pyridine, azido, thiocyanato, and sulfito ligands, and the rate of aquation of *trans*-Co(CN)₄(SO₃)NH₃³⁻ and *trans*-Co(CN)₄(SO₃)(py)³⁻.

Coord. Chem. Rev., 51 (1983) 181-208.

Wayne K. Wilmarth, James E. Byrd, Henry N. Po, H.K. Wilcox and P.H. Tewari.

- 53 Substitution reactions of *trans*-Co(CN)₄(SO₃)(OH₂)³⁻. III. The rate of substitution of coordinated water by 4-methylpyridine, 4-acetylpyridine, I⁻, NO₂⁻, CH₃NH₂, HSO₃⁻, and S₂O₃²⁻.

Coord. Chem. Rev., 51 (1983) 209-224.

Wayne K. Wilmarth, James E. Byrd, and Henry N. Po.

- 54 Kinetics and mechanism of base aquation of chloroamminebis(dimethylglyoximate)cobalt(III) and chloropyridinebis(dimethylglyoximate)cobalt(III).

Coord. Chem. Rev., 51 (1983) 225-242.

W.K. Wilmarth, K.R. Ashley, J.C. Harmon, J. Fredericks and A.L. Crumbliss.

- 55 The aqueous chemistry of peroxydisulfate ion. VII. The free radical induced chain hydrogenation.

Coord. Chem. Rev., 51 (1983) 243-265.

W.K. Wilmarth, Newton Schwartz and C.R. Giuliano.
