

## SUBJECT INDEX

- Amine complexes, photoisomerization of rhodium(III), 343
- Aromatic compounds, efficiencies of electron transfer reactions in the quenching of excited rhodium(I) compounds by, 311
- Bis(fulvalene), photochemistry of electron donor-acceptor complexes of, dicobalt mono- and dications, 273
- Carbon dioxide by tris(2,2'-bipyridine)cobalt(I), reduction of, 247
- Cobalt(I) complexes, photogeneration and reactions of, 321
- Copper complexes, exciplex quenching of photo-excited, 83
- Dimanganese and dirhenium decacarbonyls, laser photolysis study on the photo-substitution in, 1
- Dipole-forbidden energy transfer process in solution, 293
- Distance dependence of electron transfer rates, 135
- Donor-acceptor complexes of bis(fulvalene) dicobalt mono- and dications, photochemistry of electron, 273
- Electron transfer at fixed and known distance within protein complexes, long range, 125
- Electron transfer rates, distance dependence of, 135
- Energy transfer process in solution, dipole-forbidden, 293
- Exciplex quenching of photo-excited copper complexes, 83
- Excited state bonding changes and electronic spectra from preresonance Raman spectra, calculation of, 93
- Intervalence excitation, photoredox reactions of mixed-valence compounds induced by, 159
- $M(bpy)_3$  ( $M = Fe, Ru, Os$ ),  $Cr(bpy)_3$ , electron spectroscopy and related compounds, 21
- Metal complexes, photodynamics and electronic structures of, 53
- Metallochlorophylls, photoelectrochemistry of, 207
- Photodynamics and electronic structures of metal complexes, 53
- Photoredox reactions of mixed-valence compounds induced by intervalence excitation, 159
- Polymers and proteins, long distance electron transfer in, 113
- Polymetallic complexes, intramolecular energy transfer in, 261
- Preresonance Raman spectra, calculation of excited state bonding changes and electronic spectra from, 93

- Pressure effects on the photochemical reactions of transition metal complexes, 361
- Protein complexes, long range electron transfer at fixed and known distance within, 125
- Proteins, long distance electron transfer in polymers and, 113
- Redox orbitals, spatially isolated, an update, 65
- Rhodium(I) compounds by aromatic compounds, efficiencies of electron transfer reactions in the quenching of excited, 311
- Rhodium(III) amine complexes, photoisomerization of, 343
- $\text{Ru}(\text{bpy})_3^{2+}$ /methyl viologen/ EDTA photochemical system, solution medium control of the, 175
- Semiconductors with transition metal complexes - a route to the photo-assisted cleavage of water, photosensitization of, 225
- Solution medium control of the  $\text{Ru}(\text{bpy})_3^{2+}$ /methyl viologen/ EDTA photochemical system, 175
- Spatially isolated redox orbitals - an update, 65
- Transition metal-organic systems, photochemistry of, 191
- Transition metal complexes, spectroscopic properties of  $(\text{nd})^{10}$ , 41
- Transition metal complexes, photosensitization of semiconductors with, - a route to the photoassisted cleavage of water, 225
- Transition metal complexes, pressure effects on the photochemical reactions of, 361
- Tris(2,2'-bipyridine)cobalt(I), reduction of carbon dioxide by, 247
- Water, photosensitization of semiconductors with transition metal complexes - a route to the photo-assisted cleavage of, 225
