Braunstein, P. 219	Guilard, R. 87	Melnik, M. 49	Tiripicchio, A. 219
Buckley, R.I. 167			
Carlin, R.L. 141	Hlatky, G.G. 1	Palacio, F. 141	Woollins, J.D. 115
Clark, R.J.H. 167	Kelly, P.F. 115		
Coppens, P. 285		Sappa, E. 219	
Crabtree, R.H. 1	Lecomte, C. 87	Sharrock, P. 49	

## SUBJECT INDEX

- 
- Antiferromagnets, the  $A_2[FeX_5(H_2O)]$  series of, 141
- Metal-ligand interactions in heterometallic transition metal clusters, selective, 219
- Molybdenum blues, structural and electronic properties of some polymolybdates reducible to, 167
- Molybdenum chemistry, analysis of oligonuclear structures, seven coordination in, 49
- Oligonuclear structures, seven coordination of molybdenum chemistry: analysis of, 49
- Oxygen adducts, low valent metalloporphyrins, and related systems with sulfur and selenium, recent developments in the studies of titanium and vanadium porphyrins with a special emphasis on, 87
- Polyhydride complexes, transition-metal, 1
- Polymolybdates reducible to molybdenum blues, structural and electronic properties of some, 167
- Porphyrins with a special emphasis on oxygen adducts, low valent metalloporphyrins, and related systems with sulfur and selenium, recent developments in the studies of titanium and vanadium, 87
- Pt(III), the preparation and properties of compounds containing, 115
- Selenium, recent developments in the studies of titanium and vanadium porphyrins with a special emphasis on oxygen adducts, low valent metalloporphyrins, and related systems with sulfur and, 87
- Sulfur and selenium, recent developments in the studies of titanium and vanadium porphyrins with a special emphasis on oxygen adducts, low valent metalloporphyrins, and related systems with, 87
- Titanium and vanadium porphyrins with a special emphasis on oxygen adducts, low valent metalloporphyrins, and related systems with sulfur and selenium, recent developments in the studies of, 87
- Transition metal clusters, selective metal-ligand interactions in heterometallic, 219
- Transition metal complexes, X-ray diffraction and the charge distribution in, 285
- Transition-metal polyhydride complexes, 1
- Vanadium porphyrins with a special emphasis on oxygen adducts, low valent metalloporphyrins, and related systems with sulfur and selenium, recent developments in the studies of titanium and, 87
- X-ray diffraction and the charge distribution in transition metal complexes, 285
