SUBJECT INDEX

- | | |
|---|--|
| Amides, of the platinum metals, 1 | Molybdenum, coordination chemistry of Schiff base complexes of, 183 |
| Chemotherapy, cancer, organotin compounds and, 109 | Organotin compounds, and cancer chemotherapy, 109 |
| Cisplatin, the chemical and biochemical consequences of the binding of the antitumour drug cisplatin and other platinum group metal complexes to, 129 | Platinum group metal complexes, the chemical and biochemical consequences of the binding of the antitumour drug cisplatin and other, to DNA, 129 |
| DNA, the chemical and biochemical consequences of the binding of the antitumour drug cisplatin and other platinum group metal complexes to, 129 | Platinum metals, amides of the, 1 |
| Electrochemical studies, of ruthenium compounds. Part I. Ligand oxidation levels, 239 | Ruthenium compounds, electrochemical studies of. Part I. Ligand oxidation levels, 239 |
| Heterobimetallics, early-late, 41 | Schiff base complexes, of molybdenum, coordination chemistry of, 183 |
