SUBJECT INDEX

-
- | | |
|--|--|
| Alkylamine cobalt (III) complexes | Coordination polymers |
| Charge-transfer spectroscopy and photochemistry of alkylamine cobalt(III) complexes 225 | One-dimensional coordination polymers: Applications to material science 293 |
| Aluminum nitride | (Cyclidene) iron(II) dioxygen carriers |
| Coordination compounds of aluminum as precursors to aluminum nitride 193 | Kinetics and intermediates in the autoxidation of (cyclidene)iron(II) dioxygen carriers in a variety of solvent systems 117 |
| Anation reactions | Hexadentate EDTA-type ligands |
| Mechanistic considerations for anation reactions in the solid state 175 | Coordination chemistry of hexadentate EDTA-type ligands with M(III) ions 139 |
| Barium β -diketonates | Hexanuclear carbonyl clusters |
| Volatile barium β -diketonates for use as MOCVD precursors 285 | Organometallic chemistry of hexanuclear carbonyl clusters 261 |
| CO substitution | Hydrogen bridge bonds |
| Kinetic studies of CO substitution of metal carbonyls in the presence of O-atom transfer reagents 69 | Coordination compounds formed using three-center hydrogen bridge bonds: An extension of the Lewis donor-acceptor coordination bond 245 |
| Conformational change | John C. Bailar, Jr. |
| Conformational change induced by metal ions through coordination 167 | John C. Bailar, Jr. (1904–1991): Father of coordination chemistry in the United States 1 |
| Copolymers | Ligand steric properties |
| Coordination chemistry from monomers to copolymers 49 | Ligand steric properties 89 |

M(III) ions

Coordination chemistry of hexadentate
EDTA-type ligands with M(III) ions 139

Material science

One-dimensional coordination polymers:
Applications to material science 293

Metal carbonyls

Kinetic studies of CO substitution of metal
carbonyls in the presence of O-atom transfer
reagents 69

Metal ions

Conformational change induced by metal ions
through coordination 167

MOCVD precursors

Volatile barium β -diketonates for use as
MOCVD precursors 285

Monomers

Coordination chemistry from monomers to co-
polymers 49

O-atom transfer reagents

Kinetic studies of CO substitution of metal
carbonyls in the presence of O-atom transfer
reagents 69

Oxomolybdenum(V) complexes

High-nuclearity oxomolybdenum(V) com-
plexes 209

Three-center hydrogen bridge bonds

Coordination compounds formed using three-
center hydrogen bridge bonds: An extension
of the Lewis donor-acceptor coordination
bond 245
