

COORDINATION CHEMISTRY REVIEWS, VOL. 130 (1994)

AUTHOR INDEX

Allen, C.W. 137	Janzen, A.F. 355	Ranaivonjatovo, H. 427
Barron, A.R. 63	Kanatzidis, M.G. 509	Satge, J. 427
Couret, C. 427	Kasprowski, J. 301	Suontamo, R.J. 1
Escudié, J. 427	Klingebiel, U. 481	Walter, S. 481
Haas, A. 301	Laitinen, R.S. 1	Weidenbruch, M. 275
Healy, M.D. 63	Pekonen, P. 1	Wong, C.Y. 175, 243
Huang, S.-P. 509	Power, M.B. 63	Woollins, J.D. 175, 243
	Pryka, M. 301	

SUBJECT INDEX

Acyclic phosphazenes	Cyclophosphazenes
Linear, cyclic and polymeric phosphazenes 137	Linear, cyclic and polymeric phosphazenes 137
Aluminum	Disilenes
Sterically crowded aryloxide compounds of aluminum 63	Silylenes and disilenes: examples of low coordinated silicon compounds 275
Aminosilane	Fluorinated compounds
From aminosilane to iminosilane 481	Ligand exchange and reaction mechanisms of fluorinated compounds 355
Aryloxide compounds	Fluorosilane elimination
Sterically crowded aryloxide compounds of aluminum 63	From aminosilane to iminosilane 481
Beryllium	Germanium
Beryllium coordination chemistry 243	Bidentate oxygen donor chelates of silicon, germanium and tin 175
Bidentate ligands	Germanium
Bidentate oxygen donor chelates of silicon, germanium and tin 175	Recent developments in the chemistry of stable doubly bonded germanium compounds 427
Chalcogen rings	Heteroatomic molecules
Homo- and heteroatomic chalcogen rings 1	Homo- and heteroatomic chalcogen rings 1
Chelate rings	Homoatomic molecules
Bidentate oxygen donor chelates of silicon, germanium and tin 175	Homo- and heteroatomic chalcogen rings 1
Chelates	Iminosilane
Beryllium coordination chemistry 243	From aminosilane to iminosilane 481
Coordination chemistry	Ligand exchange
Beryllium coordination chemistry 243	Ligand exchange and reaction mechanisms of fluorinated compounds 355
Coordination chemistry	
Coordination chemistry of heavy polychalcogenide ligands 509	
Cyclic compounds	
Tellurium- and selenium-nitrogen compounds: preparation, characterization and properties 301	

Lithium derivatives

From aminosilane to iminosilane 481

Main group elements

Ligand exchange and reaction mechanisms of fluorinated compounds 355

Metal ions

Coordination chemistry of heavy polychalcogenide ligands 509

Nitrogen

Tellurium- and selenium-nitrogen compounds: preparation, characterization and properties 301

Oxygen donors

Bidentate oxygen donor chelates of silicon, germanium and tin 175

Phosphazenes

Linear, cyclic and polymeric phosphazenes 137

Polychalcogenide ligands

Coordination chemistry of heavy polychalcogenide ligands 509

Polyphosphazenes

Linear, cyclic and polymeric phosphazenes 137

Selenium

Tellurium- and selenium-nitrogen compounds: preparation, characterization and properties 301

Silicon

Bidentate oxygen donor chelates of silicon, germanium and tin 175

Silicon

Silylenes and disilenes: examples of low coordinated silicon compounds 275

Silylenes

Silylenes and disilenes: examples of low coordinated silicon compounds 275

Stabilization

Recent developments in the chemistry of stable doubly bonded germanium compounds 427

Tellurium

Tellurium- and selenium-nitrogen compounds: preparation, characterization and properties 301

Tin

Bidentate oxygen donor chelates of silicon, germanium and tin 175
