

COORDINATION CHEMISTRY REVIEWS, VOL. 145 (1995)

MAIN GROUP CHEMISTRY REVIEW

AUTHOR INDEX

Baines, K.M., 157	Norman, N.C., 27	Vaugois, J., 55
Driess, M., 1	Pickett, N.L., 27	Wrackmeyer, B., 125
Lickiss, P.D., 75	Simard, M., 55	Wuest, J.D., 55
Nixon, J.F., 201	Smith, C.M., 75	
	Stibbs, W.G., 157	

SUBJECT INDEX

-
- 1,1-organoboration
 - 1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds 125
 - Alkynylgermanium
 - 1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds 125
 - Alkynyllead
 - 1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds 125
 - Alkynylsilicon
 - 1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds 125
 - Alkynyltin
 - 1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds 125
 - Group 1 metals
 - Silicon derivatives of the metals of groups 1 and 2 75
 - Group 2 metals
 - Silicon derivatives of the metals of groups 1 and 2 75
 - Heterocycles
 - The molecular structure of organogermanium compounds 157
 - Low-coordinate silicon
 - Some aspects of the chemistry of silylidene-phosphanes and-arsanes 1
 - Multidentate Lewis acids
 - Multiple coordination of carbonyl compounds by multidentate main group Lewis acids 55
 - Multiple bonds
 - Some aspects of the chemistry of silylidene-phosphanes and-arsanes 1
 - Organogermanium compounds
 - The molecular structure of organogermanium compounds 157
 - Organometallic chemistry
 - Recent developments in the organometallic chemistry of phospho-alkynes, $RC\equiv P$ 201
 - p-Block elements
 - Phosphine complexes of the heavier p-block elements: aspects of structure and bonding 27
 - Phospho-alkynes
 - Recent developments in the organometallic chemistry of phospho-alkynes, $RC\equiv P$ 201
 - Phosphine complexes
 - Phosphine complexes of the heavier p-block elements: aspects of structure and bonding 27

Polygermanes

The molecular structure of organogermanium compounds 157

Silicon-arsenic

Some aspects of the chemistry of silylidene-phosphanes and-arsanes 1

Silicon-phosphorus

Some aspects of the chemistry of silylidene-phosphanes and-arsanes 1

Silicon derivatives

Silicon derivatives of the metals of groups 1 and 2 75

Silyllithium compounds

Silicon derivatives of the metals of groups 1 and 2 75

Structure

Phosphine complexes of the heavier p-block elements: aspects of structure and bonding 27
