

COORDINATION CHEMISTRY REVIEWS, VOL. 171 (1998)

SUBJECT INDEX

- Aluminium Chelate
Metal chelates as emitting materials for organic electroluminescence 161
- Aromatic hydrocarbon
Lanthanide-ion modified cyclodextrin supramolecules 115
- Artificial photosynthesis
Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61
- Bionics
Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61
- Charge transfer
A new type of MLCT transition relevant to oxidative additions: $d \rightarrow \sigma^*$ excitation 399
- Chemical sensing
Mechanisms of photoluminescent quenching of oxidized porous silicon. Applications to chemical sensing 251
- Chemosensor
Lanthanide-ion modified cyclodextrin supramolecules 115
- Conducting
Photoproperties of the polymeric $\{[M(dmb)_2]Y\}_n$ materials: photoinduced intrachain energy and intermolecular electron transfers, and design of photovoltaic cells 351
- Coordination complexes
Building photoactive molecular-scale wires 331
- Copper
Photoproperties of the polymeric $\{[M(dmb)_2]Y\}_n$ materials: photoinduced intrachain energy and intermolecular electron transfers, and design of photovoltaic cells 351
- Copper excited states
Electron and energy transfer from Cu^I MLCT excited states 309
- CT excited states
Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355
- Cyclodextrin
Lanthanide-ion modified cyclodextrin supramolecules 115
- d–d Excited states
Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355
- Devices
Metal chelates as emitting materials for organic electroluminescence 161
- Display
Metal chelates as emitting materials for organic electroluminescence 161
- Electron delocalization
Building photoactive molecular-scale wires 331
- Electron transfer
Building photoactive molecular-scale wires 331
- Energy-transfer
Assemblies of luminescent ruthenium(II)– and osmium(II)–polypyridyl complexes based on hydrogen bonding 481
- Energy transfer
Lanthanide-ion modified cyclodextrin supramolecules 115
- Excimer
Luminescent excimers and exciplexes of Pt^{II} compounds 85
- Exciplex
Luminescent excimers and exciplexes of Pt^{II} compounds 85
- Gold
Glowing gold rings: solvoluminescence from planar trigold(I) complexes 151
- Hydrogen-bonding
Assemblies of luminescent ruthenium(II)– and osmium(II)–polypyridyl complexes based on hydrogen bonding 481
- Lanthanide
Lanthanide-ion modified cyclodextrin supramolecules 115
- Light
Light and metal complexes in medicine 203

Luminescence

- Luminescent excimers and exciplexes of Pt^{II} compounds 85
- Lanthanide-ion modified cyclodextrin supramolecules 115

Materials

- Metal chelates as emitting materials for organic electroluminescence 161

Medicine

- Light and metal complexes in medicine 203

Mesoporous junctions

- Molecular photovoltaics 245

Metal-metal bonding

- Luminescent excimers and exciplexes of Pt^{II} compounds 85

Metal-oxo complexes

- Emitting state energies and vibronic structure in the luminescence spectra of *trans*-dioxorhenium(V) complexes 387

Metal complexes

- Light and metal complexes in medicine 203

Metallopharmaceuticals

- Light and metal complexes in medicine 203

Molecular electronics

- Building photoactive molecular-scale wires 331

Multielectron transfer

- Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61

Nanocrystalline TiO₂ sensitization

- Molecular photovoltaics 245

Near-infrared luminescence

- Emitting state energies and vibronic structure in the luminescence spectra of *trans*-dioxorhenium(V) complexes 387

Nonradiative processes

- Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355

OLED

- Metal chelates as emitting materials for organic electroluminescence 161

Organic electroluminescence

- Metal chelates as emitting materials for organic electroluminescence 161

Oxidative addition

- A new type of MLCT transition relevant to oxidative additions: d → σ* excitation 399

Palladium complex

- Photochemical reactions of palladium(0) and platinum(0) phosphine complexes 107

Photocatalysis

- Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61

Photochemistry

- Photochemical reactions of palladium(0) and platinum(0) phosphine complexes 107

- Electron and energy transfer from Cu^I MLCT excited states 309

- Building photoactive molecular-scale wires 331

Photochemistry

- A new type of MLCT transition relevant to oxidative additions: d → σ* excitation 399

Photochromic and electrochromic devices

- Molecular photovoltaics 245

Photomedicine

- Light and metal complexes in medicine 203

Photosensitization

- Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61

Platinum complex

- Photochemical reactions of palladium(0) and platinum(0) phosphine complexes 107

Polymer

- Photoproperties of the polymeric {[M(dmb)₂]Y}_n materials: photoinduced intrachain energy and intermolecular electron transfers, and design of photovoltaic cells 351

Porous silicon

- Mechanisms of photoluminescent quenching of oxidized porous silicon. Applications to chemical sensing 251

Porphyrins

- Photocatalytic reactions of porphyrin-based multielectron transfer sensitizers 61

Pt(II)

- Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355

Relativistic effects

- Luminescent excimers and exciplexes of Pt^{II} compounds 85

Rh(III)

- Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355

Ru(II)

- Non-radiative processes of excited CT states of Ru(II) and Pt(II) compounds and excited d–d states of Rh(III) compounds in the solid state and at higher temperatures 355

Silver

- Photoproperties of the polymeric {[M(dmb)₂]Y}_n materials: photoinduced intrachain energy and intermolecular electron transfers, and design of photovoltaic cells 351

Solar cells

- Molecular photovoltaics 245

Solid-state photoluminescence

- Mechanisms of photoluminescent quenching of oxidized porous silicon. Applications to chemical sensing 251

Solvoluminescence
