SUBJECT INDEX

- | | |
|--|--|
| Aluminum | clear cation–anion interactions leading to supramolecular assemblies 101 |
| Chemistry of the organodiamides of magnesium, aluminum and mixed Mg–Al systems. A review of the heterocumulene reactivity on the Mg–Al centers 199 | |
| Bonding | Group 13 |
| The syntheses, structures, bonding, and reactivity of cyclopentadienylaluminum(III) derivatives 1 | Recent advances in the chemistry of the Group 13 metals: hydride derivatives and compounds involving multiply bonded Group 13 metal atoms 59 |
| Cyclopentadienylaluminum compounds | Host–guest chemistry |
| The syntheses, structures, bonding, and reactivity of cyclopentadienylaluminum(III) derivatives 1 | Supramolecular assemblies of globular main group cage species 169 |
| Dihapto coordination geometry | Hydrogen bonds |
| The syntheses, structures, bonding, and reactivity of cyclopentadienylaluminum(III) derivatives 1 | Supramolecular assemblies of globular main group cage species 169 |
| Dithiazolyl radicals | Inclusion compounds |
| Benzo-fused dithiazolyl radicals: from chemical curiosities to materials chemistry 135 | Supramolecular assemblies of globular main group cage species 169 |
| Donor–acceptor interactions | Intercalation compounds |
| Iodophosphonium salt structures: homonuclear cation–anion interactions leading to supramolecular assemblies 101 | Supramolecular assemblies of globular main group cage species 169 |
| | Iodine |
| | Iodophosphonium salt structures: homonuclear cation–anion interactions leading to supramolecular assemblies 101 |
