Lever65 — A celebration of contributions and service to inorganic chemistry	
E.I. Solomon	1
Luminescent mixed ligand copper(I) clusters (CuI) _n (L) _m (L = pyridine, piperidine): thermodynamic control of molecular and supramolecular species	
M. Vitale and P.C. Ford	3
Chemistry, properties and applications of the assembling 1,8-diisocyano- <i>p</i> -menthane, 2,5-dimethyl-2',5'-diisocyanohexane and 1,3-diisocyanopropane ligands and their coordination polynuclear complexes	
P.D. Harvey	17
Electron-transfer induced isomerizations of coordination compounds	
A.J.L. Pombeiro, M.F.C. Guedes da Silva and M.A.N.D.A. Lemos	53
Coupled electron-transfer and spin-exchange reactions	
J.W. Turner and F.A. Schultz	81
Optically active phthalocyanines	
N. Kobayashi	99
Phenylcyanamide ligands and their metal complexes	
R.J. Crutchley	125
Platinum(IV) hydride chemistry	
R.J. Puddephatt	157
Monomeric and extended oxo-centered triruthenium clusters	
H.E. Toma, K. Araki, A.D.P. Alexiou, S. Nikolaou and S. Dovidauskas	187
Indium phthalocyanines and naphthalocyanines for optical limiting	
M. Hanack, T. Schneider, M. Barthel, J.S. Shirk, S.R. Flom and R.G.S. Pong	235
Ozonolysis in coordination chemistry and catalysis: recent advances	
W.P. Griffith	259
Silver vanadium oxides and related battery applications	
K.J. Takeuchi, A.C. Marschlok, S.M. Davis, R.A. Leising and E.S. Takeuchi	283
η ¹ -Indenyl derivatives of transition metal and main group elements: synthesis, characterization and molecular dynamics	
M. Stradiotto and M.J. McGlinchey	311
d–f Heteronuclear complexes: synthesis, structures and physicochemical aspects	
M. Sakamoto, K. Manseki and H. Ōkawa	379
Unique properties of transition metal quinone complexes of the MQ ₃ series	
C.G. Pierpont	415
Interactions of lead(II) with nucleotides and their constituents	
H. Sigel, C.P. Da Costa and R.B. Martin	435

Complexes with 2,2'-azobispyridine and related 'S-frame' bridging ligands containing the azo function W. Kaim	463
Photoreactivity of gold complexes A. Vogler and H. Kunkely	489
Coupled electronic states in <i>trans</i> -MCl ₂ (H ₂ O) ₄ ⁿ⁺ complexes (M: Ni ²⁺ , Co ²⁺ , V ³⁺ , Cr ³⁺) probed by absorption and luminescence spectroscopy G. Bussière, R. Beaulac, B. Cardinal-David and C. Reber	509
Dendrimers based on photoactive metal complexes. Recent advances V. Balzani, P. Ceroni, A. Juris, M. Venturi, S. Campagna, F. Puntoriero and S. Serroni	545
New experimental techniques for magnetic anisotropy in molecular materials A. Cornia, D. Gatteschi and R. Sessoli	573
Review of metal 1-azaallyl complexes C.F. Caro, M.F. Lappert and P.G. Merle	605
Silicate complexes of aluminum(III) in aqueous systems T.W. Swaddle	665
Correlations of optical and thermal charge transfer J.F. Endicott and M. Jamal Uddin	687
Effects of high external pressures on the electronic spectra of coordination compounds J.K. Grey and I.S. Butler	713
The effect of deuteration on the emission lifetime of inorganic compounds W.R. Browne and J.G. Vos	761
Catalytic oxidations in carbon dioxide-based reaction media, including novel CO ₂ -expanded phases G. Musie, M. Wei, B. Subramaniam and D.H. Busch	789
Anion recognition by dimetallic cryptates V. Amendola, L. Fabbrizzi, C. Mangano, P. Pallavicini, A. Poggi and A. Taglietti	821
Photoswitchable coordination compounds P. Gütllich, Y. Garcia and T. Woike	839
Advances in the coordination chemistry of [M(CN) ₅ L] ⁿ⁻ ions (M = Fe, Ru, Os) L.M. Baraldo, P. Forlano, A.R. Parise, L.D. Slep and J.A. Olabe	881
Stereoelectronic factors in CO, NO and O ₂ binding to heme from vibrational spectroscopy and DFT analysis T.G. Spiro, M.Z. Zgierski and P.M. Kozlowski	923
Resonance Raman spectra of d ⁶ metal–diimine complexes reflect changes in metal–ligand interaction and character of electronic transition J. van Slageren, A. Klein, S. Záliš and D.J. Stufkens	937
Metalloaromaticity H. Masui	957
Assignment of the optical spectra of metal phthalocyanines through spectral band deconvolution analysis and ZINDO calculations J. Mack and M.J. Stillman	993
Coordination chemistry of vanadium in metallopharmaceutical candidate compounds K.H. Thompson and C. Orvig	1033

Structural mimics for the active site of [NiFe] hydrogenase A.C. Marr, D.J.E. Spencer and M. Schröder	1055
Excited electronic states of transition-metal dimers and the VBCI model: an overview F. Tuczek and E.I. Solomon	1075
Author index.	1113
Subject index.	1115
