Structure **13**, Oxasapphyrin (shown) was inadvertently omitted from the article during typesetting and should appear above its X-ray crystallographic structure, Fig. 6. The structure published as **13** on p. 424 is Alaskaphyrin and should be renumbered as **14**. Indeed as a consequence of this omission, printed structures **13** through **21**, either as free standing structures or in schemes should be relabeled as **14–22** to agree with the citations in the text.

It is also unfortunate that this omission has caused some figures now to appear in less appropriate positions some pages distant from where they are cited. Apologies are offered for this confusion.

\*shown in general format -  
unsubstituted
