

COORDINATION CHEMISTRY REVIEWS, VOL. 223 (2001)

SUBJECT INDEX

-
- | | |
|--|--|
| Alkali metal | Indium amides |
| Group 12 and heavier Group 13 alkali metal | Amido compounds of gallium and indium |
| 'ate complexes 53 | 217 |
| 'ate Complex | Interhalogen |
| Group 12 and heavier Group 13 alkali metal | The reactions of sulfur and selenium donor |
| 'ate complexes 53 | molecules with dihalogens and interhalo- |
| | gens 265 |
| Charge-transfer | Main group metals |
| The reactions of sulfur and selenium donor | Tetraorganodichalcogenoimidodiphosphorus |
| molecules with dihalogens and interhalo- | acids and their main group metal deriva- |
| gens 265 | tives 117 |
| Dihalogen | Metal complexes |
| The reactions of sulfur and selenium donor | Tetraorganodichalcogenoimidodiphosphorus |
| molecules with dihalogens and interhalo- | acids and their main group metal deriva- |
| gens 265 | tives 117 |
| Gallium amides | Selenium |
| Amido compounds of gallium and indium | The reactions of sulfur and selenium donor |
| 217 | molecules with dihalogens and interhalo- |
| Group 12 | gens 265 |
| Group 12 and heavier Group 13 alkali metal | Solid-state structure |
| 'ate complexes 53 | Group 12 and heavier Group 13 alkali metal |
| | 'ate complexes 53 |
| Group 13 | Sulfur |
| Group 12 and heavier Group 13 alkali metal | The reactions of sulfur and selenium donor |
| 'ate complexes 53 | molecules with dihalogens and interhalo- |
| | gens 265 |
| Imidodiphosphorus acids | Synthesis |
| Tetraorganodichalcogenoimidodiphosphorus | Amido compounds of gallium and indium |
| acids and their main group metal deriva- | 217 |
| tives 117 | |
