Contents

Celebration of Inorganic Lives: Interview with F. Albert Cotton H. Hennig	1
The generation and characterization of elusive metal complexes in the gas phase: neutralization–reionization mass spectrometry and related experiments D. Zagorevskii	5
Alternating copolymerization of carbon monoxide and olefins by single-site metal catalysis C. Bianchini and A. Meli	35
The production of low molecular weight oxygenates from carbon monoxide and ethene R.A.M. Robertson and D.J. Cole-Hamilton	67
Classification of coordination polygons and polyhedra according to their mode of self-assembly. 2. Review of the literature G.F. Swiegers and T.J. Malefetse	91
Molecular mechanics and molecular dynamics simulations of porphyrins, metalloporphyrins, heme proteins and cobalt corrinooids H.M. Marques and K.L. Brown	123
Recent developments in the chemistry of selenoethers and telluroethers W. Levason, S.D. Orchard and G. Reid	159
Structural and functional models of nitrile hydratase P.K. Mascharak	201
Metalated (η^6 -arene)tricarbonylchromium complexes in organometallic chemistry A. Berger, J.-P. Djukic and C. Michon	215
Author Index of Volume 225	239
Subject Index of Volume 225	241
