

Contents

The 50th National Conference on Coordination Chemistry (NCCC) of Japan, 16–18 September 2000, Biwako-Kusatsu Campus of Ritsumeikan University, Japan, and Commemorative Meeting of the 50th Anniversary of NCCC, 'International Symposium on New Horizons of Coordination Chemistry towards the 21st Century' 18–20 September 2000, Biwako-Kusatsu Campus of Ritsumeikan University, Japan M. Shionoya	1
Control of assembly and magnetism of metal–dmit complexes by supramolecular cations T. Akutagawa and T. Nakamura	3
Photodecomposition of trimethyltin halides: a theoretical study N. Ben Amor and C. Daniel	11
Toward understanding nephelauxetism: interelectronic repulsion in gaseous d^q ions computed by Kohn–Sham DFT C. Anthon and C.E. Schäffer	17
Time resolved spectroscopic studies relevant to reactive intermediates in homogeneous catalysis. The migratory insertion reaction P.C. Ford and S. Massick	39
Electronic structure and reactivity of high-valent oxo iron porphyrins H. Fujii	51
The concept of boranes as ligands N.N. Greenwood	61
Formation of superoxide–metal ion complexes and the electron transfer catalysis S. Fukuzumi, H. Ohtsu, K. Ohkubo, S. Itoh and H. Imahori	71
Conjugated systems composed of transition metals and redox-active π -conjugated ligands T. Hirao	81
Synthetic, spectroscopic and theoretical study of novel supramolecular structures composed of lanthanide phthalocyanine double-decker complexes N. Ishikawa and Y. Kaizu	93
Thermodynamic and structural aspects on the solvation steric effect of lanthanide(III)—dependence on the ionic size S. Ishiguro, Y. Umebayashi and M. Komiya	103
Cocrystallites consisting of metal macrocycles with fullerenes T. Ishii, N. Aizawa, R. Kanehama, M. Yamashita, K.-i. Sugiura and H. Miyasaka	113
Azo- and quinone-conjugated redox complexes—photo- and proton-coupled intramolecular reactions based on $d-\pi$ interaction M. Kurihara and H. Nishihara	125
Anions of low Lewis basicity for ionic solid state electrolytes W. Linert, A. Camard, M. Armand and C. Michot	137
Structures and properties of assembled oxidized metal complexes with $C_8H_4S_8$ and related sulfur-rich dithiolate ligands G. Matsubayashi, M. Nakano and H. Tamura	143
Resonance Raman spectra and biological significance of high-valent iron(IV,V) porphyrins K. Nakamoto	153
Synthesis and reactivity of (phosphinoalkyl)silyl complexes M. Okazaki, S. Ohshitanai, M. Iwata, H. Tobita and H. Ogino	167
Electron transfer in nitric-oxide synthase I. Sagami, Y. Sato, T. Noguchi, M. Miyajima, E. Rozhkova, S. Daff and T. Shimizu	179
Antidiabetic vanadium(IV) and zinc(II) complexes H. Sakurai, Y. Kojima, Y. Yoshikawa, K. Kawabe and H. Yasui	187
Copper(II) complexes with multidentate Schiff-base ligands containing imidazole groups: ligand-complex or self-complementary molecule? Y. Sunatsuki, Y. Motoda and N. Matsumoto	199
Multi-electron reduction of CO_2 via $Ru-CO_2$, $-C(O)OH$, $-CO$, $-CHO$, and $-CH_2OH$ species K. Tanaka and D. Ooyama	211

Synthetic models for the active site of cytochrome P450 F. Tani, M. Matsu-ura, S. Nakayama and Y. Naruta	219
Recognition and sensing of chiral biological substrates via lanthanide coordination chemistry H. Tsukube, S. Shinoda and H. Tamiaki	227
Spin-mediated superconductivity in cuprates, organic conductors and π -d conjugated systems K. Yamaguchi, Y. Kitagawa, T. Onishi, H. Isobe, T. Kawakami, H. Nagao and S. Takamizawa	235
Theoretical study on kinetic isotope effects in the C–H bond activation of alkanes by iron-oxo complexes K. Yoshizawa	251
