

Subject Index of Volume 229

Alkynyl

Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123

Ammine–polypyridine–ruthenium(II) complexes

MLCT excited states and charge delocalization in some ruthenium–ammine–polypyridyl complexes 95

Ammonia

Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133

Biradicals

Light-induced formation of zwitterions and biradicals from the cluster $[\text{Os}_3(\text{CO})_{10}(\text{Pr-AcPy})]$ studied with picosecond UV–vis and nanosecond IR spectroscopies 107

Cationic complexes

Ground- and excited-state reactivities of cationic sandwich and half-sandwich complexes of iron(II) 9

Cation radical

A charge-separated pair in thin crystals of oxotitanium(IV) phthalocyanine revealed by means of femtosecond time-resolved absorption 3

Charge separation

A charge-separated pair in thin crystals of oxotitanium(IV) phthalocyanine revealed by means of femtosecond time-resolved absorption 3

Charge transfer

Outer-sphere charge transfer in ion pairs with hydridic, carbanionic, sulfidic and peroxidic anions as electron donors—spectroscopy and photochemistry 147

Charge-transfer states

Luminescence that lasts from $\text{Pt}(\text{trpy})\text{Cl}^+$ derivatives ($\text{trpy} = 2,2';6',2''\text{-terpyridine}$) 113

Chelates

Photochemistry of iodo iron(III) complexes 27

Chiral complexes

Towards new chiroptical switches 59

π -Coordination

Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123

Dendrimers

Recent advances in luminescent polymetallic dendrimers containing the 2,3-bis(2'-pyridyl)pyrazine bridging ligand 67

Dinuclear exciplex

Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133

DNA binding

Luminescence that lasts from $\text{Pt}(\text{trpy})\text{Cl}^+$ derivatives ($\text{trpy} = 2,2';6',2''\text{-terpyridine}$) 113

Electronic spectra

Outer-sphere charge transfer in ion pairs with hydridic, carbanionic, sulfidic and peroxidic anions as electron donors—spectroscopy and photochemistry 147

Electrospray ionization mass spectrometry

Ground- and excited-state reactivities of cationic sandwich and half-sandwich complexes of iron(II) 9

Energy harvesting

Energy transfer and harvesting in $[\text{Ru}_{1-x}\text{Os}_x(\text{bpy})_3](\text{PF}_6)_2$ and $\{\Lambda\text{-}[\text{Ru}(\text{bpy})_3]\Delta\text{-}[\text{Os}(\text{bpy})_3]\}(\text{PF}_6)_4$ 75

Energy transfer

Energy transfer pathways in pyridylporphyrin metal adducts and side-to-face arrays 51

Recent advances in luminescent polymetallic dendrimers containing the 2,3-bis(2'-pyridyl)pyrazine bridging ligand 67

Towards new chiroptical switches 59

EPR spin trapping

Photochemistry of iodo iron(III) complexes 27

Ethylamine copper(I)

Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133

Excimer

Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133

Exciplex quenching

Luminescence that lasts from $\text{Pt}(\text{trpy})\text{Cl}^+$ derivatives ($\text{trpy} = 2,2';6',2''\text{-terpyridine}$) 113

Fourier transform mass spectrometry

Ground- and excited-state reactivities of cationic sandwich and half-sandwich complexes of iron(II) 9

Heavy-atom effect

Energy transfer pathways in pyridylporphyrin metal adducts and side-to-face arrays 51

Hetero-chirality

Energy transfer and harvesting in $[\text{Ru}_{1-x}\text{Os}_x(\text{bpy})_3](\text{PF}_6)_2$ and $\{\Lambda\text{-}[\text{Ru}(\text{bpy})_3]\Delta\text{-}[\text{Os}(\text{bpy})_3]\}(\text{PF}_6)_4$ 75

Hydrated electron

Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133

Iodo ligand

Photochemistry of iodo iron(III) complexes 27

Ion pairs

Outer-sphere charge transfer in ion pairs with hydridic, carbanionic, sulfidic and peroxidic anions as electron donors—spectro-

- scopy and photochemistry 147
- Iron(III) complexes
- Photochemistry of iodo iron(III) complexes 27
- Laser flash photolysis
- Laser flash photolysis as tool in the elucidation of the nitric oxide binding mechanism to metallobiomolecules 37
- Luminescence
- Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123
- Luminescence that lasts from Pt(trpy)Cl⁺ derivatives (trpy = 2,2';6',2''-terpyridine) 113
- Recent advances in luminescent polymetallic dendrimers containing the 2,3-bis(2'-pyridyl)pyrazine bridging ligand 67
- Magnetic field effects
- Energy transfer and harvesting in [Ru_{1-x}Os_x(bpy)₃](PF₆)₂ and {Λ-[Ru(bpy)₃]Δ-[Os(bpy)₃]}(PF₆)₄ 75
- Mechanism
- Photochemistry of iodo iron(III) complexes 27
- Mercaptosuccinate
- Molecular switches based on cyanoferrate complexes 17
- Metal complexes
- Towards new chiroptical switches 59
- Metallobiomolecules
- Laser flash photolysis as tool in the elucidation of the nitric oxide binding mechanism to metallobiomolecules 37
- Metal-to-ligand charge transfer (MLCT)
- MLCT excited states and charge delocalization in some ruthenium–amine–polypyridyl complexes 95
- Methylamine
- Dinuclear excited-state complexes from UV laser excitation of aqueous ammonia, methylamine, and ethylamine copper(I) complexes 133
- MMLCT
- Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123
- Molecular device
- Towards new chiroptical switches 59
- Molecular switch
- Molecular switches based on cyanoferrate complexes 17
- Towards new chiroptical switches 59
- Nanosecond time-resolved IR spectroscopy
- Light-induced formation of zwitterions and biradicals from the cluster [Os₃(CO)₁₀(ⁱPr-AcPy)] studied with picosecond UV–vis and nanosecond IR spectroscopies 107
- Nitric oxide
- Molecular switches based on cyanoferrate complexes 17
- Nitric oxide, kinetics and mechanism
- Laser flash photolysis as tool in the elucidation of the nitric oxide binding mechanism to metallobiomolecules 37
- Nitroprusside
- Molecular switches based on cyanoferrate complexes 17
- NO-donors
- Molecular switches based on cyanoferrate complexes 17
- [Os(bpy)₃]²⁺
- Energy transfer and harvesting in [Ru_{1-x}Os_x(bpy)₃](PF₆)₂ and {Λ-[Ru(bpy)₃]Δ-[Os(bpy)₃]}(PF₆)₄ 75
- Os-carbonyl clusters
- Light-induced formation of zwitterions and biradicals from the cluster [Os₃(CO)₁₀(ⁱPr-AcPy)] studied with picosecond UV–vis and nanosecond IR spectroscopies 107
- Osmium complexes
- Recent advances in luminescent polymetallic dendrimers containing the 2,3-bis(2'-pyridyl)pyrazine bridging ligand 67
- Oxotitanium(IV)phthalocyanine
- A charge-separated pair in thin crystals of oxotitanium(IV) phthalocyanine revealed by means of femtosecond time-resolved absorption 3
- Pentacyanoferrates(II)
- Molecular switches based on cyanoferrate complexes 17
- Photochemical reactions
- Ground- and excited-state reactivities of cationic sandwich and half-sandwich complexes of iron(II) 9
- Photochemistry
- Luminescence that lasts from Pt(trpy)Cl⁺ derivatives (trpy = 2,2';6',2''-terpyridine) 113
- Outer-sphere charge transfer in ion pairs with hydridic, carbanionic, sulfidic and peroxidic anions as electron donors—spectroscopy and photochemistry 147
- Photolysis
- Photochemistry of iodo iron(III) complexes 27
- Picosecond time-resolved UV–vis spectroscopy
- Light-induced formation of zwitterions and biradicals from the cluster [Os₃(CO)₁₀(ⁱPr-AcPy)] studied with picosecond UV–vis and nanosecond IR spectroscopies 107
- Platinum(II)
- Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123
- Luminescence that lasts from Pt(trpy)Cl⁺ derivatives (trpy = 2,2';6',2''-terpyridine) 113
- Polypyridine complexes
- Towards new chiroptical switches 59
- Polypyridine ligands
- Luminescence that lasts from Pt(trpy)Cl⁺ derivatives (trpy = 2,2';6',2''-terpyridine) 113
- Porphyrin arrays
- Energy transfer pathways in pyridylporphyrin metal adducts and side-to-face arrays 51
- Pt···Pt interaction
- Luminescence studies of dinuclear platinum(II) alkynyl complexes and their mixed-metal platinum(II)–copper(I) and –silver(I) complexes 123
- Pyridylporphyrins
- Energy transfer pathways in pyridylporphyrin metal adducts and side-to-face arrays 51
- Quenching
- Luminescence that lasts from Pt(trpy)Cl⁺ derivatives (trpy = 2,2';6',2''-terpyridine) 113
- Radiationless energy transfer
- Energy transfer and harvesting in [Ru_{1-x}Os_x(bpy)₃](PF₆)₂ and {Λ-[Ru(bpy)₃]Δ-[Os(bpy)₃]}(PF₆)₄ 75
- [Ru(bpy)₃]²⁺
- Energy transfer and harvesting in [Ru_{1-x}Os_x(bpy)₃](PF₆)₂ and {Λ-[Ru(bpy)₃]Δ-[Os(bpy)₃]}(PF₆)₄ 75
- Ruthenium complexes
- Recent advances in luminescent polymetallic dendrimers containing the 2,3-bis(2'-pyridyl)pyrazine bridging ligand 67
- Schiff bases
- Photochemistry of iodo iron(III) complexes 27
- Self-site-selectivity
- Energy transfer and harvesting in [Ru_{1-x}Os_x(bpy)₃](PF₆)₂ and {Λ-[Ru(bpy)₃]Δ-[Os(bpy)₃]}(PF₆)₄ 75
- Singlet exciton
- A charge-separated pair in thin crystals of oxotitanium(IV)

- phthalocyanine revealed by means of femtosecond time-resolved absorption 3
- Supramolecular photochemistry
 - Energy transfer pathways in pyridylporphyrin metal adducts and side-to-face arrays 51
- Thin crystal
 - A charge-separated pair in thin crystals of oxotitanium(IV) phthalocyanine revealed by means of femtosecond time-resolved absorption 3
- Thiolate
 - Molecular switches based on cyanoferrate complexes 17
- Vertical MLCT energy
 - MLCT excited states and charge delocalization in some ruthenium–ammine–polypyridyl complexes 95
- Zwitterions
 - Light-induced formation of zwitterions and biradicals from the cluster $[\text{Os}_3(\text{CO})_{10}(\text{}^i\text{Pr-AcPy})]$ studied with picosecond UV–vis and nanosecond IR spectroscopies 107
