

Subject Index of Volume 236

anticancer

Ruthenium metallopharmaceuticals 209

Antimony

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

Arsenic

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

Biological activity

Structure, chemical and photochemical reactivity and biological activity of some ruthenium amine nitrosyl complexes 57

Bismuth

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

Catalysis

Laterally non-symmetric aza-cryptands: synthesis, catalysis and derivatization to new receptors 1

Chemical and photochemical reactivity

Structure, chemical and photochemical reactivity and biological activity of some ruthenium amine nitrosyl complexes 57

Coordination polymers

The interplay of coordinative, hydrogen bonding and π – π stacking interactions in sustaining supramolecular solid-state architectures. A study case of bis(4-pyridyl)- and bis(4-pyridyl-*N*-oxide) tectons 91

Cryptands

Laterally non-symmetric aza-cryptands: synthesis, catalysis and derivatization to new receptors 1

Crystal engineering

The interplay of coordinative, hydrogen bonding and π – π stacking interactions in sustaining supramolecular solid-state architectures. A study case of bis(4-pyridyl)- and bis(4-pyridyl-*N*-oxide) tectons 91

Crystal structures

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Dithiocarbamates

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

DNA

Ruthenium metallopharmaceuticals 209

Extended structures

The interplay of coordinative, hydrogen bonding and π – π stacking interactions in sustaining supramolecular solid-state architectures. A study case of bis(4-pyridyl)- and bis(4-pyridyl-*N*-oxide) tectons 91

FeMo-cofactor

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

Ferrocenyl phosphines

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Group 6 to 10

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Hydrogen bonds

The interplay of coordinative, hydrogen bonding and π – π stacking interactions in sustaining supramolecular solid-state architectures. A study case of bis(4-pyridyl)- and bis(4-pyridyl-*N*-oxide) tectons 91

immunosuppressant

Ruthenium metallopharmaceuticals 209

Iron(II) complexes

Communication between iron(II) building blocks in cooperative spin transition phenomena 121

Ketenes

The organometallic chemistry of $\text{Ph}_3\text{P}=\text{C}=\text{C}=\text{O}$. A route to metal-substituted ketenes 15

η^1 -Ketenyl complexes

The organometallic chemistry of $\text{Ph}_3\text{P}=\text{C}=\text{C}=\text{O}$. A route to metal-substituted ketenes 15

Ketenylidenetriphenylphosphorane

The organometallic chemistry of $\text{Ph}_3\text{P}=\text{C}=\text{C}=\text{O}$. A route to metal-substituted ketenes 15

metallopharmaceutical

Ruthenium metallopharmaceuticals 209

Metal-substituted ketenes

The organometallic chemistry of $\text{Ph}_3\text{P}=\text{C}=\text{C}=\text{O}$. A route to metal-substituted ketenes 15

Modeling

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

Molecular magnetism

Communication between iron(II) building blocks in cooperative spin transition phenomena 121

Molybdenum

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

nitric oxide

Ruthenium metallopharmaceuticals 209

Nitric oxide donors

Structure, chemical and photochemical reactivity and biological activity of some ruthenium amine nitrosyl complexes 57

Nitric oxide scavengers

Structure, chemical and photochemical reactivity and biological activity of some ruthenium amine nitrosyl complexes 57

Nitrogenase

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

Nitrogen-containing phosphines

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Nitrogen fixation

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

Phosphorus based acids

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

photodynamic

Ruthenium metallopharmaceuticals 209

Ph₃PCCO

The organometallic chemistry of Ph₃P=C=C=O. A route to metal-substituted ketenes 15

Polyphosphines complexes

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

radiopharmaceutical

Ruthenium metallopharmaceuticals 209

Receptors

Laterally non-symmetric aza-cryptands: synthesis, catalysis and derivatization to new receptors 1

ruthenium

Ruthenium metallopharmaceuticals 209

Ruthenium amine and ruthenium ammine nitrosyl complexes

Structure, chemical and photochemical reactivity and biological activity of some ruthenium amine nitrosyl complexes 57

Spin transition

Communication between iron(II) building blocks in cooperative spin transition phenomena 121

Stacking interactions

The interplay of coordinative, hydrogen bonding and π – π stacking interactions in sustaining supramolecular solid-state architectures. A study case of bis(4-pyridyl)- and bis(4-pyridyl-*N*-oxide) tectons 91

Sulfur

Modeling of the molybdenum center in the nitrogenase FeMo-cofactor 71

Sulfur-containing phosphines

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Supramolecular chemistry

Communication between iron(II) building blocks in cooperative spin transition phenomena 121

Synthesis

Laterally non-symmetric aza-cryptands: synthesis, catalysis and derivatization to new receptors 1

Tetradentate phosphines

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

transferring

Ruthenium metallopharmaceuticals 209

Transition metals

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Tridentate phosphines

Structural diversity in coordination chemistry of tridentate and tetradentate polyphosphines of Group 6 to 10 transition metal complexes 143

Xanthates

Chemistry of arsenic, antimony and bismuth compounds derived from xanthate, dithiocarbamate and phosphorus based ligands 35

Ylides

The organometallic chemistry of Ph₃P=C=C=O. A route to metal-substituted ketenes 15
