

Subject Index of Volume 237

Accumulation

- Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41

Alkoxo bridge

- Structures and properties of multinuclear vanadium(III) complexes: seeking a clue to understand the role of vanadium(III) in ascidians 147

Application of [VO(acac)₂]

- Development of the coordination chemistry of vanadium through bis(acetylacetonato)oxovanadium(IV): synthesis, reactivity and structural aspects 163

Aqueous equilibria

- Applications of ⁵¹V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113

Ascidian

- Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31
- Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41

Asymmetric catalysis

- Vanadium-catalyzed asymmetric oxidations 245

Biaryls

- Recent advances in the oxovanadium mediated biaryl coupling and modified Mannich-type reaction 257

Bioinorganic chemistry

- Speciation in peroxovanadate systems 77

Biomimetic oxidation

- Catalytic oxidations by vanadium complexes 89

Biopotency

- Membrane transport of vanadium compounds and the interaction with the erythrocyte membrane 103

Bromination

- Catalytic oxidations by vanadium complexes 89

Carboxylate

- Applications of ⁵¹V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113

Catalysis

- Oxovanadium(III–V) mononuclear complexes and their linear assemblies bearing tetradentate Schiff base ligands: structure and reactivity as multielectron redox catalysts 213

Catalyst

- Catalytic oxidations by vanadium complexes 89
- Vanadium-based Ziegler–Natta: challenges, promises, problems 229

Catalytic oxidation

- Catalytic oxidations by vanadium complexes 89

Catecholase reaction

- Vanadate chelate esters of monoionized diols and carbohydrates 135

C–C bond formation

- Recent advances in the oxovanadium mediated biaryl coupling and modified Mannich-type reaction 257

Coordination chemistry

- Development of the coordination chemistry of vanadium through bis(acetylacetonato)oxovanadium(IV): synthesis, reactivity and structural aspects 163

Corallina species

- Structural studies on the dodecameric vanadium bromoperoxidase from *Corallina* species 65

Crystal structures

- Oxovanadium(III–V) mononuclear complexes and their linear assemblies bearing tetradentate Schiff base ligands: structure and reactivity as multielectron redox catalysts 213

Diabetes

- Historic perspective and recent developments on the insulin-like actions of vanadium; toward developing vanadium-based drugs for diabetes 3

- (4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

- Membrane transport of vanadium compounds and the interaction with the erythrocyte membrane 103

Diastereoisomeric equilibria in vanadate esters

- Vanadate chelate esters of monoionized diols and carbohydrates 135

Dinucleating ligands

- Structures and properties of multinuclear vanadium(III) complexes: seeking a clue to understand the role of vanadium(III) in ascidians 147

Dipicolinate

- (4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Electron transfer

- Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271

Enantioselectivity

- Vanadium-catalyzed asymmetric oxidations 245

Epoxides

- Vanadium-catalyzed asymmetric oxidations 245

Equilibrium constants

- Applications of ⁵¹V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113

ESR

- Reactions of di-2-pyridylketone oxime in the presence of vanadium(III): crystal structures of the coordination products 197

FeMoco

- Current status of structure function relationships of vanadium nitrogenase 23

FeVco

- Current status of structure function relationships of vanadium nitrogenase 23

Haloperoxidase

The medicinal and catalytic potential of model complexes of vanadate-dependent haloperoxidases 53

Hydrogen bonding

Supramolecular interactions of vanadate species: vanadium(V) complexes with *N*-salicylidenehydrazides as versatile models 205

Hydroxycarboxylic acid

Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113

Insulin

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Insulin-like actions of vanadium

Historic perspective and recent developments on the insulin-like actions of vanadium; toward developing vanadium-based drugs for diabetes 3

Insulin-mimesis

The medicinal and catalytic potential of model complexes of vanadate-dependent haloperoxidases 53

Insulin-mimetic activity

Speciation in peroxovanadate systems 77

Lactate

Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113

Ligand

Catalytic oxidations by vanadium complexes 89

Ligand coupling

Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271

Ligand exchange reaction

Development of the coordination chemistry of vanadium through bis(acetylacetonato)oxovanadium(IV): synthesis, reactivity and structural aspects 163

Main-group organometallic

Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271

Mechanochromism

Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183

Metal-binding protein

Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41

Modified Mannich reaction

Recent advances in the oxovanadium mediated biaryl coupling and modified Mannich-type reaction 257

Mo-nitrogenase

Current status of structure function relationships of vanadium nitrogenase 23

Muscle cell

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Myoblast

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Nitrogen fixation

Current status of structure function relationships of vanadium nitrogenase 23

Oligopeptides

Interactions of VO(IV) with oligopeptides 123

Oxidation

Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271

Reactions of di-2-pyridylketone oxime in the presence of vanadium(III): crystal structures of the coordination products 197

Oxidative coupling

Recent advances in the oxovanadium mediated biaryl coupling and modified Mannich-type reaction 257

Oxo bridge

Structures and properties of multinuclear vanadium(III) complexes: seeking a clue to understand the role of vanadium(III) in ascidians 147

Oxovanadium

Recent advances in the oxovanadium mediated biaryl coupling and modified Mannich-type reaction 257

Oxovanadium complexes

Oxovanadium(III–V) mononuclear complexes and their linear assemblies bearing tetradentate Schiff base ligands: structure and reactivity as multielectron redox catalysts 213

Peroxovanadate complexes

Speciation in peroxovanadate systems 77

Phosphatase

Supramolecular interactions of vanadate species: vanadium(V) complexes with *N*-salicylidenehydrazides as versatile models 205

Polypyridyl ligand

Reactions of di-2-pyridylketone oxime in the presence of vanadium(III): crystal structures of the coordination products 197

Potentiometry

Speciation in peroxovanadate systems 77

Rat

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Redox interaction

Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271

Redox reaction

Oxovanadium(III–V) mononuclear complexes and their linear assemblies bearing tetradentate Schiff base ligands: structure and reactivity as multielectron redox catalysts 213

Reduction

Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41

S. cerevisiae

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Schiff base complex

Supramolecular interactions of vanadate species: vanadium(V) complexes with *N*-salicylidenehydrazides as versatile models 205

Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183

Schiff base ligands

Oxovanadium(III–V) mononuclear complexes and their linear

- assemblies bearing tetradentate Schiff base ligands: structure and reactivity as multielectron redox catalysts 213
- Solution speciation
- Interactions of VO(IV) with oligopeptides 123
- Speciation
- Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31
- Speciation in peroxovanadate systems 77
- Structure
- Interactions of VO(IV) with oligopeptides 123
- Structures
- Reactions of di-2-pyridylketone oxime in the presence of vanadium(III): crystal structures of the coordination products 197
- Sulfato complexes
- Structures and properties of multinuclear vanadium(III) complexes: seeking a clue to understand the role of vanadium(III) in ascidians 147
- Sulfide oxidation
- The medicinal and catalytic potential of model complexes of vanadate-dependent haloperoxidases 53
- Sulfoxides
- Vanadium-catalyzed asymmetric oxidations 245
- Thermal dehydrogenation
- Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183
- Thermochromism
- Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183
- Transmetallation
- Oxovanadium(V)-induced oxidative transformations of main-group organometallics 271
- Transport
- Membrane transport of vanadium compounds and the interaction with the erythrocyte membrane 103
- Tunicate
- Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31
- Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41
- Vanadate
- Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113
- (4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13
- Vanadate chelate esters
- Vanadate chelate esters of monoionized diols and carbohydrates 135
- Vanadate esters of aliphatic diols and glycerol
- Vanadate chelate esters of monoionized diols and carbohydrates 135
- Vanadate esters of catechols
- Vanadate chelate esters of monoionized diols and carbohydrates 135
- Vanadate esters of modified carbohydrates
- Vanadate chelate esters of monoionized diols and carbohydrates 135
- Vanadium
- Catalytic oxidations by vanadium complexes 89
- Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31
- Molecular biological approaches to the accumulation and reduction of vanadium by ascidians 41
- Reactions of di-2-pyridylketone oxime in the presence of vanadium(III): crystal structures of the coordination products 197
- Vanadium-catalyzed asymmetric oxidations 245
- Vanadium-based drugs
- Historic perspective and recent developments on the insulin-like actions of vanadium; toward developing vanadium-based drugs for diabetes 3
- Vanadium bromoperoxidase
- Structural studies on the dodecameric vanadium bromoperoxidase from *Corallina* species 65
- Vanadium complex
- Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183
- Vanadium complexes
- Development of the coordination chemistry of vanadium through bis(acetylacetonato)oxovanadium(IV): synthesis, reactivity and structural aspects 163
- Membrane transport of vanadium compounds and the interaction with the erythrocyte membrane 103
- Supramolecular interactions of vanadate species: vanadium(V) complexes with *N*-salicylidenehydrazides as versatile models 205
- The medicinal and catalytic potential of model complexes of vanadate-dependent haloperoxidases 53
- Vanadium-dependent nitrogenase
- Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113
- Vanadium haloperoxidase
- Structural studies on the dodecameric vanadium bromoperoxidase from *Corallina* species 65
- Supramolecular interactions of vanadate species: vanadium(V) complexes with *N*-salicylidenehydrazides as versatile models 205
- Vanadium(III) complexes
- Structures and properties of multinuclear vanadium(III) complexes: seeking a clue to understand the role of vanadium(III) in ascidians 147
- Vanadium-nitrogenase
- Current status of structure function relationships of vanadium nitrogenase 23
- Vanadium(V)
- Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113
- (4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new insulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13
- Vanadium
- Vanadium-based Ziegler–Natta: challenges, promises, problems 229
- Vapochromism
- Tetradentate Schiff base–oxovanadium(IV) complexes: structures and reactivities in the solid state 183
- ^{51}V -NMR
- Applications of ^{51}V NMR spectroscopy to studies of the complexation of vanadium(V) by α -hydroxycarboxylic acids 113
- Speciation in peroxovanadate systems 77
- VO(IV) complexes
- Interactions of VO(IV) with oligopeptides 123
- XAS
- Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31

X-ray

Medium-dependence of vanadium K-edge X-ray absorption spectra with application to blood cells from phlebobranch tunicates 31

Yeast

(4-Hydroxypyridine-2,6-dicarboxylato)oxovanadate(V)—a new in-

sulin-like compound: chemistry, effects on myoblast and yeast cell growth and effects on hyperglycemia in rats with STZ-induced diabetes 13

Ziegler–Natta

Vanadium-based Ziegler–Natta: challenges, promises, problems 229
