

Subject Index of Volume 245

Adipocytes

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

Anticancer

- Coordination and release of NO by ruthenium–dimethylsulfoxide complexes—implications for antimetastases activity 73

Antidiabetic activity

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

Artificial photosynthesis

- Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139

Au-nanoparticles

- Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139

Barium

- The supramolecular chemistry of the sulfonate group in extended solids 49

Bioinorganic chemistry

- Catalytic activation of dioxygen by oximatocobalt(II) and oximatoiron(II) complexes for catecholase-mimetic oxidations of *o*-substituted phenols 85

Biomimetic oxidation

- Catalytic activation of dioxygen by oximatocobalt(II) and oximatoiron(II) complexes for catecholase-mimetic oxidations of *o*-substituted phenols 85

Blood circulation monitoring-electron paramagnetic resonance (BCM-EPR)

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

Building block

- Synthesis and luminescence behaviour of mixed-metal rhenium(I)–copper(I) and –silver(I) alkynyl complexes 39

Carbenes

- Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177

Catalysis

- Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177

Catechol oxidase models

- Catechol oxidase activity of dicopper complexes with N-donor ligands 191

Catecholase mimics

- Catalytic activation of dioxygen by oximatocobalt(II) and oximatoiron(II) complexes for catecholase-mimetic oxidations of *o*-substituted phenols 85

Chemical specification

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

Cobaloxime(II)

- Catalytic activation of dioxygen by oximatocobalt(II) and oximatoiron(II) complexes for catecholase-mimetic oxidations of *o*-substituted phenols 85

Cobalt(II) complexes

- Cobalt(II) complexes of pyridazine or triazole containing ligands: spin-state control 17

Coordination network

- The supramolecular chemistry of the sulfonate group in extended solids 49

Coordinative unsaturation

- Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177

Cytochrome *c*

- Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139

Dimethylsulfoxide

- Coordination and release of NO by ruthenium–dimethylsulfoxide complexes—implications for antimetastases activity 73

Dinuclear copper complexes

- Catechol oxidase activity of dicopper complexes with N-donor ligands 191

Dioxygen

- Catechol oxidase activity of dicopper complexes with N-donor ligands 191

Dioxygen activation

- Catalytic activation of dioxygen by oximatocobalt(II) and oximatoiron(II) complexes for catecholase-mimetic oxidations of *o*-substituted phenols 85

Dithiirane derivatives

- Selected cyclic oligosulfides and oligosulfide S-oxides and their reactions with $(\text{Ph}_3\text{P})_2\text{Pt}(\eta^2\text{-C}_2\text{H}_4)$ 167

Electrochemistry

- A three-ring, linked cyclam derivative and its interaction with selected transition and post-transition metal ions 11

Electron transfer in proteins

- Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139

Functionalized electrode

- Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139

Halfsandwich complexes

- Self-assembled organometallic receptors for small ions 3

Insulin–mimetic activity

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

IR spectroscopy

- Vibrational spectroscopic properties of molybdenum and tungsten N_2 and N_2H_x complexes with depe coligands: comparison to dppe systems and influence of H-bridges 107

Kinetics

- Catechol oxidase activity of dicopper complexes with N-donor ligands 191

- LiF
Self-assembled organometallic receptors for small ions 3
- LiFHF
Self-assembled organometallic receptors for small ions 3
- Ligand
Synthesis and characterization of polymacrocyclic ligands and protonated ions 65
Structure and solution behaviour of rhodium(I) Vaska-type complexes for correlation of steric and electronic properties of tertiary phosphine ligands 121
- Macrobicyclic
Synthesis and characterization of polymacrocyclic ligands and protonated ions 65
- Macrocycle
A three-ring, linked cyclam derivative and its interaction with selected transition and post-transition metal ions 11
- Macrotricyclic
Synthesis and characterization of polymacrocyclic ligands and protonated ions 65
- Magnetochemistry
Cobalt(II) complexes of pyridazine or triazole containing ligands: spin-state control 17
- Materials science
En route from the mystery of molybdenum blue via related manipulatable building blocks to aspects of materials science 153
- Metal alkynyl
Synthesis and luminescence behaviour of mixed-metal rhenium(I)–copper(I) and –silver(I) alkynyl complexes 39
- Mixed-metal
Synthesis and luminescence behaviour of mixed-metal rhenium(I)–copper(I) and –silver(I) alkynyl complexes 39
- MLCT and luminescence behaviour
Synthesis and luminescence behaviour of mixed-metal rhenium(I)–copper(I) and –silver(I) alkynyl complexes 39
- Nano-science
En route from the mystery of molybdenum blue via related manipulatable building blocks to aspects of materials science 153
- Nitrosyl
Coordination and release of NO by ruthenium–dimethylsulfoxide complexes—implications for antimetastases activity 73
- NO-releasing agents
Coordination and release of NO by ruthenium–dimethylsulfoxide complexes—implications for antimetastases activity 73
- Organo nitrogen compounds
Transition metal mediated oxygen transfer to organo nitrogen compounds 95
- Oxidation
Transition metal mediated oxygen transfer to organo nitrogen compounds 95
- Oxidative addition
Selected cyclic oligosulfides and oligosulfide S-oxides and their reactions with $(\text{Ph}_3\text{P})_2\text{Pt}(\eta^2\text{-C}_2\text{H}_4)$ 167
- Photoactive monolayer
Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139
- Photoinduced electron transfer
Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139
- Photosensitizer–electron-acceptor dyad
Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139
- Photoswitch
Vectorial photoinduced electron-transfer in tailored redox-active proteins and supramolecular nanoparticle arrays 139
- Platinum(0) complexes
Selected cyclic oligosulfides and oligosulfide S-oxides and their reactions with $(\text{Ph}_3\text{P})_2\text{Pt}(\eta^2\text{-C}_2\text{H}_4)$ 167
- Platinum(II) complexes
Selected cyclic oligosulfides and oligosulfide S-oxides and their reactions with $(\text{Ph}_3\text{P})_2\text{Pt}(\eta^2\text{-C}_2\text{H}_4)$ 167
- Post-transition metal
A three-ring, linked cyclam derivative and its interaction with selected transition and post-transition metal ions 11
- Protonation
Synthesis and characterization of polymacrocyclic ligands and protonated ions 65
- Pyridazine
Cobalt(II) complexes of pyridazine or triazole containing ligands: spin-state control 17
- Raman spectroscopy
Vibrational spectroscopic properties of molybdenum and tungsten N_2 and N_2H_x complexes with depe coligands: comparison to dppe systems and influence of H-bridges 107
- Reaction mechanisms
Transition metal mediated oxygen transfer to organo nitrogen compounds 95
- Receptors
Self-assembled organometallic receptors for small ions 3
- Redox processes
Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177
- Ring configuration
Synthesis and characterization of polymacrocyclic ligands and protonated ions 65
- Ruthenium
Coordination and release of NO by ruthenium–dimethylsulfoxide complexes—implications for antimetastases activity 73
- Ruthenium amidinates
Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177
- Self-assembly
Self-assembled organometallic receptors for small ions 3
The supramolecular chemistry of the sulfonate group in extended solids 49
- Self-Assembly
En route from the mystery of molybdenum blue via related manipulatable building blocks to aspects of materials science 153
- Silver
The supramolecular chemistry of the sulfonate group in extended solids 49
- Silyl group migration
Chemistry of coordinatively unsaturated organoruthenium amidinates as entry to homogeneous catalysis 177
- Sulfonate
The supramolecular chemistry of the sulfonate group in extended solids 49
- Sulfur heterocycles
Selected cyclic oligosulfides and oligosulfide S-oxides and their reactions with $(\text{Ph}_3\text{P})_2\text{Pt}(\eta^2\text{-C}_2\text{H}_4)$ 167
- Supramolecular
The supramolecular chemistry of the sulfonate group in extended solids 49
- Supra-molecular chemistry
En route from the mystery of molybdenum blue via related manipulatable building blocks to aspects of materials science 153
- Tolman model
Structure and solution behaviour of rhodium(I) Vaska-type complexes for correlation of steric and electronic properties of tertiary phosphine ligands 121

Transition metal

- A three-ring, linked cyclam derivative and its interaction with selected transition and post-transition metal ions 11

trans-[Rh(CO)X(PX₃)]

- Structure and solution behaviour of rhodium(I) Vaska-type complexes for correlation of steric and electronic properties of tertiary phosphine ligands 121

Triazolate

- Cobalt(II) complexes of pyridazine or triazole containing ligands: spin-state control 17

Triazole

- Cobalt(II) complexes of pyridazine or triazole containing ligands: spin-state control 17

Trinuclear

- A three-ring, linked cyclam derivative and its interaction with selected transition and post-transition metal ions 11

Vanadyl–pyridone complexes

- New antidiabetic vanadyl–pyridone complexes: effect of equivalent transformation of coordinating atom in the ligand 31

Vaska-type complexes

- Structure and solution behaviour of rhodium(I) Vaska-type complexes for correlation of steric and electronic properties of tertiary phosphine ligands 121

Vibrational spectroscopy

- Vibrational spectroscopic properties of molybdenum and tungsten N₂ and N₂H_x complexes with depe coligands: comparison to dppe systems and influence of H-bridges 107

XXX

- Structure and solution behaviour of rhodium(I) Vaska-type complexes for correlation of steric and electronic properties of tertiary phosphine ligands 121
