

Subject Index of Volume 248

Absorption spectra

- Charge transfer excitation of organometallic compounds. Spectroscopy and photochemistry 273

Abstraction

- Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535

Acetylide complexes

- Nonlinear optical properties of transition metal acetylides and their derivatives 725

Acyclic ligands

- The challenge of cyclic and acyclic schiff bases and related derivatives 1717

Alcohol

- Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201

Alkali metal

- Structural chemistry and properties of metal arenesulfonates 1061

Alkaline earth metal

- Structural chemistry and properties of metal arenesulfonates 1061

Alkenes

- Allylic oxidation of alkenes with palladium catalysts 2381

Alkoxides

- Metal-assembled compounds: precursors of polymerization catalysts and new materials 1047

Alkoxy carbonylation

- Application of transition metals in hydroformylation annual survey covering the year 2003 867

Alkyl halide

- Grignard reagent formation 623

Alkylidene complexes

- Synthesis and reactivity of α,β -unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627

Alkylidyne complexes

- Redox induced reactions of transition metal vinylidene and related complexes 1679

Alkyne-dimerization

- Vinylideneruthenium complexes in catalysis 1703

Alkynyl complexes

- Nonlinear optical properties of transition metal acetylides and their derivatives 725
- Vinylidenerhodum complexes as promising tools for CC coupling reactions 1693

σ -Alkynyl complexes

- Redox induced reactions of transition metal vinylidene and related complexes 1679

Allenylidene

- Metallacumulenes: from vinylidenes to metal polycarbides 1543
- Ruthenium-allenylidene complexes and their specific behaviour 1585

Allenylidene complexes

- Synthesis and reactivity of α,β -unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627
- π -Donor-substituted metallacumulenes of chromium and tungsten 1659

Allenylidene complexes of ruthenium

- Allenylidene complexes of ruthenium: synthesis, spectroscopy and electron transfer properties 1565

Allyl complexes

- Vinylidenerhodum complexes as promising tools for CC coupling reactions 1693

Aluminum speciation chain

- Studies on the mechanism of hydrolysis and polymerization of aluminum salts in aqueous solution: correlations between the “Core-links” model and “Cage-like” Keggin-Al₁₃ model 441

Alumoxanes

- Metal-assembled compounds: precursors of polymerization catalysts and new materials 1047

Amidates

- N-heterocyclic germylenes and related compounds 411

Amination

- Pyridylthioethers: a promising class of polydentate ligands in palladium and platinum coordination 945

Amine

- Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201

Aminotroponimines

- N-heterocyclic germylenes and related compounds 411

Ammoxidation catalysis

- The role of bismuth in the SOHIO process 429
- Amphiphilic heteroleptic ruthenium(II) sensitizers
- Stepwise assembly of amphiphilic ruthenium sensitizers and their applications in dye-sensitized solar cell 1317

Anticancer

- Recent developments in the synthesis and properties of diruthenium tetracarboxylates 1025

Antimony

- Organometallic compounds with SbSb or BiBi bonds 603

Arene

- Conformational and linkage isomerizations for dihapto-coordinated arenes and aromatic heterocycles: controlling the stereochemistry of ligand transformations 853

Arene complexes

- Manganese tricarbonyl transfer (MTT) reagents in the construction of novel organometallic systems 561

Artificial nucleases

- DNA hydrolysis promoted by di- and multi-nuclear metal complexes 147

Aryl halide

- Grignard reagent formation 623

Asymmetric

- Carbohydrate derivative ligands in asymmetric catalysis 2165

Asymmetric 1,4-addition

- Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151

Asymmetric catalysis

- Progress in stereoselective catalysis by metal complexes with chiral ferrocenyl phosphines 2131

- Asymmetric Diels–Alder reaction
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Asymmetric Heck reaction
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Asymmetric hydrogenation
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Asymmetric induction
Asymmetric catalysis induced by the substrate itself 2193
- Atomic force microscopy (AFM)
Correlation of morphology and device performance in inorganic–organic TiO₂–polythiophene hybrid solid-state solar cells 1491
- Axial chirality
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Axial substitutions
The coordination chemistry of tin porphyrin complexes 299
- Back bonding
Dye sensitization solar cells: a critical assessment of the learning curve 1511
- Bidentate ligand
Synthetic routes to homoleptic and heteroleptic ruthenium(II) complexes incorporating bidentate imine ligands 1329
- Biheteroaromatic diphosphines
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Binary nitrides
Novel group 14 nitrides 493
- Biological imaging
Fluorescent detection of zinc in biological systems: recent development on the design of chemosensors and biosensors 205
- Biopolymers
Photophysical properties of porphyrinoid sensitizers non-covalently bound to host molecules; models for photodynamic therapy 321
- Biphasic catalysis
Catalysis by low oxidation state transition metal (carbonyl) clusters 2443
- Bis-alkoxycarbonylation
Biheteroaromatic diphosphines and their transition metal complexes: synthesis, characterisation and applications in asymmetric catalysis 2151
- Bismuth
The role of bismuth in the SOHIO process 429
Organometallic compounds with SbSb or BiBi bonds 603
- Boron
Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535
- Boryl
Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535
- Borylene
Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535
- Cage-like (Keggin–Al₁₃ structure) model
Studies on the mechanism of hydrolysis and polymerization of aluminum salts in aqueous solution: correlations between the “Core-links” model and “Cage-like” Keggin–Al₁₃ model 441
- Carbene complexes
Synthesis and reactivity of α,β -unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627
- Carbenes
Recent homogeneous catalytic applications of chelate and pincer *N*-heterocyclic carbenes 2239
- Carbocations
Allylic oxidation of alkenes with palladium catalysts 2381
- Carbohydrate ligands
Carbohydrate derivative ligands in asymmetric catalysis 2165
- Carbon
The chemistry of the carbon–transition metal double and triple bond: annual survey covering the year 2002 3
- Carbon dioxide
Recent advances in the homogeneous hydrogenation of carbon dioxide 2425
- Carbon–carbon double bond formation
Catalytic methods for the synthesis of stilbenes with an emphasis on their phytoalexins 2323
- Carbon-rich metal complexes
Ruthenium–allenylidene complexes and their specific behaviour 1585
- Carbonylation
Intramolecular five-membered ring compounds and their applications 995
- o*-Carborane
Advances in the chemistry of organometallic complexes with 1,2-dichalcogenolato-*o*-carborane ligands 587
- Carbyne
Ruthenium–allenylidene complexes and their specific behaviour 1585
- Carrier recombination
Dye-sensitized solar cells made from nanocrystalline TiO₂ films coated with outer layers of different oxide materials 1277
- Cascade catalysis
Tandem catalysis: a taxonomy and illustrative review 2365
- Catalysis
Micellar effect on the kinetics and mechanism of chromium(VI) oxidation of organic substrates 81
Transition metals in organic synthesis: highlights for the year 2002 1085
Ruthenium–allenylidene complexes and their specific behaviour 1585
Vinylideneruthenium complexes in catalysis 1703
Carbohydrate derivative ligands in asymmetric catalysis 2165
Asymmetric catalysis induced by the substrate itself 2193
Stability and reactivity of *N*-heterocyclic carbene complexes 2247
NCN–pincer palladium complexes with multiple anchoring points for functional groups 2275
Copper in cross-coupling reactions. The post-Ullmann chemistry 2337
Tandem catalysis: a taxonomy and illustrative review 2365
Catalysis by low oxidation state transition metal (carbonyl) clusters 2443
Ionic liquids in catalysis 2459
- Catalyst
The development of palladium catalysts for C–C and C–heteroatom bond forming reactions of aryl chloride substrates 2283
- Catalyst homogeneity
Recent homogeneous catalytic applications of chelate and pincer *N*-heterocyclic carbenes 2239
- Catalyst immobilization
Progress in stereoselective catalysis by metal complexes with chiral ferrocenyl phosphines 2131
- Catalytic cooperativity
DNA hydrolysis promoted by di- and multi-nuclear metal complexes 147
- Catalytic properties
Recent homogeneous catalytic applications of chelate and pincer *N*-heterocyclic carbenes 2239
- Cation effects
Cation effects in nanocrystalline solar cells 1391

- C–C bond formation
Ruthenium–allenylidene complexes and their specific behaviour 1585
- C–C bond forming
The development of palladium catalysts for C–C and C–heteroatom bond forming reactions of aryl chloride substrates 2283
- C–C bond forming reaction
Supported catalysts from polymerizable transition metal complexes 377
- C–C coupling
Vinylidenerhodium complexes as promising tools for C–C coupling reactions 1693
- Chalcogenides
Chalcogenide clusters of vanadium, niobium and tantalum 925
- Charge recombination
Kinetics and mechanism of electron injection and charge recombination in dye-sensitized nanocrystalline semiconductors 1195
- Charge transfer
Charge transfer excitation of organometallic compounds. Spectroscopy and photochemistry 273
- Charge transport
Random walk models of charge transfer and transport in dye sensitized systems 1181
- Chemical potential
Interfacial processes in the dye-sensitized solar cell 1215
- Chemical shift
Tungsten-183 nuclear magnetic resonance spectroscopy in the study of polyoxometalates 245
- Chiral substrate
Asymmetric catalysis induced by the substrate itself 2193
- Chromium(VI)
Micellar effect on the kinetics and mechanism of chromium(VI) oxidation of organic substrates 81
- CH...X interactions
Cage CH...X interactions in solid-state structures of icosahedral carboranes 457
- Classification
Tandem catalysis: a taxonomy and illustrative review 2365
- Clusters
(Tetramethylcyclobutadiene)cobalt chemistry 571
Chalcogenide clusters of vanadium, niobium and tantalum 925
Catalysis by low oxidation state transition metal (carbonyl) clusters 2443
- C₃N₄
Novel group 14 nitrides 493
- Cobalt
(Tetramethylcyclobutadiene)cobalt chemistry 571
Hydroformylation studies using high pressure NMR spectroscopy 653
Electrochemical studies of the Co(III)/Co(II)(dbbp)₂ redox couple as a mediator for dye-sensitized nanocrystalline solar cells 1447
Recent advances in high-pressure infrared and NMR techniques for the determination of catalytically active species in rhodium- and cobalt-catalysed hydroformylation reactions 2393
- Compartmental ligands
The challenge of cyclic and acyclic schiff bases and related derivatives 1717
- π-Complex
Allylic oxidation of alkenes with palladium catalysts 2381
- σ-Complex
Allylic oxidation of alkenes with palladium catalysts 2381
- Conducting polymer
Photo-sensitizing ruthenium complexes for solid state dye solar cells in combination with conducting polymers as hole conductors 1469
- Conducting polymers
Polymers in dye sensitized solar cells: overview and perspectives 1455
- Conduction band edge
Electrochemical, spectral, and quartz crystal microgravimetric assessment of conduction band edge energies for nanocrystalline zirconium dioxide/solution interfaces 1225
- Conformational analysis
Structure and bonding in metal sulfoxide complexes: an update 351
- Continuous model
Studies on the mechanism of hydrolysis and polymerization of aluminum salts in aqueous solution: correlations between the “Core-links” model and “Cage-like” Keggin-Al₁₃ model 441
- Continuous production process
A system approach to molecular solar cells 1501
- Cooperative effects
Electronic communication in heterobinuclear organometallic complexes through unsaturated hydrocarbon bridges 683
- Coordination chemistry
Structural chemistry and properties of metal arenesulfonates 1061
- Coordination networks
Manganese tricarbonyl transfer (MTT) reagents in the construction of novel organometallic systems 561
- Copper
Copper in cross-coupling reactions. The post-Ullmann chemistry 2337
- Core-links model
Studies on the mechanism of hydrolysis and polymerization of aluminum salts in aqueous solution: correlations between the “Core-links” model and “Cage-like” Keggin-Al₁₃ model 441
- Core-shell nanomaterials
Core-shell nanoporous electrode for dye sensitized solar cells: the effect of shell characteristics on the electronic properties of the electrode 1271
- Corrosion
Grignard reagent formation 623
- Counter-electrode
Counter-electrode function in nanocrystalline photoelectrochemical cell configurations 1421
- Coupling
The development of palladium catalysts for C–C and C–heteroatom bond forming reactions of aryl chloride substrates 2283
- Coupling constant
Tungsten-183 nuclear magnetic resonance spectroscopy in the study of polyoxometalates 245
- Cr(III)–oxygen complexes
Excited state relaxation of Cr(III) in oxygen environments 261
- Cross-coupling
Copper in cross-coupling reactions. The post-Ullmann chemistry 2337
- Crown ethers
Hydrogen bonding of 18-crown-6 ether to ruthenium–ammine complexes at second sphere 185
- Crystal structures
Cage CH...X interactions in solid-state structures of icosahedral carboranes 457
- C₁-symmetric diphosphines
Progress in stereoselective catalysis by metal complexes with chiral ferrocenyl phosphines 2131
- Cubic nonlinearities
Nonlinear optical properties of transition metal acetylides and their derivatives 725
- Cumulenylidene complexes
Synthesis and reactivity of α,β-unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627
- Cyanogold(I) complexes
The chemistry of cyano complexes of gold(I) with emphasis on the ligand scrambling reactions 231
- Cyclic voltammetry
Redox induced reactions of transition metal vinylidene and related complexes 1679
- Cyclobutadiene
(Tetramethylcyclobutadiene)cobalt chemistry 571
- Cyclometalation
Intramolecular five-membered ring compounds and their applications 995

- Cyclopropyl halide
Grignard reagent formation 623
- Dearomatization
Conformational and linkage isomerizations for dihapto-coordinated arenes and aromatic heterocycles: controlling the stereochemistry of ligand transformations 853
- Decay time
Excited state relaxation of Cr(III) in oxygen environments 261
- Di- and multi-nuclear metal complexes
DNA hydrolysis promoted by di- and multi-nuclear metal complexes 147
- Diblock copolymerization
Group 3 metal catalysts for ethylene and α -olefin polymerization 397
- Diboran(4)yl
Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535
- Dichalcogenolato ligands
Advances in the chemistry of organometallic complexes with 1,2-dichalcogenolato-*o*-carborane ligands 587
- Diethanolamines
Novel heterometallic alkoxide coordination systems of polyols (glycols, di- and tri-ethanolamines) derived from the corresponding homo-metallic moieties 101
- β -Diketiminates
N-heterocyclic germylenes and related compounds 411
- Dimerization
Ionic liquids in catalysis 2459
- Diphenylketene
The beginnings of terminal vinylidene metal complex chemistry through the dicyanomethylene/oxygen analogy: dicyanovinylidene transition metal complexes 1533
- Diruthenium tetracarboxylates
Recent developments in the synthesis and properties of diruthenium tetracarboxylates 1025
- Dispersive transport
Random walk models of charge transfer and transport in dye sensitized systems 1181
- Divalent lanthanides
Molecular compounds of “new” divalent lanthanides 835
- DNA hydrolysis
DNA hydrolysis promoted by di- and multi-nuclear metal complexes 147
- Domino catalysis
Tandem catalysis: a taxonomy and illustrative review 2365
- DSC system
A system approach to molecular solar cells 1501
- DSSC
Porphyrins as light harvesters in the dye-sensitized TiO₂ solar cell 817
Design of molecular dyes for application in photoelectrochemical and electrochromic devices based on nanocrystalline metal oxide semiconductors 1299
Porphyrins as light harvesters in the dye-sensitized TiO₂ solar cell 1363
- Dye photo-stability
Dye sensitization solar cells: a critical assessment of the learning curve 1511
- Dye sensitised
Towards optimisation of electron transfer processes in dye sensitised solar cells 1247
- Dye sensitization
Electrons in nanostructured TiO₂ solar cells: transport, recombination and photovoltaic properties 1165
Dye-sensitized solar cells made from nanocrystalline TiO₂ films coated with outer layers of different oxide materials 1277
Cation effects in nanocrystalline solar cells 1391
Photo-sensitizing ruthenium complexes for solid state dye solar cells in combination with conducting polymers as hole conductors 1469
- Dye sensitization cell
Dye sensitization solar cells: a critical assessment of the learning curve 1511
- Dye-cells
Metal complex sensitizers in dye-sensitized solar cells 1343
- Dye-sensitized
Random walk models of charge transfer and transport in dye sensitized systems 1181
Design of molecular dyes for application in photoelectrochemical and electrochromic devices based on nanocrystalline metal oxide semiconductors 1299
Electrochemical studies of the Co(III)/Co(II)(dbbp)₂ redox couple as a mediator for dye-sensitized nanocrystalline solar cells 1447
- Dye-sensitized solar cells
Kinetics and mechanism of electron injection and charge recombination in dye-sensitized nanocrystalline semiconductors 1195
Interfacial processes in the dye-sensitized solar cell 1215
Stepwise assembly of amphiphilic ruthenium sensitizers and their applications in dye-sensitized solar cell 1317
Metal complex sensitizers in dye-sensitized solar cells 1343
Significant influence of TiO₂ photoelectrode morphology on the energy conversion efficiency of N719 dye-sensitized solar cell 1381
A system approach to molecular solar cells 1501
- Electrocatalysis
Ionic liquids in catalysis 2459
- Electrochemical polymerization
Photo-sensitizing ruthenium complexes for solid state dye solar cells in combination with conducting polymers as hole conductors 1469
- Electrochromic
Design of molecular dyes for application in photoelectrochemical and electrochromic devices based on nanocrystalline metal oxide semiconductors 1299
- Electron injection
Kinetics and mechanism of electron injection and charge recombination in dye-sensitized nanocrystalline semiconductors 1195
Ultrafast electron injection from metal polypyridyl complexes to metal-oxide nanocrystalline thin films 1231
- Electron transfer (ET)
Electronic communication in heterobinuclear organometallic complexes through unsaturated hydrocarbon bridges 683
Ultrafast electron injection from metal polypyridyl complexes to metal-oxide nanocrystalline thin films 1231
Towards optimisation of electron transfer processes in dye sensitised solar cells 1247
Primary and final charge separation in the nano-structured dye-sensitized electrochemical solar cell 1259
Dye sensitization solar cells: a critical assessment of the learning curve 1511
Allenylidene complexes of ruthenium: synthesis, spectroscopy and electron transfer properties 1565
- Electron transfer theory
Kinetics and mechanism of electron injection and charge recombination in dye-sensitized nanocrystalline semiconductors 1195
- Emission spectra
Excited state relaxation of Cr(III) in oxygen environments 261
Charge transfer excitation of organometallic compounds. Spectroscopy and photochemistry 273
- Enantioselective
Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201
- Enantioselectivity
Carbohydrate derivative ligands in asymmetric catalysis 2165
- Energy conversion
Metal complex sensitizers in dye-sensitized solar cells 1343

- Equilibrium constant
The chemistry of cyano complexes of gold(I) with emphasis on the ligand scrambling reactions 231
- Excited states
Photophysical properties of porphyrinoid sensitizers non-covalently bound to host molecules; models for photodynamic therapy 321
- Experimental studies
Redox processes involving hydrocarbylmetal (*N*-heterocyclic carbene) complexes and associated imidazolium salts: ramifications for catalysis 671
- Femtosecond spectroscopy
Primary and final charge separation in the nano-structured dye-sensitized electrochemical solar cell 1259
- Ferrocene
From long-chain conjugated oligomers to dendrimers: synthesis and physical properties of phenyl-ethenyl-ferrocenyl containing one- and two-dimensional complexes 279
- Ferrocenyl phosphines
Progress in stereoselective catalysis by metal complexes with chiral ferrocenyl phosphines 2131
- Five-membered ring
Intramolecular five-membered ring compounds and their applications 995
- Fluorescence and phosphorescence
Excited state relaxation of Cr(III) in oxygen environments 261
- Fluorescent probe
Fluorescent detection of zinc in biological systems: recent development on the design of chemosensors and biosensors 205
- Fluorophore
Fluorescent detection of zinc in biological systems: recent development on the design of chemosensors and biosensors 205
- Formamides
Recent advances in the homogeneous hydrogenation of carbon dioxide 2425
- Formic acid
Recent advances in the homogeneous hydrogenation of carbon dioxide 2425
- Friction mapping
Correlation of morphology and device performance in inorganic-organic TiO₂-polythiophene hybrid solid-state solar cells 1491
- Glycolates
Novel heterometallic alkoxide coordination systems of polyols (glycols, di- and tri-ethanolamines) derived from the corresponding homometallic moieties 101
- Gold(I) metabolites
The chemistry of cyano complexes of gold(I) with emphasis on the ligand scrambling reactions 231
- Grätzel cell
Electrons in nanostructured TiO₂ solar cells: transport, recombination and photovoltaic properties 1165
- Grignard reagents
Grignard reagent formation 623
- Half-sandwich complexes
Synthesis and reactivity of α,β -unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627
- Halide
Transition metal boryl and borylene complexes: substitution and abstraction chemistry 535
- Heteroatom
The development of palladium catalysts for C–C and C–heteroatom bond forming reactions of aryl chloride substrates 2283
- Heterobimetallic complexes
Electronic communication in heterobinuclear organometallic complexes through unsaturated hydrocarbon bridges 683
- N*-heterocyclic carbenes
Stability and reactivity of *N*-heterocyclic carbene complexes 2247
- Heteroleptic complex
Synthetic routes to homoleptic and heteroleptic ruthenium(II) complexes incorporating bidentate imine ligands 1329
- Heterometallic alkoxides
Novel heterometallic alkoxide coordination systems of polyols (glycols, di- and tri-ethanolamines) derived from the corresponding homometallic moieties 101
- Heterosupramolecular
Design of molecular dyes for application in photoelectrochemical and electrochromic devices based on nanocrystalline metal oxide semiconductors 1299
- Heterothiometalates
Heterothiometallic polymeric clusters 169
- High pressure NMR
Hydroformylation studies using high pressure NMR spectroscopy 653
- High-pressure NMR and IR
Recent advances in high-pressure infrared and NMR techniques for the determination of catalytically active species in rhodium- and cobalt-catalysed hydroformylation reactions 2393
- Homogeneous catalysis
Coordination chemistry of 1,3,5-triaza-7-phosphaadamantane (PTA). Transition metal complexes and related catalytic, medicinal and photoluminescent applications 955
Recent advances in the homogeneous hydrogenation of carbon dioxide 2425
- Homogeneous model systems
The role of bismuth in the SOHIO process 429
- Homoleptic complex
Synthetic routes to homoleptic and heteroleptic ruthenium(II) complexes incorporating bidentate imine ligands 1329
- Hydroaminomethylation
Application of transition metals in hydroformylation annual survey covering the year 2003 867
- Hydroformylation
Hydroformylation studies using high pressure NMR spectroscopy 653
Application of transition metals in hydroformylation annual survey covering the year 2003 867
Tandem catalysis: a taxonomy and illustrative review 2365
Recent advances in high-pressure infrared and NMR techniques for the determination of catalytically active species in rhodium- and cobalt-catalysed hydroformylation reactions 2393
In situ mechanistic studies in rhodium catalyzed hydroformylation of alkenes 2409
Ionic liquids in catalysis 2459
- Hydrogen bonding
Hydrogen bonding of 18-crown-6 ether to ruthenium–ammine complexes at second sphere 185
- Hydrogenation
Supported catalysts from polymerizable transition metal complexes 377
Recent advances in the homogeneous hydrogenation of carbon dioxide 2425
Ionic liquids in catalysis 2459
- Hydrogenation catalyst
Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201
- Hydrophobic ruthenium complexes
Stepwise assembly of amphiphilic ruthenium sensitizers and their applications in dye-sensitized solar cell 1317
- Hydroxycarbonylation
Application of transition metals in hydroformylation annual survey covering the year 2003 867
- Hyperpolarizabilities
Nonlinear optical properties of transition metal acetylides and their derivatives 725

Icosahedral carboranes

Cage CH...X interactions in solid-state structures of icosahedral carboranes 457

Imine

Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201

Immobilisation

Catalysis by low oxidation state transition metal (carbonyl) clusters 2443

Insertion reactions

Pyridylthioethers: a promising class of polydentate ligands in palladium and platinum coordination 945

π -Donor-substituted metallocumulenes of chromium and tungsten 1659

Interface

Interfacial processes in the dye-sensitized solar cell 1215

Intramolecular compounds

Intramolecular five-membered ring compounds and their applications 995

Ionic liquid

Photo-sensitizing ruthenium complexes for solid state dye solar cells in combination with conducting polymers as hole conductors 1469

Ionic liquids in catalysis 2459

Ionophore

Fluorescent detection of zinc in biological systems: recent development on the design of chemosensors and biosensors 205

IR data

Structure and bonding in metal sulfoxide complexes: an update 351

Iron, Ruthenium and osmium complexes

Synthesis and reactivity of α,β -unsaturated alkylidene and cumulenylidene Group 8 half-sandwich complexes 1627

Isomerization

Conformational and linkage isomerizations for dihapto-coordinated arenes and aromatic heterocycles: controlling the stereochemistry of ligand transformations 853

Catalytic methods for the synthesis of stilbenes with an emphasis on their phytoalexins 2323

Ketone

Mechanisms of the H₂-hydrogenation and transfer hydrogenation of polar bonds catalyzed by ruthenium hydride complexes 2201

Kinetics

Micellar effect on the kinetics and mechanism of chromium(VI) oxidation of organic substrates 81

Lanthanide

Group 3 metal catalysts for ethylene and α -olefin polymerization 397

Advances in the chemistry of organometallic complexes with 1,2-dichalcogenolato-*o*-carborane ligands 587

Late transition metal complexes

Stability and reactivity of *N*-heterocyclic carbene complexes 2247

Ligand design

NCN-pincer palladium complexes with multiple anchoring points for functional groups 2275

Ligand scrambling

The chemistry of cyano complexes of gold(I) with emphasis on the ligand scrambling reactions 231

Ligands

In situ mechanistic studies in rhodium catalyzed hydroformylation of alkenes 2409

Light scattering

Significant influence of TiO₂ photoelectrode morphology on the energy conversion efficiency of N719 dye-sensitized solar cell 1381

Linkers

Linkers for anchoring sensitizers to semiconductor nanoparticles 1283

Luminescence

Coordination chemistry of 1,3,5-triaza-7-phosphaadamantane (PTA). Transition metal complexes and related catalytic, medicinal and photoluminescent applications 955

Macrocycles

The challenge of cyclic and acyclic schiff bases and related derivatives 1717

Magnesium

Grignard reagent formation 623

Magnesium hydroxide

Grignard reagent formation 623

Magnesium oxide

Grignard reagent formation 623

Dye-sensitized solar cells made from nanocrystalline TiO₂ films coated with outer layers of different oxide materials 1277

Magnetic susceptibility

Zero-field splitting in metal complexes 757

Magnetism

Zero-field splitting in metal complexes 757

Recent developments in the synthesis and properties of diruthenium tetracarboxylates 1025

Magnetization

Zero-field splitting in metal complexes 757

Manganese

Manganese tricarbonyl transfer (MTT) reagents in the construction of novel organometallic systems 561

Mass-transport

Counter-electrode function in nanocrystalline photoelectrochemical cell configurations 1421

Mechanism

Interfacial processes in the dye-sensitized solar cell 1215

Medicinal chemistry

Coordination chemistry of 1,3,5-triaza-7-phosphaadamantane (PTA). Transition metal complexes and related catalytic, medicinal and photoluminescent applications 955

Mesogens

Recent developments in the synthesis and properties of diruthenium tetracarboxylates 1025

Metal carbides

Metallacumulenes: from vinylidenes to metal polycarbides 1543

Metal complexes

Structure and bonding in metal sulfoxide complexes: an update 351

Metal containing monomers

Supported catalysts from polymerizable transition metal complexes 377

Metal polycarbides

Metallacumulenes: from vinylidenes to metal polycarbides 1543

Metal-catalyzed cross-coupling

Intramolecular five-membered ring compounds and their applications 995

Metal-complexes

Redox processes involving hydrocarbylmethyl (*N*-heterocyclic carbene) complexes and associated imidazolium salts: ramifications for catalysis 671

Metallacarboranes

(Tetramethylcyclobutadiene)cobalt chemistry 571

Metallacumulenes

Metallacumulenes: from vinylidenes to metal polycarbides 1543

π -Donor-substituted metallacumulenes of chromium and tungsten 1659

Metallated

Contribution to the SAR field of metallated and coordination complexes. Studies of the palladium and platinum derivatives with selected thiosemicarbazones as antitumoral drugs 119

Metallocenes

Group 3 metal catalysts for ethylene and α -olefin polymerization 397

Metalloporphyrins

The coordination chemistry of tin porphyrin complexes 299

- Mixed-valence
Design of molecular dyes for application in photoelectrochemical and electrochromic devices based on nanocrystalline metal oxide semiconductors 1299
- Mixed-valence chemistry
Electronic communication in heterobinuclear organometallic complexes through unsaturated hydrocarbon bridges 683
