

Contents[☆]

Reviews

The coordination chemistry of boraamidinate ligands C. Fedorchuk, M. Copsey and T. Chivers	897
Non-hydride systems of the main group elements as hydrogen storage materials H.W. Langmi and G.S. McGrady	925
Stable compounds containing heavier group 15 elements in the +1 oxidation state B.D. Ellis and C.L.B. Macdonald	936
From molecules to bismuth oxide-based materials: Potential homo- and heterometallic precursors and model compounds M. Mehring	974
Stretching bonds in main group element compounds—Borderlines between biradicals and closed-shell species F. Breher	1007
