

Corrigendum

Corrigendum to “Investigation of alkyl metal intermediate formation in the rhodium-catalyzed hydroformylation: Experimental and theoretical approaches” [Coord. Chem. Rev. 254 (2010) 696–706]

The authors regret that the second lines of the equations on pages 701 and 705 were not correct at the time of publication. The correct equations now appear below.

$$b : l = k_b : k_l = \frac{\sum e^{-\Delta G_b^\ddagger / RT}}{\sum e^{-\Delta E_b^\ddagger / RT}} : \frac{\sum e^{-\Delta G_l^\ddagger / RT}}{\sum e^{-\Delta E_l^\ddagger / RT}}$$

and

$$b1 : b2 = k_{b1} : k_{b2} = \frac{\sum e^{-\Delta G_{b1}^\ddagger / RT}}{\sum e^{-\Delta E_{b1}^\ddagger / RT}} : \frac{\sum e^{-\Delta G_{b2}^\ddagger / RT}}{\sum e^{-\Delta E_{b2}^\ddagger / RT}}$$
