## Letter from the Editor

Dear Readers,

I spent some time reading my letters from the Editor-in-Chief this past month. This Journal has grown quite a bit over the 15 or so years encompassed in that collection of thoughts and hopes. I look forward to another prosperous New Year and wish you personally the same!

I would be happy to receive your ideas of what topics it would be good to see reviews about. Topics need not be older, established areas alone. I recall when the very first paper was given on Vapour Phase Fractometry was presented at a Gordon Conference. The wisest present allowed it was interesting but that it looked as though what could be done was already done. VPF became known as Gas Chromatography and was the subject of thousands of primary papers published in the following years.

This Journal as always is happy to consider unsolicited articles in any area of measurement. Feel free to write myself or any member of the Board.

**Prof. C. H. Lochmüller**  
**Editor-in-Chief**
