

# Erratum

In the upper panel of Figure 4 of the article, “The Mu transpososome through a topological lens,” the arrows in the four-noded ( $2+, 2-$ ) and five-noded ( $5-$ ) knots are oriented incorrectly. They should point head-to-head (sites for DNA inversion), as in the preceding plasmids (substrate; unknot; three-noded ( $3-$ ) knot). Shown here is the corrected figure.
