LETTER FROM THE EDITOR

This issue of *CRAC* introduces another feature for the subscriber and reader — book reviews. We hope to bring you reviews of books that have some relationship with measurements science and analytical chemistry. The books reviewed will include books aimed at several levels of interest and user-specialty groups, with a guide to reviewers that asks for comments on the book as a possible tool or reference for all the readers of the Journal.

We are developing a method to let you know in advance of the topical areas of upcoming articles and the intended publication date. This may first be done on the Web site given that papers appear there before the paper copy appears. As Editor-in-Chief, I am pleased with the diverse number of visitors we get at the Site and the remarkable number of 'downloads' that have occurred. Please visit the site at your convenience (<http://www.crcpress.com/jour/crac/crac.htm>) and look for news of upcoming articles, articles awaiting paper copy release, changes to the Editorial Board, news of the proposed *CRAC* Internet mail-list, and more. One possible feature is a link page, where you can click and be connected to other measurement science-related Web sites.

When you are at the Web site, send me or any Editorial Board member e-mail and suggest topical areas you would like to see reviews devoted to, potential authors of articles, or any other comment you would like to offer. Journals are intended for the distribution of knowledge and the content should reflect the interests of the Board and the readership. Any and all comments are welcome.

C. H. Lochmüller
Editor-in-Chief, CRAC
