Subject Index

BR: Book review CR: Conference report

A	Affinity NMR, combinatorial	Annona squamosa 351
A₁ adenosine receptor	screening 242	2nd Annual International
antagonists 240	Affymetrix 14	Conference on Cell
Academia, trends in awareness	Africa, biodiversity inventory	Signaling: Signal
of value of research 436	401	Transduction and Gene
Academic research,	AGENE Research Institute 394	Transcription 443–445
commercialization 421	Aging, research, in Japan 394	3rd Annual Conference of the
ACAT inhibitors see Acyl-CoA	Agmatine (CR) 446	Society for Biomolecular
cholesterol acyltransferase	Agouti signaling protein (ASP)	Screening 7-9
(ACAT)	254	Anthraquinone 235, 236
Accelerated Intelligent Drug	Agriculture, animal, animal	Anti-angiogenic activity,
Design (AIDD) system (CR)	embryo as drug target	anticancer drugs 147
199	367–369	Antiatherosclerotic agents, ACAT
Acetogenins, bioactive 351	Airway inflammation	inhibitors 19-25
Acetylcholine, enhancers of	(CR) 431	Antibiotics
action 219	drug management (CR)	discovery, at level of gene
Acetylcholine receptors	532–535	564–566
muscarinic see Muscarinic	Akagerine 235 Alcuronium 215	macrolides <i>see</i> Macrolides for methicillin-resistant
acetylcholine receptors	Alcuronium 215 Alendronate 69–77	Staphylococcus aureus
nicotinic <i>see</i> Nicotinic acetylcholine receptors	bone quality affected by 75,	480
•	76	new developmen targets
Actinoplanic acid B 32 Acyl-CoA cholesterol	effect on bone mineral density	495–504
acyltransferase (ACAT)	74, 75	pilus biogenesis 498, 499
enzymology 19, 20	effect on bone turnover 74	resistance 495
expression and regulation 20	fracture incidence 76	bacterial species 495
inhibitors 19–25	safety 77, 78	macrolide 259
adrenal toxicity 23	structure 70	Antibodies
adrenotoxic agents 24	Alosetron, in irritable bowel	humanized (CR) 439, 440
bioavailable 21	disease 402	therapeutic see Therapeutic
early clinical studies 21,	Alprazolam 472	antibodies
22	Alzheimer's disease, marijuana	Antibody-based drug research,
non-adrenotoxic agents	144	company collaboration
25	American Chemical Society	332
strategies to avoid adrenal	(ACS), on Ritalin 248	Anticancer drugs see Anti tumor
toxicity 24	Amersham Pharmacia Biotech	agents
isoforms 20	(APBiotech)	Anti-CD3, SMART (CR) 440
Adenosine deaminase, inhibitor,	acquisition of Molecular	Antidepressants, in idiopathic
combinatorial library 192	Dynamics 439	parkinsonism 137
Adhesion molecules	agreement with Imaging Research Inc. 438	Antidiabetic drugs, troglitazone see Troglitazor e
drug target in asthma (CR) 396	imaging technology for HTS	Antifolates
inhibitors, in airway	438, 439	flexible 540
inflammation management	Amines, linkers for and release	modelling new drugs 543,
(CR) 533	556	544
see also ICAM-3	Aminopeptidase N inhibitors,	Antifungal agents, discovery (CR)
Adrenal toxicity, ACAT inhibitors	nonpeptide 240	102
23, 24	Anandamide 144	Antigene oligonuclectides 45,
Adrenergic agents, combinatorial	Androgen receptor, nonsteroidal	144 (correction)
library 388	agonist 239, 240	synthesis methods 45
α ₁ -Adrenoceptor antagonists 240	Angiostatin, media hype and	Antihypertensive agent, selenium
$lpha_{\text{1A}}$ -antagonists, uroselective	impact 433, 434	compounds 51
44	ANGIS (Australian National	Anti-IgE therapy, asthma (CR)
α_{1B} -antagonists, potent 350,	Genomic Information	395, 396
351	Service) 527	Anti-IL-12 mAb (CR) 441
α ₂ -Adrenoceptors, for LNP509	Animal agriculture, animal	Anti-inflammatory effects,
(CR) 445 β-Adrenoceptors	embryo as drug target 367–369	cytokines (CR) 397 Anti-leukointegrin, humanized, for
in adipose tissue 254, 255	Animal cells, SAGE analysis	acute inflammatory
agonists 388	158	disorders (CR) 440
β_3 -agonists 255	Animal models, functional	Antileukotrienes, for asthma (CR)
as weight control drug	evaluation of genes 186,	395
target 426	187	Antimalarial drugs 538-546

antifolates see Antifolates	selection 265-268	Award for Distinguished
novel, modelling 546	stability 271, 272	Achievement in Cancer
resistance 538, 539	target validation and	Research (CR) 199
Anti-MRSA agents 480	identification 272	Azalides 258
Antinephritic agent, novel 239	therapeutic applications	Azithromycin 2:58
Antioxidant activity	269–272	_
benzoxathioles 81	Aqueous separations, techniques	B
glutathione 114	509, 510	Bacteria
hypolipidemic agents 80	2-Arachidonylglycerol 144	antibiotic resistance 495,
Antisense constructs, interleukin	Arachnova 529, 530	496
6 (IL-6) 211	interview with founder	cell wall anchoring proteins
Antistasin 224, 225	435–437	500, 501
Anti-TGFβ mAbs, for fibrosis	Argatroban 107	genomics 564
prevention (CR) 441, 442 Antithrombotic agents	Arginine vasopressin, antagonists	Gram-positive surface protein
factor Xa inhibitors 223	481 Ariflo (SB207499) (CR) 533	expressior, pathway 500,
see also Factor Xa inhibitors		501
Antitumor agents	Arimidex, discovery (CR) 102 ARNIE (solution-phase organic	phylogenetic tree 565
design based on	synthesizer) 506	virulence 496
farnesyltransferase	Arylpiperazide derivatives,	BAF [boc-asparty/(O-methyl)-
inhibition 26–33	phenylpiperazines 189	fluoromethylketone] 359, 360
discodermolide 300	Arylsilyl linker 45	Bafilomycin A1 387
market size 349	Aspartic protease inhibitors,	Basic fibroblast growth factor
natural agent 351	screening 110, 111	(bFGF) 333
oral 189	Asparvenone 142	Batimastat, discovery (CR) 101,
quinone-based compounds	Asthma	102
522	airway inflammation	Bayer AG
see also Chemotherapy	management (CR)	collaboration with Genzyme
Antitumor effects, of IL-6 207,	532–535	Corp 67
208	phosphodiesterase inhibitors	crop protection agents
Antiviral therapy, influenza virus	(CR) 532, 533	collaboration 332
see Influenza virus	Asthma drugs (CR) 395–399	Bead-based assays 318
Anxiety 471, 472	adhesion molecules as target	Beilstein registry 57
chronicity 477, 478	(CR) 396	Benign prostatic hyperplasia
classification of disorders	anti-IgE therapy (CR) 395,	(BPH) 44
476	396	PhotoPoint therapy 47
comorbidity of disorders 477	clinical study design (CR)	Benzimidazoles (CR) 49
generalized, disorder (GAD)	395	Benzodiazepines 471–474
472, 477	cytokines (CR) 396–398	abuse reliability 473, 474
treatment <i>see</i> Anxiolytic therapy	drug development delays (CR) 395	alternatives 474–476
Anxiolytic therapy 471–479	gene expression and	cognitive impairment by 473
benzodiazepines 471–474	proteomics approach (CR)	motor impairment by 473 rage 473
alternatives to 474–476	398, 399	Benzoxathioles, antioxidant
high placebo response rate	MAP kinase inhibitors (CR)	activity 81
problem 476, 477	398	Benzyl bromide linkers (CR) 48
new drug development	novel glucocorticoids (CF)	Benzyloxyisoquinoline 524
problems 476–478	398	Berlex Labs, factor Xa inhibitor
types 472-476	Atherogenesis, troglitazone	227
AP-1	treatment 87	Bestatin 240
effect of oxidants/antioxidants	Atopic eczema, FDA approval for	BG9719 240
on 120	Zemaphyte 60	BIBP3226 (NPY Y receptor
inhibitor 296, 425	Attention deficit hyperactivity	antagonist) 253
Apoptosis	disorder (ADHD) 248	Bicalutamide 239, 240
caspase inhibitor effect 360	Aurora Bioscience 12	Bile acids 409–418
caspase role 359	Autoimmune diseases,	biosynthesis 409, 410
control, glutathione role 119, 120	interleukin 6 (IL-6) 205	chlorambucil conjugates
efficacy of chemotherapeutic	Automated systems 343-349	412, 413
agents, assay 4	automated tools (listing) 345	in combinatorial chemistry
Fas-mediated, caspase-8	combinatorial chemistry 344, 345	417, 418
initiating 525	genomics 348	dimeric and trimeric 416, 417
Aptamers 265	HTS see High-throughput	drug targeting to liver/intestine
advantages 268, 269	screening (HTS)	by 411–4.5
affinity, improvements 269,	library management see	enterohepatic circulation 410
270	Compound library	inhibition 415, 416
efficacy 270, 271	management	HMG-CoA reductase inhibitor
generation 266, 267	The Automation Partnership,	conjugates 414, 415
as research reagents 272,	robotic system for cell	HMG-CoA reductase inhibitor
273	culture (CR) 446	hybrids with 415

metabolism 410, 411	Biopharmaceuticals	Bristol-Myers Squibb
as nonpeptide scaffolds 417, 418	investment status 391, 392 market size 391	Award for Distinguished Achievement ir Cancer
peptide drug conjugates	Biopsy material, human, in pre-	Research (CR) 199
413, 414 reabsorption inhibition 415,	clinical discovery (CR) 193	matrix metalloprotainase inhibitors 196
416	Biosensors, voltage-gated ion	British Biotech (CR) 101, 102
sequestrants 416 as shuttles for drugs	channel drug discovery 331	Bromazepam 472 Bullacin B 351
412–415	Bioseparation, combinatorial	Buspirone 475
structural properties 409,	technology application 50 BioSignal, acquisition by Packard	Buthionine sulphoximine (BSO) 113
410 transport systems 410,	BioScience Company 422	BZA2B and BZA5B 30
411 Diadia a 2220/2 215	Biotechnology companies drugs/NCEs developed 492,	С
Binding assays 315 Binding constants, simultaneous	493	C3b, target in phage-display
measurement 388	numbers and markets 392	373 C7/3'-phth 215
Bio '98, therapeutic antibodies (CR) 439–442	partnerships 17, 18 see also Biopharmaceuticals;	C1976, ACAT inhibitor 21, 22
Biochips	Pharmaceutical companies	CAAX motif 26
applications 486 microfabrication (CR) 485,	BiP, target in phage display 374 Bisbenzamidine isoxazoline	CAAX tetrapeptides 28, 29 Caco-2 cell, drug metabolism and
486	derivatives 141	toxicology studies (CR) 8
re-use <i>vs</i> disposable 486 Biodiversity 246, 247	Bisphosphonates mode of action 71	Caenorhabditis elegans, gene function studies 187
bioprospecting or biopiracy?	osteoporosis treatment	Calcium channels 324
(CR) 399–402 chemodiversity 232–238	73–78 pharmacokinetics 70	blockers 326 from conotoxin (CR) 531
economic pressures (CR)	pharmacological properties	Caliper Technologies Corp.,
399, 400 international system (CR)	69, 70 safety and efficacy 71–73	miniaturized analytical instruments, agreement
400, 401	structures 70	342
inventories (CR) 401 limitation to antibiotic	<i>see also</i> Alendronate Bis-quinolinium cyclophanes	Cancer apoptosis of cells, efficacy of
discovery 565, 566	190	chemotherapeutic agents
marine environment 300, 301	BLAST search (CR) 198 Blood pressure, reduction with	4 -directed drugs 47
'mining' 490	selenium compounds 51	full-length sequence
natural extracts assessment 489, 490	BMS184467 and BMS184382 31	information on genes 92 generic drug market 349
assessment 489, 490 isolation 490	BMS185878 and BMS186511	interleukin 6 (IL-6) in 207
see also Diversity of	31 PMS197257 /B. adronocentor	media hype over drug discoveries 433, 434
compounds; Molecular diversity	BMS187257 (β ₃ -adrenoceptor agonist) 255	photoactive therapy 47
Biogenic amines, control of body	BMS193269 30	product launches 260 research in Japan 394
weight 254–256 Bioinformatics	Boehringer Mannheim, factor Xa inhibitor 227	research in Japan 394 risk with estrogen
advantages/disadvantages of	Bone	replacement therapy 200
systems 526 (CR) 9	metabolism, IL-6 role 203, 204	'vascular addresses' 147 see also Anti tumor agents;
high-throughput (CR) 198,	mineral density, alendronate	Tumors
199 integrated approach	effect 74, 75 quality and alendronate effect	Cancer Genome Anatomy Project (CGAP) 361
525–527	75, 76	Cannabinoid receptors 389
integration with evolutionary biology 564	resorption IL-6 role 208, 209	selective CB ₂ antagonists 388, 389
limitations and challenges (CR)	inhibitors 387	Carbapenems, for MRSA 480
198 options 527	turnover, alendronate effect 74	Carbergoline actions, adverse effects and
proteomics application (CR)	Botanical products, FDA approval	dosages 132 135
195	for Zemaphyte 60 Brain	in idiopathic parkinsonism 135, 136
training and courses 426–428	damage, caspase inhibitors	Carbohydrate synthesis, solid-
Zeneca Pharmaceuticals (CR)	preventing 359, 360	phase 482, 483 β-Carbolines 474
197 BioMedNet 243	development, model 13 Brain-derived neurotrophic factor	Carboxylic acids, linkers for 555
Biomolecular screening 304	(BDNF) 138	Cardiac cells, fetal 367
(CR) 7–9 <i>see also</i> High-throughput	Breast carcinoma, antitumor effect of IL-6 207	Cardiac myxoma, interleukin 6 (IL-6) 205
screening (HTS)	Brevetoxins (CR) 532	Carpipramine 475

Case Histories in Drug Discovery	Chemical libraries	CL316243 (β ₃ -adrenoceptor
and Design (SMR	diversity 513, 514	agonist) 255
symposium) 50, 101, 102	high-speed parallel synthesis	CLAIMS database 58, 59
Caspase-8, as emerging	512	Clarithromycin 258
molecular target 525	Chemiluminescence nitrogen	Clinical diagnostics
Caspase enzymes 359	detector (CLIND) 483	miniaturization 405
inhibitors, BAF 359, 360	Chemodeoxycholic acid 409,	pharmaceutical HTS vs 315,
Castleman's disease, interleukin	410, 417	316
6 (IL-6) 205	Chemodiversity of nature	pharmaceutical technology
Catechol-O-methyltransferase	232–238	merging 408
(COMT) inhibitors see	Chemokines 398, 534	proteomics applications (CR)
COMT inhibitors	drug targets 518	194
Cathenamine 235	in inflammation 517, 518	Clinical study des gn, asthma
Cathepsin D inhibitors	inhibitors (CR) 534	drugs (CR) 395
combinatorial design 280	natural inhibitors 518	Clondronate, structure 70
combinatorial library (CR)	Chemotaxis, drug targets 518	Clonidine, history (CR) 445
150	Chemotaxonomy, plant species	Clorazepate 472
CCD camera systems, for ultra-	236	Clozapine, in idiopathic
HTS 438	Chemotherapy	parkinsonis m 137
CCR1 antagonists 518	customized 4 malignant cell response and	CNS inflammation, interleukin 6
CD8+ cells, receptor binding HIV for immune evasion 298	glutathione role 113–121	(IL-6) in 205 Coagulation 223, 224
	see also Antitumor agents	Colony-stimulating factors (CSFs),
CD45 phosphatase, compounds inhibiting 462–464	ChemWeb 243, 244	therapeutic uses 122,
cDNA	Chenodeoxycholic acid 411	123
candidate genes 185	Chin 3/6 215	Colorectal cancer fats triggering
human sequences 90–92	Chinese medicinal herbs 351	535
SAGE procedure 155	Chip-based screening	Combinatorial chemistry
sequencing of full-length	technologies 311, 312	adenosine deaminase inhibitor
inserts 91	Chip technology 14, 15	library 19/2
wet-chip devices 405	companies involved 14, 15	automated syrithesis 344,
Cell adhesion molecules see	see also Biochips; DNA chips	345
Adhesion molecules	Chiral drugs, pharmacokinetics	automation 344, 345
Cell-based assays 316	248	bile acids 417, 418
biomolecular screening (CR)	Chiroscience, matrix	cathepsin D inhibitors 280
7, 8	metalloproteinase inhibitors	consortia for cost-effective
luciferase assays, HTS 65	196	drug discovery 1, 2
reporter assays, in	Chlorambucil, bile acid conjugates	DNA-binding compound library
miniaturized HTS 320,	412, 413	143
321	Cholecystokinin	enzyme-labile inker 425,
Cell culture, robotic system (CR)	antagonists 280	426
446	receptors, anxiolytic drugs	evolutionary 379–385
Cell-cycle inhibitors 142	acting at 475, 476	explosion of compounds 108
Cell lines, tumor, glabracins A and	Cholesterol biosynthesis control 389	factor Xa inhib tors 223–231,
B active against 481	esterification 19	297
Cell signaling (CR) 443–445	Cholesterol-lowering drugs,	gene expression inhibitor 425
Cell surface receptors, phage- displayed peptide libraries	development 389, 390	high-speed parallel synthesis
373	Cholic acid 409–411	(HSPS) 5' 1–515
Central nervous system (CNS)	Chromatography	human papillomavirus E2
inflammation, IL-6 in 205	MALDI-TOF-MS with (CR)	binders 143, 144
Cephalosporin derivatives, for	194	hydroxamate synthesis on
MRSA 480	molecular diversity	solid phase 352
CGP59326 (CR) 533	assessment in natural	at IKCOC-7 (CR) 149, 150
Chaetomellic acid A 32	extracts 489, 490	InfoTech Pharma '98 (CR)
Chaperone-usher assembly	α-Chymotrypsin 143	199
pathway 497–499	Ciglitazone 50	kinase inhibitor libraries 524
ChemDiverse, 3D	Ciguatoxins (CR) 532	β-lactam librar / 192
pharmacophore method	Cinchona quinoline alkaloids	library-derived PPAR ligands
513, 514	234	352
Chemical Abstracts Service (CAS)	Cirrhosis, interleukin 6 (IL-6)	matrix metallooroteinase
57 Chomical Design, acquisition by	206 Cisplatin, glutathione conjugates	inhibitors 482
Chemical Design, acquisition by Oxford Molecular 332	117	matrix metalloproteinases 94
Chemical diversity, for lead	Cistron Biotechnology, influenza	molecularly imprinted
generation libraries 513,	A microencapsulation (CR)	polymers 297
514	49	nonpeptide scaffolds 417,
Chemical genetics (CR) 150	CI1011 (ACAT inhibitor) 24, 25	418
Chemical intelligence, in Informix	CL277082 (ACAT inhibitor)	novel PPAR-γ ligands 45
database 548, 549	21	oligocarbamate libraries 563

oligosaccharide libraries 525	oligocarbamate 563	Identification, Characterisation
protein tyrosine phosphatase substrates 143	oligosaccharide 525	and Controversies on the
	phage display <i>see</i> Phage	Role of Imidazol Receptors
purine kinase inhibitor library	display PPAR inhibitors 352	445, 446
94		InfoTech Pharma '98
radio-frequency-encoded	protein tyrosine phosphatase	197–199
taxoid library 45	substrates 143	Lead Identification to
RNA binders 563	purification methods/concerns	Candidate Selection –
screening mixtures using	(CR) 49	Discovery Strategies for
affinity NMR 242	purine kinase inhibitor 94	Managing the Commitment
sensor arrays 524 SH3-domain ligands 296	selection of candidates 109 simplified characterization	to Development 6, 7
simultaneous measurement of	483, 484	Medicines from Nature:
binding constants 388	sugar templates 425	Scientific, Legal and Ethical Aspects 40()
solid-phase carbohydrate	targeted synthesis of	Microtechnologies and
synthesis 482, 483	compounds 105–112	Miniaturisation: Tools,
solution-phase 505, 506	tetramic acid 563	Techniques and Novel
equipment 506, 507	thrombin inhibitors 352	Applications for the
structure-based design	virtual 107, 108	Pharmaceutical Industry
integration 105–112	receptor-based screening	(IBC conference) 148,
substrate-based protein	109	149
tyrosine kinase inhibitors	see also Virtual screening	Molecular Arrays:
