

# Drug DISCOVERY *today* in 2000

For the opening issue of *Drug Discovery Today* (DDT) in the 21<sup>st</sup> century, we would like to express our sincere gratitude to all the individuals who have made the journal a success with their invaluable contributions since its launch in January 1996. We wish to express our deep appreciation for the past and present Editorial Board members and the authors and referees of the various published articles. As a special note, we would also like to extend our heartfelt thanks to the previous Editor David Hughes, Assistant Editors Henriette Willems and Simon Fenwick, and Editorial Administrator Rachel DeWachter. The outstanding effort of all the above individuals has resulted in the journal becoming the premier publication in the drug discovery field. We would like to start the New Year by encouraging proposals for our Editorial, Reviews, Update and Profiles sections. In addition, constructive feedback concerning the content of the journal is always welcome. All proposals and letters should be sent to the Editor at the address on the contents page or sent by e-mail to [ddt@current-trends.com](mailto:ddt@current-trends.com)

The editorial team are:

(Below) from right to left (front row) Debbie Tranter (Editor) and Rebecca Lawrence (Assistant Editor), (back row) Vaughan Collinson (Production Coordinator) and Ben Ramster (Editorial Administrator).

(Left) Andrew Lloyd (Monitor Editor).
