DRUG DISCOVERY TODAY

PERSPECTIVE

BIOTECH FOCUS**501 China commits itself to biotech in healthcare***Faiz Kermani and Yibing Zhou*

MONITOR

MOLECULES**585 Recent developments in screening natural product combinatorial libraries***Paul Edwards***587 Recent developments in the production of ligands directed against the group III metabotropic glutamate and the VLA-4 receptors***Paul Edwards***589 DIARY****FORTHCOMING ARTICLES:****Differences in drug metabolism in the paediatric population and the elderly compared to adults**
*by Margherita Strolin Benedetti, Rhys Whomsley and Michael Canning***A new paradigm for protein kinase inhibition: Blocking phosphorylation without targeting ATP binding***by Marie A. Bogoyevitch and David P. Fairlie***Seeding drug discovery: Integrating telomerase cancer biology and cellular senescence to uncover new therapeutic opportunities in targeting cancer stem cells***by W. Nicol Keith, Catherine M. Thomson, Jill Howcroft, Norman J. Maitland & Jerry W. Shay***Structural Determinants for Selective Inhibition of Matrix Metalloproteinases**
*by Bernard Pirard***Strategies to Support Drug Discovery through Integration of Systems and Data**
*by Chris L. Waller, Ajay Shah, and Matthias Nolte***ELN Implementation Challenges**
by David J Drake
