# DRUG DISCOVERY TODAY

**EDITORIAL****331 Human Microbiome Project—paving the way to a better understanding of ourselves and our microbes**

*William W.L. Hsiao and Claire M. Fraser-Liggett*

**PERSPECTIVE****FEATURE****334 The genetics of a pharma merger**

*Philippe Sanseau, Marie Chabot-Fletcher and Michael J. Browne*

**337 Omic profiling for drug safety assessment: current trends and public-private partnerships**

*William M. Gallagher, David Tweats and Jochen Koenig*

**MONITOR****436 The use of combinatorial chemistry libraries for the discovery of biologically active substances**

*Paul Edwards*

**438 DIARY****FORTHCOMING ARTICLES:****Drug discovery assay systems for Huntington's Disease**

*by Wolfgang Fecke, Marco Gianfriddo, Giovanni Gaviraghi, Georg C. Terstappen and Freddy Heitz*

**Organometallic compounds in oncology: implications of novel organotin as antitumor agents**

*by Angela Alama, Bruno Tasso, Federica Novelli and Fabio Sparatore*

**Assessing the bioequivalence of therapeutic proteins The Retacrit® case**

*by Huub Schellekens*

**Computational mapping tools for drug discovery**

*by Yan A. Ivanenkov, Nikolay P. Savchuk, Sean Ekins and Konstantin V. Balakin*

**Application of LC/MS to proteomics studies: current status and future prospects**

*by Guodong Chen and Birendra N. Pramanik*
