DRUG DISCOVERY TODAY

EDITORIAL

531 Finding Hsp90 inhibitors by drug repurposing: The power of chemical genetics

Min Xiong and Hong-Yu Zhang

PERSPECTIVE

FEATURE

534 Should medicinal chemists do molecular modelling?

Timothy J. Ritchie and Iain M. McLay

538 Medicinal chemistry matters – a call for discipline in our discipline

Craig Johnstone

544 The therapeutic and diagnostic potential of FKBPL; a novel anticancer protein

Tracy Robson and Iain F. James

649 DIARY

FORTHCOMING ARTICLES

Current therapies in ischemic stroke. Part B. Future candidates in stroke therapy and experimental studies

By Erasmia Broussalis, Eugen Trinkla, Monika Killer, Andrea Harrer, Mark McCoy and Jörg Kraus

Myostatin: more than just a regulator of muscle mass

By Josep M. Argilés, Marcel Orpí, Sílvia Busquets and Francisco J. López-Soriano

Expanding the medicinally relevant chemical space with compound libraries

By Fabian López-Vallejo, Marc A. Giulianotti, Richard A. Houghten and José L. Medina-Franco

Tuberculosis: from molecular pathogenesis to effective 1 drug carrier design

By Devyani Dube, Govind P. Agrawal and Suresh P. Vyas
