DRUG DISCOVERY TODAY

EDITORIAL

279 If you want to shoot for the moon, you gotta have the right stuff*Mary Bradley*

PERSPECTIVE

FEATURE**281 Getting the most out of your IP – patent management along its life cycle***Martin A. Bader, Oliver Gassmann, Nicole Ziegler and Frauke Ruether***285 Case study: adapting *in vitro* blood–brain barrier models for use in early-stage drug discovery***Elodie Vandenhaute, Emmanuel Sevin, Dorothee Hallier-Vanuxeem, Marie-Pierre Dehouck and Roméo Cecchelli***291 Amino acid–anticodon binding specificity: rationale for a new class of therapeutic agent***Marvin S. Melzer***405 DIARY****FORTHCOMING ARTICLES****A series of case studies: practical methodology for identifying antinociceptive multi-target drugs***By Min-Hee Pang, Yuntae Kim, Kyung Woon Jung, Sunyoung Cho and Doo H. Lee***Allele-selective inhibition of trinucleotide repeat genes***By Masayuki Matsui and David R. Corey***Systems chemical biology and the semantic web: what they mean for the future of drug discovery research***By David J. Wild, Ying Ding, Amit P. Sheth, Lee Harland, Eric M. Gifford and Michael S. Lajiness***Diving for drugs: marine tunicate anticancer compounds***By Edwin L. Cooper and David Yao*
