DRUG METABOLISM AND DRUG INTERACTIONS

VOLUME 20, 2004

SUBJECT INDEX

absorption rate constant	85	green tea	43
<i>Aeromonas</i>	185	<i>Hafnia</i>	185
alveolar type II cells	175	halogenated anesthetics	175
anesthetics	175	hepatic cytosolic fractions	159
animal model	25	herbal tea	43, 263
antibiotic susceptibility test	185	herb-drug interactions	143, 195
antifungal agents	101	human liver fractions	233
antioxidant	11	human microsomes	25
anti-ulcer agent	57	hydrogen peroxide	175
bioavailability	219	induction	195, 247
bioequivalence	77	inhibition	143, 195, 233
caffeine biotransformation	247	interleukin-2	219
cancer patients	101	isoflurane	175
<i>Candida</i> spp	101	long half-life drugs	77
<i>Cardospermum halicacabum</i>	263	microdilution method	185
<i>Cassia auriculata</i>	263	microsomes	25
CDRI-85/92	57	minimal inhibitory concentration	185
chlorpyrifos oxon	233	model	85, 143
<i>cis-trans</i> conversion	57	monkey	11, 25
<i>Citrobacter</i>	185	<i>Morganella</i>	185
computer models	77, 85	mouse	219
confidence interval	77	murine Lewis lung carcinoma	219
<i>Cynomolgus</i>	11	<i>N,N</i> -diethyl- <i>m</i> -toluamide (DEET)	233
L-cysteine	1	Na ⁺ , K ⁺ -ATPase	175
cysteine analogues	1	omeprazole	273
cytochrome P450	11, 25, 43, 57, 111 143, 195, 247	paclitaxel	219
DEET	233	PBN	11
dog	25	D-penicillamine	1
drug interaction	143, 195, 263, 273	permethrin	233
drug metabolism	1, 11, 25, 43, 57, 111	pesticide metabolism	233
ester hydrolysis	233	P-glycoprotein	219
food-drug interactions	195	pharmacogenetics	159
gemfibrozil	25	pharmacokinetics	11, 219, 273
glutathione-S-transferase	57	phenotype	247
Gram negative bacteria	185	phenylalanine 4-monooxygenase	159
grapefruit	195	α -phenyl- <i>N</i> -tert-butyl nitron	11
		pitavastatin	25

proliferation	175	single or multiple-compartment	
<i>Proteus</i>	185	model	85
<i>Pseudomonas</i>	185	smoking	247
pyridostigmine bromide	233	star fruit	195
		structure-activity relationships	111
		sulphate	1
ranitidine	273		
rat	1, 25, 43, 57, 159, 263	teas	43, 263
		theophylline	263
<i>S</i> -Carboxymethyl-L-cysteine	1, 159	ticarcillin-clavulonic acid	185
<i>S</i> -oxidation	159	truncated AUC	77
secondary peak	85		
simulated concentrations	85	UGT	25
