DRUG METABOLISM AND DRUG INTERACTIONS

VOLUME 23, 2008

SUBJECT INDEX

abiotic stress	51	7-ethoxycoumarin	329
advanced glycation		everted rat intestine	299
endproducts (AGE)	93, 125, 175	evolution	69
ageing	125		
alcohol dehydrogenase	283	forensic	283
aldose reductase	93	free radical generation	151
amethystic product	283		
antioxidant effect	323	glucose metabolism	69
ascorbic acid	175	glutathione	13, 323
		glycation	125
bioflavonoids	299	glyceraldehyde-3-phosphate	
		dehydrogenase	175
cancer treatment	175	glycolysis	69
cancer	291	glyoxal	125
<i>S</i> -carboxymethyl-L-cysteine	261	glyoxalase and disease	13
catalytic mechanism	13	glyoxalase	29, 51, 93, 125
chemotherapy	175	glyoxalase I	13
chlorpyrifos	237	glyoxalase II	13
chlorzoxazone	311		
cladribine	291	hepatic metabolism	329
clearance	329	hepatocytes	211
coumarins	329	HepG2 cells	211
CYP isoforms	211, 237	human hepatocytes	211, 237
CYP2E1	311	humans	175, 211, 237, 261, 283, 311
cytochrome P450	329	hydrogen peroxide	151
cytosolic fractions	261	7-hydroxycoumarin	329
cytotoxicity	211, 237		
		lipid peroxidation	323
deltamethrin	211		
diabetes mellitus	93	MAPK	151
diabetic complications	93	metalloenzymes	29
<i>N,N</i> -diethyl- <i>m</i> -toluamide (DEET)	237	methylglyoxal	1-210
dihydroxyacetone-phosphate	69	methylglyoxal synthase	69
diosmin	311	mitochondrial complex I	175
		mitochondrial glyoxalase II	13
enzyme evolution	13		
enzyme induction	211, 237	nickel	29
<i>Escherichia coli</i>	29	nitrendipine	299
ethanol	283	nuclear factor- κ B	151

oxidative stress	93, 151	reaction phenotyping	261
		<i>Rosa rugosa</i>	323
permethrin	211	scaling	329
peroxynitrite	151	signaling	93
P-glycoprotein	299	S-oxidation	261
pharmacokinetics	283, 291, 311	stereoselectivity	13
phenylalanine 4-monooxygenase	261	superoxide	151
plants	51	Szent-Györgyi, Albert	1, 3
promine-retine hypothesis	13		
protein oxidation	323	thiolester	13
<i>Pseudomonas aeruginosa</i>	29	transport	299
PXR/SXR	211		
pyrethroids	211	zinc	13
rats	291, 299, 329
